    - image processing, 21, 22
    - implementation of linear diffusion through CNNs, 35
  - challenges for
    - VLSI implementation through CNNs, 35
  - concept of, 21
  - implementation of, 22, 35, 36
  - Gaussian filters
    - relation to
      - diffusion process, 23
- I**
- Image energy
  - concept of, 74
  - implementation of
    - energy-based representation, 32, 91
    - image energy computation, 74
  - relation to
    - saliency, 91
- IMote-2
  - application to
    - assisted living, 9
  - concept of, 6, 9, 111
  - implementation of, 111
- M**
- MeshEye
  - application to
    - object detection, 11
    - stereo matching, 11
  - concept of, 10
  - implementation of, 10
- MOS transistors
  - calculation of
    - diffusion in a large network through simulations, 64
  - control of
    - design equation for MOSTs in large networks, 57
    - design equation for MOSTs in two-node network, 60
  - impact on
    - impact of nonlinearities the implementation of Gaussian filters, 36
  - relation to
    - implementation of Gaussian filters through passive resistors, 55
- Multi-cluster WSN
  - concept of, 5
- Multihop wireless communications
  - application to
    - base stations, 5
- Multimedia sensing
  - relation to
    - WSNs, 2
- Multiresolution
  - application to
    - smoke detection, 132
  - concept of
  - implementation of

- block division control, 74
  - multiresolution scene representation, 88
- relation to
  - filtering with reduced kernels, 28, 29, 88
  - pyramid representation, 87
- P**
- Periodic reporting
  - concept of, 5
- Pyramidal representations
  - concept of
    - Gaussian pyramids, 25
    - subsampling, 25
  - impact on
    - impact of subsampling on image quality, 27
  - implementation of
    - Gaussian pyramids in the FLIP-Q chip
  - relation to
    - multiresolution image representations
    - scale space, 21
- Q**
- QCIF resolution
  - concept of, 3
- QVGA resolution
  - concept of, 9
- R**
- Region of interest
  - application to
    - content-aware adaptive representations, 27
  - concept of, 27
  - control of
    - ROI in MeshEye, 10
  - relation to
    - content-based image plane division, 27
    - fine-grain processing, 27
- Resistive grids
  - application to
    - Gaussian filter implementation, 35
  - calculation of
    - the impact of mismatch in large CNN resistive grids
  - challenges for
    - VLSI implementation, 35
  - concept of
    - smoothing factor, 44
  - impact on
    - impact of mismatch on CNN resistive grids
  - implementation of, 35
- S**
- Scale space
  - concept of, 21
  - implementation of scale space on FLIP-Q chip, 85
  - relation to
    - image processing, 25
    - linear diffusion, 25
- Single instruction multiple data processors
  - concept of, 68
- T**
- Time controlled resistive grids
  - challenges for
    - VLSI implementation
    - VLSI implementation of the time constant, 36
  - concept of
    - time constant of a RC grid, 36
  - control of
    - a diffusion process through the time constant, 36
  - implementation of
    - advantages for VLSI implementation, 54
    - time controlled grids through MOSTs, 54, 55
  - relation to
    - steady-state of diffusion process, 45
- U**
- Ubiquitous computing
  - concept of, 1
  - relation to WSNs, 2
- V**
- VGA resolution
  - concept of, 9
- Vision-enabled WSN
  - application to
    - forest fire detection, 130
  - challenges for
    - forest fire detection
  - relation to
    - CITRIC, 14
    - CMUcam3, 13
    - Cyclops, 7
    - EyeRIS-based, 16
    - IMote-2, 6
    - MeshEye, 10
    - WiCa, 11

- Vision hardware
  - challenges for
    - WSNs, 3
  - implementation of
    - architecture of the FLIP-Q chip, 68
    - diffusion-based Gaussian filtering on the FLIP-Q chip, 71
    - readout circuitry on the FLIP-Q chip, 78
- Vision processing chain
  - concept of, 67
  - relation to
    - relation of high-level tasks to the processing chain, 67
    - relation of low-level tasks to the processing chain, 67
    - relation of medium-level tasks to the processing chain, 67
- W**
- WiCa
  - concept of, 11
- Wi-FLIP
  - application to
    - forest fire detection, 143
  - concept of, 111
  - implementation of
    - internal communications, 112
    - main board, 114
    - programming, 114
- Wildfire monitoring
  - concept of, 3
- Wireless sensor networks
  - application to
    - forest fire detection, 129
  - concept of, 2, 5
  - implementation of
    - sensor node, 111
- X**
- Xetal-II
  - application to
    - application of SIMD processors to Xetal-II, 13
  - concept of, 11
  - implementation of, 12
