

# Index

- Accidental poisonings, 1,3-dichloropropene, 5
- Ants, arid ecosystem bioassays, 64, 70
- Arid ecosystem bioassays, birds, 84
- Arid ecosystem bioassays for ecological risk assessment, 43 ff.
- Arid ecosystem bioassays, insects, 64
- Arid ecosystem bioassays, invertebrates, 62
- Arid ecosystem bioassays, mammals, 84
- Arid ecosystem bioassays, plants, 55, 60
- Arid ecosystem bioassays, soil microorganisms, 48, 51
- Arthralgias, ciguatera poisoning symptom, 104
  
- $\beta$ -Lyase, 1,3-dichloropropene metabolism, 12
- Beetles, arid ecosystem bioassays, 66, 81
- Bioassays for ecological risk assessment, arid lands, 43 ff.
- Birds, arid ecosystem bioassays, 84
  
- Caribbean ciguatera fish poisoning, 99 ff.
- Caribbean ciguatoxins, 123
- C-CTX-1, -2, ciguatoxins, described, 1254
- Chemical structures, 1,3-dichloropropene, 3
- Chemical structures, ciguatoxins, 102
- Ciguatera fish poisoning, Caribbean Islands, 99 ff.
- Ciguatera fish poisoning, Western Atlantic, 99 ff.
- Ciguatera, form of ichthyosarcotoxism, 100
- Ciguatera poisoning, banned fish species, 122
- Ciguatera poisoning, cardiovascular signs, 104
- Ciguatera poisoning, Caribbean ciguatoxins, 123
- Ciguatera poisoning, clinical patterns/treatments, 101
- Ciguatera poisoning, coral reefs relationship, 113
- Ciguatera poisoning, dinoflagellates involved, 115
- Ciguatera poisoning, duration of symptoms, 106
- Ciguatera poisoning, endemic to Caribbean, 107
- Ciguatera poisoning, fish involved, 115, 116
- Ciguatera poisoning, fish variation of toxin content, 122
- Ciguatera poisoning, fish weight-toxicity relationship, 121
- Ciguatera poisoning, fishing area & depth, 121
- Ciguatera poisoning, food chain transmission (illus.), 112
- Ciguatera poisoning, gastrointestinal disturbances, 102
- Ciguatera poisoning, geographic outbreaks, Atlantic, 108
- Ciguatera poisoning, management, 128
- Ciguatera poisoning, neurological symptoms, 102
- Ciguatera poisoning, origin, 111
- Ciguatera poisoning, seasonal variations, 119
- Ciguatera poisoning, symptoms, 100, 103
- Ciguatera poisoning, treatments, 106
- Ciguatoxin C-CTX-1, -2, described, 125
- Ciguatoxin P-CTX-1, described, 125
- Ciguatoxins, chemical structures (illus.), 102
- Ciguatoxins, detection in Caribbean fish, 127
- Ciguatoxins, extraction & purification scheme, 124
- Ciguatoxins food chain transmission (illus.), 112
- Ciguatoxins, mode of action, 126
- Ciguatoxins, neurotoxins described, 100
- Ciguatoxins, structural features of Caribbean source, 125

- Clastogenesis, 1,3-dichloropropene, 32
- Coral reefs, ciguatera poisoning relationship, 113
- Crickets, arid ecosystem bioassays, 67, 83
- 1,3-Dichloropropene, 1 ff.
- 1,3-dichloropropene (<sup>14</sup>C-DCP), metabolism, 6, 14
- 1,3-dichloropropene (DCP), mammalian toxicity, 1 ff.
- 1,3-dichloropropene, accidental poisonings, 5
- 1,3-dichloropropene, acute dermal LD50, 3
- 1,3-dichloropropene, acute oral LD50, 3
- 1,3-dichloropropene, acute toxicity, 3
- 1,3-dichloropropene, blood kinetics, 9
- 1,3-dichloropropene, chemical structures, 3
- 1,3-dichloropropene, clastogenic endpoints, 32
- 1,3-dichloropropene, conjugation GSH, 11
- 1,3-dichloropropene, epoxidation, 11
- 1,3-dichloropropene exposure, neoplastic lesions, 26
- 1,3-dichloropropene, genotoxicity, 28, 31, 34
- 1,3-dichloropropene, human metabolism, 8
- 1,3-dichloropropene, human subacute toxicity, 20
- 1,3-dichloropropene, inhalation toxicity, 18, 25
- 1,3-dichloropropene, liver metabolism, 16
- 1,3-dichloropropene, lung metabolism, 16
- 1,3-dichloropropene, metabolic pathways (chart), 10
- 1,3-dichloropropene, mutagenicity, 29
- 1,3-dichloropropene, oncogenicity, 21
- 1,3-dichloropropene, physical/chemical properties, 2
- 1,3-dichloropropene, primary skin/eye irritancy, 4
- 1,3-dichloropropene, reproductive toxicity, 21
- 1,3-dichloropropene, See DCP, 1 ff
- 1,3-dichloropropene, soil half-lives, 2
- 1,3-dichloropropene, subacute toxicity, 17
- 1,3-dichloropropene, tumorigenic dermal activity, 27
- 1,3-dichloropropene, tumorigenic mode of action, 33
- 1,3-dichloropropene, urinary excretion products, 8
- 1,3-dichloropropene, uses, 2
- DCP (1,3-dichloropropene), mammalian toxicity, 1 ff.
- Dichloropropene, 1,3-, See 1,3-dichloropropene, 1 ff.
- Dinoflagellates, involved in ciguatera poisoning, 115
- Earthworms, arid ecosystem bioassays, 63
- Ecological risk assessment, arid ecosystems, 43 ff.
- Endemic ciguatera poisoning, Caribbean, 107
- Fish families, involved in ciguatera poisoning, 115, 116
- Gambierdiscus toxicus*, ciguatera poisoning source, 111
- Genotoxicity, 1,3-dichloropropene, 28, 31, 34
- Glutathion conjugates, 1,3-dichloropropene, 13
- Human subacute toxicity, 1,3-dichloropropene, 20
- Ichthyosarcotoxism, ciguatera poisoning, 100
- Invertebrates, arid ecosystem bioassays, 62
- Isopods, arid ecosystem bioassays, 67, 82
- LC<sub>50</sub>, 1,3-dichloropropene inhalation, 4
- LD<sub>50</sub>, 1,3-dichloropropene acute oral, 3
- Maitotoxins, ciguatera poisoning, 114
- Mammals, arid ecosystem bioassays, 84
- Mercapturate conjugates, 1,3-dichloropropene, 8
- Microbial bioassays, arid ecosystems, 49, 51

- Microbial pollution-induced community tolerance, 53
- Microtox®, soil contaminant toxicity assessment, 52, 54
- Mites, arid ecosystem bioassays, 66, 74, 78
- Mode of action, ciguatoxins, 126
- Mode of action, 1,3-dichloropropene dermal tumorigenesis, 33
- Mutagenicity, 1,3-dichloropropene, 29
- Myalgias, ciguatera poisoning symptom, 104
- Nematodes, arid ecosystem bioassays, 63, 68
- Neoplastic lesions, 1,3-dichloropropene exposure, 26
- Oncogenicity, 1,3-dichloropropene, 22
- P-CTX-1 ciguatoxin, described, 125
- Physical/chemical properties, 1,3-dichloropropene, 2
- Physicochemical properties, 1,3-dichloropropene, 2
- Phytotoxicity endpoints, arid ecosystem bioassays, 57
- Plants, arid ecosystem bioassays, 55, 60
- Pollution-induced community tolerance, microbial, 53
- Pruritus, ciguatera poisoning symptom, 103
- Radiolabeled 1,3-dichloropropene, metabolism, 7, 14
- Soil microorganisms, arid ecosystem bioassays, 48, 51
- Spiders, arid ecosystem bioassays, 66, 77
- Springtails, arid ecosystem bioassays, 65, 72
- Subacute toxicity, 1,3-dichloropropene, 17
- Termites, arid ecosystem bioassays, 65, 71
- Toxicity bioassays for arid land ecological risk assessment, 43 ff.
- Tumorigenesis mode, 1,3-dichloropropene, 33
- Western Atlantic ciguatera fish poisoning, 99 ff.
