A
Acronym meaning,

B
Band to band tunneling (BTBT), 113, 115, 134
Bitline (BL), 5, 31, 57, 83, 120, 145
Bitline bar (BLB), 16, 31–40, 42, 46–49, 51, 52, 54, 120–122, 126–131
BTBT. See Band to band tunneling (BTBT)

C
Cell ratio (CR), 13–15, 44, 68, 86, 121–125, 130

D
Dynamic voltage scaling (DVS), 58, 61

G
Generation-recombination (G-R), 117

I
International technology roadmap for semiconductors (ITRS), 114

M
Metal oxide semiconductor field effect transistor (MOSFET), 2, 102, 113–116, 134, 139

N
NBTI. See Negative bias temperature instability (NBTI)
N-channel metal oxide semiconductor (NMOS), 12, 14, 31, 39, 59–61, 69, 93, 101, 139
N-channel tunnel field effect transistor (NTFET), 115–117
Negative bias temperature instability (NBTI), 137–155
NMOS. See N-channel metal oxide semiconductor (NMOS)
NTFET. See N-channel tunnel field effect transistor (NTFET)

P
P-channel metal oxide semiconductor (PMOS), 8, 9, 31, 39, 137–145, 147, 148, 152
P-channel tunnel field effect transistor (PTFET), 116, 117
PMOS. See P-channel metal oxide semiconductor (PMOS)
PR. See Pull-up ratio (PR)
Predictive technology model (PTM), 13, 43, 67, 94, 131, 140, 148
PTFET. See P-channel tunnel field effect transistor (PTFET)
PTM. See Predictive technology model (PTM)
Pull-up ratio (PR), 14, 15, 36, 42, 126, 127, 130

R
Random dopant fluctuation (RDF), 78, 137
RBL. See Read bitline (RBL)
RD. See Reaction–diffusion (RD)
Index

RDF. See Random dopant fluctuation (RDF)
Reaction–diffusion (RD), 140, 142, 143
Read noise margin (RNM), 122–128, 130–132
Read word line (RWL), 25, 27, 47–49, 61, 62, 65, 66, 74, 78, 79, 89–94, 99, 110, 131
Reverse short channel effect (RSCE), 27
RNM. See Read noise margin (RNM)
RSCE. See Reverse short channel effect (RSCE)
RWL. See Read word line (RWL)

S
Schmitt trigger (ST), 23–24
SE-SRAM. See Single ended static random access memory (SE-SRAM)
Silicon tunnel field effect transistor (Si-TFET), 115, 116, 135, 136
Simulation program with integrated circuit emphasis (SPICE), 43, 67, 71, 73, 76, 78, 80, 94, 96–98, 102, 118
Single ended static random access memory (SE-SRAM), 59, 62–66, 81
Si-TFET. See Silicon tunnel field effect transistor (Si-TFET)
SNM. See Static noise margin (SNM)
SoC. See System on chip (SoC)
SPICE. See Simulation program with integrated circuit emphasis (SPICE)
SRAM. See Static random access memory (SRAM)
ST. See Schmitt trigger (ST)
Static noise margin (SNM), 13, 33, 58, 84, 131, 137
Static random access memory (SRAM),
System on chip (SoC), 3–5, 20, 29, 57, 83, 84, 111–114

T
TCAD. See Technology computer aided design (TCAD)
Technology computer aided design (TCAD), 114, 118–120
TFET. See Tunnel field effect transistor (TFET)
Transmission gate (TG), 11, 12, 22–23, 59–63, 69, 114
6T SRAM, 6, 31–37, 57, 85, 120, 138
7T SRAM, 86–87, 89, 91, 94, 97, 109, 115
9T SRAM, 25–26
10 TSRAM, 23–24
Tunnel field effect transistor (TFET), 113–116, 118–120, 122, 127, 133, 134, 136

V
Very large scale integration (VLSI), 1
Voltage transfer characteristics (VTC), 16, 33–35, 37, 38, 40, 45, 62, 67–69, 87, 119, 138, 143

W
WAM. See Write ability margin (WAM)
WNM. See Write noise margin (WNM)
Write ability margin (WAM), 19–21, 61, 64, 67–71, 77, 84, 86, 87, 89, 90, 101
