

# Index

- ADI, acceptable daily intake, 48  
ADI vs TMRC, pesticide comparison, 50  
Aflatoxicosis, animals, 77  
Aflatoxicosis, cattle, 78  
Aflatoxicosis, decreased milk yields, 78  
Aflatoxicosis, human, 71  
Aflatoxicosis, poultry, 79  
Aflatoxicosis, resistance in domestic animals, 77  
Aflatoxicosis, susceptible animal species, 77  
Aflatoxicosis, swine, 77  
Aflatoxin AFB<sub>1</sub>, kwashiorkor livers, 71  
Aflatoxin B<sub>1</sub>, hepatocellular carcinoma, 73  
Aflatoxin B<sub>1</sub>, oral LD<sub>50</sub>s, 78  
Aflatoxin, detection with monoclonal antibodies, 75  
Aflatoxin induced mutations, 76  
Aflatoxin, intake correlation liver cancer, 74  
Aflatoxin M<sub>1</sub>, urine from AFB<sub>1</sub> ingestion, 74  
Aflatoxins, acute toxic liver injury, 72  
Aflatoxins, animal carcinogenicity, 80  
Aflatoxins, B<sub>1</sub>, B<sub>2</sub>, G<sub>1</sub>, G<sub>2</sub>, first reported, 70  
Aflatoxins, duckling bioassay, 70  
Aflatoxins, health effects, 69 ff.  
Aflatoxins, hepatoma in Uganda, 71  
Aflatoxins, immunosuppression, 82  
Aflatoxins, infectious disease response change, 83  
Aflatoxins, inhalation exposure, 72  
Aflatoxins, interactions, 81  
Aflatoxins, modes of action, 69 ff.  
Aflatoxins, ochratoxin A interaction, 81  
Aflatoxins, rainbow trout susceptibility, 71  
Aflatoxins, rat liver tumors, 70  
Aflatoxins, Reye's syndrome children, 72  
Aflatoxins, T-2 toxin synergism chicks, 81  
Alachlor, algae and cyanobacteria effects, 98  
Alachlor, states with groundwater contamination, 8  
Alar<sup>®</sup>, dimethylhydrazine cancer agent, 59  
Aldicarb, states with groundwater contamination, 8  
Aldrin, algae and cyanobacteria effects, 111  
Algae, herbicide effects, 140 ff.  
Algae, soil pesticide effects, 95 ff.  
Ametryn, algae and cyanobacteria effects, 98  
Amitrole, algae and cyanobacteria effects, 98  
Ammonium nitrate/pesticide mixtures, groundwater contamination, 10  
*Anabaena dolioum*, herbicide effects, 134  
Anticipated residue contribution (ARC), 45  
Apples, pesticide treated California, 28  
ARC, anticipated residue contribution, 45  
*Aspergillus fumigatus*, aflatoxin-induced response changes, 83  
Atrazine, algae and cyanobacteria effects, 98  
Atrazine, states with groundwater contamination, 8

- Beef**, consumption pattern changes, 43  
**Benomyl**, algae and cyanobacteria effects, 116  
**BHC**, algae and cyanobacteria effects, 111  
**BHC**, effects on cyanobacteria, 144  
**Blue-green algae**, pesticide effects, 95 ff.  
**Bromacil**, states with groundwater contamination, 8  
**Bromoxynil**, algae and cyanobacteria effects, 99  
**Butachlor**, algae and cyanobacteria effects, 99
- Cancer risks**, "legally allowable," 57  
**Cancer risks**, pesticide dietary exposure, 58  
**Cancer risks**, tolerance vs actual residue, 59  
*Candida albicans*, aflatoxin-induced response changes, 83  
**Captafol**, algae and cyanobacteria effects, 116  
**Captan**, algae and cyanobacteria effects, 116  
**Captan**, fruit residues, 26  
**Carbaryl**, algae and cyanobacteria effects, 112  
**Carbendazim**, algae and cyanobacteria effects, 117  
**Carbofuran**, algae and cyanobacteria effects, 112  
**Carbofuran**, states with groundwater contamination, 8  
**Carboxin**, algae and cyanobacteria effects, 117  
**Carcinogen**, defined, 54  
**Carcinogenesis**, aflatoxin effects, 77  
**Carcinogenic risks**, pesticide residues, 53  
**Carcinogens**, Group A, human carcinogens, 54  
**CAS Registry Numbers**, pesticides, 6, 121 ff.
- Chemical Abstracts Service Registry Numbers (CAS)**, 6, 121 ff.  
**Chemical names**, pesticides, 121 ff.  
**Chicken**, consumption pattern changes, 43  
*Chlamydomonas moewusii*, herbicide effects, 140  
*Chlamydomonas reinhardtii*, herbicide effects, 141  
**Chloramben**, algae and cyanobacteria effects, 100  
*Chlorella pyrenoidosa*, herbicide effects, 141  
**Chlorfenac**, algae and cyanobacteria effects, 101  
*Chlorhormidium flaccidum*, herbicide effects, 141  
**Chloridazon**, algae and cyanobacteria effects, 101  
*Chlorococcum hypnosporum*, herbicide effects, 141  
**Chlorophyta**, herbicide effects, 140  
**Chlorothalonil**, exposure estimate correction factors, 46  
**Chlorothalonil**, food residues trade channels, 37  
**Chlorotoluron**, algae and cyanobacteria effects, 101  
**Chloroxuron**, algae and cyanobacteria effects, 101  
**Chlorpropham**, algae and cyanobacteria effects, 102  
**Chlorpropham**, potato residues, 26  
**Chrysophyta**, herbicide effects, 140  
**Common names**, pesticides, 121 ff.  
**Copper oxychloride**, algae and cyanobacteria effects, 117  
**Crops**, percent treated with pesticides, 28  
**Cyanazine**, states with groundwater contamination, 8  
**Cyanobacteria**, pesticide effects, 95 ff.  
**Cypermethrin**, algae and cyanobacteria effects, 113
- 2,4-D**, algae and cyanobacteria effects, 102

- Dalapon**, algae and cyanobacteria effects, 103  
**DBCP**, states with groundwater contamination, 8  
**DCPA**, states with groundwater contamination, 8  
**DDT**, algae and cyanobacteria effects, 113  
**Diallate**, algae and cyanobacteria effects, 103  
**Dibromochloropropane**, states with groundwater contamination, 8  
**Dicamba** algae and cyanobacteria effects, 103  
**1,2-Dichloropropane**, states with groundwater contamination, 8  
**Dietary exposure**, pesticide estimating, 44  
**Dietary pesticides**, risk assessment, 23 ff.  
**Dietary risk evaluation system (DRES)**, pesticides, 41  
**Dinoseb acetate**, algae and cyanobacteria effects, 103  
**Dinoseb**, algae and cyanobacteria effects, 103  
**Dinoseb**, states with groundwater contamination, 8  
**Diquat**, algae and cyanobacteria effects, 104  
**Diuron**, algae and cyanobacteria effects, 104  
**DRES**, see dietary risk evaluation system, 41  
**Dyfonate**, states with groundwater contamination, 8
- EBP**, algae and cyanobacteria effects, 117  
**EDB**, states with groundwater contamination, 8  
**Endosulfan**, algae and cyanobacteria effects, 113  
**Endothal**, algae and cyanobacteria effects, 104
- Ethephon**, algae and cyanobacteria effects, 104  
**Ethirimol**, algae and cyanobacteria effects, 117  
**Ethylene dibromide**, states with groundwater contamination, 8
- FDA**, pesticide residue monitoring results, 30  
**Fenvalerate**, algae and cyanobacteria effects, 114  
**Fertilizer/pesticide mixtures**, health effects, 1 ff.  
**Fertilizers**, point source groundwater contamination, 2  
**Fluchloralin**, algae and cyanobacteria effects, 105  
**Food consumption**, pattern changes, 43  
**FOODCONTAM**, national pesticide monitoring database, 31, 33  
**Fungicide mixtures**, algae and cyanobacteria effects, 152  
**Fungicides**, algae and cyanobacteria effects, 116 ff., 150  
**Fungicides**, toxicity to algae and cyanobacteria, 156
- Gloeocapsa sp.*, herbicide effects, 134  
**Glyphosate**, algae and cyanobacteria effects, 106  
**Groundwater contaminants**, hazardous waste disposal, 2  
**Groundwater contamination**, pesticides by state, 8  
**Group A carcinogens**, defined, 54
- Hazardous waste disposal**, groundwater contaminants, 2  
**HBsA**, see hepatitis B surface antigen, 74  
**HBV**, see Hepatitis B virus, 73  
**Health effects**, pesticide/fertilizer mixtures, 1 ff.  
**Hepatitis B surface antigen (HBsA)**, 74

- Hepatitis B virus, aflatoxin liver injury, 73
- Herbicide degradations, algae and cyanobacteria effects, 119
- Herbicide mixtures, algae and cyanobacteria effects, 118
- Herbicides, algae and cyanobacteria effects, 98 ff.
- Herbicides, effects on algae, 140 ff.
- Herbicides, effects on cyanobacteria, 134 ff.
- Herbicides, *in vitro* studies on cyanobacteria, 134 ff.
- Herbicides, *in vivo* studies on cyanobacteria, 141
- Herbicides, toxicity to algae and cyanobacteria, 156
- Human carcinogens, Group A defined, 54
- IARC**, see International Agency for Research in Cancer, 75
- Immunosuppression, aflatoxin embryonic exposure, 84
- Immunosuppression, aflatoxins, 82
- Infectious diseases, aflatoxin-induced changes, 83
- Insecticide mixtures, algae and cyanobacteria effects, 120
- Insecticides, algae and cyanobacteria effects, 111 ff.
- Insecticides, effects on cyanobacteria, 143 ff.
- Insecticides, *in vitro* studies on algae, 148
- Insecticides, *in vitro* studies on cyanobacteria, 143 ff.
- Insecticides, *in vivo* studies on cyanobacteria, 149
- Insecticides, toxicity to algae and cyanobacteria, 156
- Insignificant risks, defined, 56
- International Agency for Research in Cancer (IARC), 75
- Ioxynil, algae and cyanobacteria effects, 106
- Isocil, algae and cyanobacteria effects, 106
- Isoproturon, algae and cyanobacteria effects, 107
- Lenacil**, algae and cyanobacteria effects, 107
- Leptophos, algae and cyanobacteria effects, 114
- Lettuce, pesticide treated California, 28
- Lindane, algae and cyanobacteria effects, 114
- Linuron, algae and cyanobacteria effects, 107
- Liver cancer, correlation aflatoxin intake, 73
- Malathion**, algae and cyanobacteria effects, 114
- Mancozeb, algae and cyanobacteria effects, 117
- Market basket surveys, pesticide residues, 37
- Mastigocladus laminosus*, herbicide effects, 134
- Maximum Tolerated Dose (MTD), 54
- MCPA, algae and cyanobacteria effects, 107
- Mecoprop, algae and cyanobacteria effects, 107
- Metamitron, algae and cyanobacteria effects, 108
- Methabenzthiazuron, algae and cyanobacteria effects, 108
- Methoxyethylmercury chloride, algae and cyanobacteria effects, 117
- Metolachlor, states with groundwater contamination, 8
- Metribuzin, algae and cyanobacteria effects, 108
- Metribuzin, states with groundwater contamination, 8
- Milk, consumption pattern changes, 43
- Monoclonal antibodies, aflatoxin detection, 75

- Monocrotophos, algae and cyanobacteria effects, 115  
 Monuron, algae and cyanobacteria effects, 108  
 MTD, see Maximum Tolerated Dose, 54  
 Mutations, aflatoxin induced, 76  
  
 Nationwide Food Consumption Survey (NFCS), 40  
 NFCS, see Nationwide Food Consumption Survey, 40  
 Nitrofen, algae and cyanobacteria effects, 109  
*Nitzschia sigma*, herbicide effects, 141  
 NOAEL, no observable adverse effect level, 48  
 NOEL, no observable effect level, 47  
*Nostoc calcicola*, herbicide effects, 134  
*Nostoc muscorum*, herbicide effects, 134  
  
 Ochratoxin A, aflatoxin interaction, 81  
 Oncogens, defined, 54  
 Oral LD<sub>50</sub>s, aflatoxin B<sub>1</sub>, 78  
 Oranges, pesticide treated California, 28  
*Oscillatoria sp.*, herbicide effects, 134  
 Oxamyl, states with groundwater contamination, 8  
  
 Paraquat, algae and cyanobacteria effects, 109  
 Parathion, algae and cyanobacteria effects, 115  
 Permethrin, algae and cyanobacteria effects, 115  
 Pesticide chemical names, 121 ff.  
 Pesticide common names, 121 ff.  
 Pesticide, dietary risk assessment, 23 ff.  
 Pesticide/fertilizer mixtures, groundwater contamination, 2  
 Pesticide/fertilizer mixtures, health effects, 1 ff.  
 Pesticide/fertilizer mixtures, promoter carcinogens, 13  
 Pesticide mode of action, 121 ff.  
 Pesticide proprietary names, 121 ff.  
 Pesticide residues, based on food consumption, 40  
 Pesticide residues, based on tolerances, 25  
 Pesticide residues, based on use patterns, 27  
 Pesticide residues, California 1989 summary, 33, 34  
 Pesticide residues, carcinogenic risks, 53  
 Pesticide residues, estimating dietary exposure, 44  
 Pesticide residues, estimating dietary intake, 24  
 Pesticide residues, FDA food monitoring, 30  
 Pesticide residues, FDA Los Angeles summary, 32, 34  
 Pesticide residues, FDA most commonly found, 39  
 Pesticide residues, major consumer concern, 23  
 Pesticide residues, market basket surveys, 37  
 Pesticide residues, post-harvest factors, 35  
 Pesticide residues, risk assessment, 47  
 Pesticide residues, total diet studies, 38, 39  
 Pesticide tolerances, estimating dietary intake, 25
