

# Index

## A

Acceleration, 119, 133, 135–137, 142, 143, 147, 151, 155  
Admissible, 25, 27–29, 98  
American option, 59–95, 111  
Arbitrage-free, 2, 15–21, 181–203  
Arithmetic average, 60, 81  
Arrow–Debreu, 164, 165  
Asymptotic value, 125, 127, 129  
Average diagonal line length, 190, 198, 201

## B

Backward induction, 63  
Bellman’s optimality principle, 167  
Bermudan option, 106, 111  
Binomial model, 71, 79, 81, 83  
Black–Scholes, 11, 16, 21, 41, 46  
Boundary condition, 121, 122, 124, 127, 168  
Bounded, 7, 25, 27, 66, 86, 98, 108  
Brownian motion, 15, 98, 99, 101, 108, 111–113, 142, 144, 158–161  
Bull option, 106–109, 111, 113, 114  
Bundling, 60, 63

## C

Call option, 10, 11, 19, 46, 49–51, 97, 106, 107, 111, 113, 119, 120, 132, 133, 135  
CCF. *See* Conditional characteristic functions (CCF)  
CDS. *See* Credit default swap (CDS)  
Characteristic function, 101, 109, 142–144, 146, 148, 150, 151, 154  
Chebyshev, 61, 85–89  
Comonotonic distribution, 50, 51  
Comonotonic index option price, 50–52

## Comonotonicity

gap, 41, 52  
ratio, 52–54, 56  
Comonotonic upper bound, 50–52, 56  
Computational time, 60, 67, 68, 129  
Conditional characteristic functions (CCF), 101, 118–121, 124, 136  
Conditional expectation, 59–61, 63–71, 74–86, 88–93, 168  
Conic finance, 40, 45–47  
Constrained least squares, 18  
Constraint, 16–18, 21, 165, 171  
Control delay, 23–35  
Control lag, 24, 33  
Convergence, 2, 3, 5, 6, 8, 10–12, 59–95, 99, 100, 104, 106, 108–111, 113, 114, 135, 142, 147, 152, 161, 182, 188–190, 198–200, 202, 203  
rate, 60, 61, 66–68, 74–79, 83, 85, 89, 90, 93, 104, 113  
COS, 97–114, 142  
Cost function, 25, 28–34  
Counterparty risk, 40  
Credit default swap (CDS), 142, 145, 181–203  
Credit derivative, 141–155  
Credit spread, 143–145, 151, 153–155  
Cross recurrence plots (CRP), 186–191, 195–198, 201–203  
CRP. *See* Cross recurrence plots (CRP)

## D

Default probability, 142–145, 150, 151, 153–155  
Derivative pricing, 2  
Digital option, 97, 98, 106, 108, 111, 113, 114  
Dimensionality, 31, 32, 81

Discontinuity/discontinuities, 104, 160  
 Discontinuous density function, 98, 108–111, 114  
 Discount rate, 26  
 Discrete time approximation, 2, 5, 10  
 Discrete time optimal stopping, 62  
 Discretization, 5, 7, 8, 10, 30, 41, 71, 97, 99, 163  
 Dividend, 15, 46, 137, 144, 151, 154, 155  
 DJX volatility, 43  
 Double exponential (DE) model, 154  
 Drift, 4, 7, 8, 11, 162, 164  
 Dynamic programming, 24, 26, 32, 63, 99, 167  
 principle, 62, 98–100, 114, 167

**E**

Effective cost, 32  
 Error convergence, 106, 108  
 Euler scheme, 2, 5–8, 10–12  
 Euler summation, 142, 147, 150  
 Euler transform, 147  
 Euribor, 21  
 European option, 73–75, 77, 78, 94, 99, 107  
 Existence, 3, 99, 182, 186, 202  
 Exponential Lévy process, 141, 144, 155

**F**

Fast Fourier transform (FFT), 99, 103, 114, 117–137, 142, 143, 148–150, 152  
 Fear gauge, 39, 42  
 Fear index, 39–56  
 FFT. *See* Fast Fourier transform (FFT)  
 Finite difference method, 29  
 Fixed delay, 30–34  
 Fixed volatility, 107–111  
 Forward contract, 158  
 Fourier cosine series expansion, 98, 100, 104, 110, 114  
 Fourier inversion, 118–120  
 Fourier method, 97, 114, 118  
 Fourier transform, 117–119, 142, 146, 148–151  
 Free boundary problem, 24, 28, 29

**G**

Gas sales agreement (GSA), 158–160, 165–168  
 Gas swing, 157–178  
 GBM. *See* Geometric Brownian motion (GBM)  
 Geometric average, 79, 81

Geometric Brownian motion (GBM), 15, 98, 99, 108, 111–113, 142, 144, 158, 160, 161  
 Gibbs phenomenon, 110  
 Granger causality, 183, 191–193, 201  
 GSA. *See* Gas sales agreement (GSA)

**H**

Hamilton–Jacobi–Bellman (HJB) equation, 98  
 Hardware accelerator, 6  
 Herd-behavior, 48–54  
 Hermite, 61, 85–89, 93  
 High volatility load, 159  
 Hilbert transform (HILB), 142, 149, 152, 153

**I**

Implied liquidity, 40, 45, 47, 56  
 parameter, 40, 45, 46, 56  
 Implied volatility, 40, 46  
 Impulse control problem, 23–35  
 Inventory control, 25, 29–31  
 Inverse Fourier transform, 148, 149, 151  
 Iterative process, 29  
 Itô's formula, 27

**J**

Jarque–Bera, 183, 192, 193  
 Jump-adapted scheme, 3, 5, 7–12  
 Jump-diffusion process, 1–12, 98, 99, 101, 108, 113–114  
 Jumps, 1–8, 11, 12, 24, 31, 32, 81, 98, 107, 117–137, 142, 154, 155, 173

**K**

Kou model, 4  
 Kurtosis, 155, 192, 193

**L**

Laguerre, 61, 85–89, 93  
 Laplace transform, 147  
 Least squares Monte Carlo (LSM), 60, 61, 66–68, 70, 81, 83, 85, 86, 89–91, 93, 160  
 Levy–Khintchine, 118  
 Lévy process, 99, 101, 117–119, 141–144, 146, 152, 154, 155  
 LIBOR, 2, 4, 118, 191  
 Liquidity risk, 40, 45–47  
 Local error, 6, 98, 103–106, 108, 109, 111, 114

Lorenz system, 188, 190  
 Low volatility load, 159  
 LSM. *See* Least squares Monte Carlo (LSM)

**M**  
 Marginal distribution, 51, 123  
 Market data, 16, 18, 20, 21  
 Markov chain, 158–161, 164, 166, 168, 173  
 Maturity, 15, 16, 18, 43, 44, 46, 49, 51, 52, 81, 94, 125, 127, 133, 135–137, 142, 143, 145, 158, 159, 166–168, 191  
 Maximum options, 81, 83  
 Mean reverting, 44, 47, 118, 158, 161, 163  
 Merton jump-diffusion model, 3, 4, 10, 154  
 Merton model, 144  
 Minimization, 17–19  
 Minimum bill, 166, 167, 171  
 Minimum options, 81, 83, 93  
 MLS. *See* Moving least squares (MLS)  
 Model-free approach, 41, 42  
 Moneyiness, 125  
 Monitoring dates, 142, 144, 145, 152, 155  
 Monte Carlo simulation, 2, 10, 59, 60, 63, 65, 90, 119, 124  
 Moving boundary method, 24  
 Moving least squares (MLS), 15–21  
 Multi-period, 61, 66, 67, 85, 93

**N**  
 NIG. *See* Normal-Inverse Gaussian (NIG)  
 Normal-Inverse Gaussian (NIG), 152–155  
 Numerical method, 16, 21, 32, 100, 111, 114, 119, 124, 133, 135, 142, 148  
 Numerical results, 10–12, 61, 62, 65, 68–74, 78, 90, 93, 119, 129, 143, 151  
 Numerical stability, 6, 8

**O**  
 ODE. *See* Ordinary differential equation (ODE)  
*ode45* solver, 119, 124, 125, 133, 135  
 Optimal control, 24, 26–28, 30, 105  
 Optimal exercise, 59, 62–64, 158  
 Optimal policy, 26, 28, 29  
 Order of convergence, 61, 75, 79, 83, 85, 90, 93  
 Ordinary differential equation (ODE), 29, 34, 118, 119, 122, 136  
 Orthogonal, 85–89

**P**  
 Parity theory, 181–203  
 Partial differential equation (PDE), 34, 97, 99, 108  
 Payoff function, 10, 60, 79, 81, 83, 93, 98, 106, 110, 113, 165  
 PDE. *See* Partial differential equation (PDE)  
 Pentanomial lattice, 158, 160, 168  
 Poisson jump, 32  
 Poisson process, 3–5, 7–11, 98  
 Polynomial  
   family, 61, 85, 86, 93  
   growth, 2  
   space, 17, 18, 21  
 Predictor-corrector scheme, 1–12  
 Probability density, 15, 106, 114, 145, 151  
 Probability distribution, 5, 11, 31  
 Put option, 43, 47, 49, 52, 61, 62, 68, 79, 86, 106, 108, 134

**Q**  
 Quasi-variational, 25

**R**  
 Random bit generator, 6  
 Recovery rate, 145  
 Recurrence rate (RR), 190, 198–200, 202  
 Recursive algorithm, 98, 99, 114  
 Regime switching, 157–178  
 Richardson-extrapolation, 111  
 Risk measure, 2, 54  
 Runge–Kutta, 119

**S**  
 Scaling matrix, 17  
 SDE. *See* Stochastic differential equation (SDE)  
 Semi-analytic approximation, 119, 133, 136  
 Short rate, 15, 18, 19  
 Simulation methods, 59, 64, 90, 93, 119  
 Skew, 193, 200  
 Sovereign, 182, 183, 186, 190, 191, 193, 201  
 Space step, 161, 162  
 Spitzer identity, 142, 143, 146, 150, 155  
 Spot price, 158, 160, 161, 164–168, 171, 178  
 Stability, 6, 8, 21, 118, 161, 183  
 State space, 28, 31, 60, 63, 159  
 Stochastic control problem, 24, 34, 97–101  
 Stochastic delay, 25, 30–34  
 Stochastic differential equation (SDE), 1–4, 6, 7, 10–12

Stochastic factors, 60, 61, 79–83, 90, 93,  
117–137

Stochastic mesh method, 64

Stochastic volatility, 117–137, 159

Stopping times, 25, 62–65

Strike, 10, 11, 15, 18, 19, 28, 43, 46, 49, 51,  
52, 62, 69, 81, 82, 98, 106, 107, 118,  
120, 133, 135–137, 167, 171

Sunk cost, 25, 32

Swing contract, 157–178

Systemic risk, 40, 49, 53, 54, 56

## T

Take-or-pay, 157, 166, 167

Taylor expansion, 105, 114, 117, 119, 127, 136

Taylor series, 125, 127–128

Transition probability, 21, 145, 159, 163–164,  
166, 168

Trinomial, 158, 161–164

## U

Unbounded, 66, 86, 89–90

Uniform distribution function, 109

Uniqueness, 3, 99

Untapped flexibility, 157

## V

Variance regression, 69, 70, 72–74

Variance swap, 43

Verification theorem, 26–28

VIX, 39–44, 47, 48, 52–54, 56

Volatility, 15–21, 30, 39–46, 49, 56, 68, 69,  
74, 79, 83, 97–115, 117–137, 153, 155,  
157–164, 166, 167

## W

Wagner-Platen expansion, 6, 7

Weak convergence, 2–12

Weighted least squares, 17

Wiener–Hopf, 141–155

Wiener process, 3–5, 7, 25

## Z

Z-transform, 142, 143, 146–148, 151, 155
