

Index

- active power, 23
- AHU (air handling unit), 12, 96
- ARCNET, 61
- artificial neural network, 79, 158, 164
- average illuminance, 25
- average waiting time, 33

- backpropagation, 81
- backward chaining, 73
- BACnet, 46, 171
- bandwidth, 50
- blackboard architecture, 150, 165, 166
- bridge, 61
- building automation, 41, 167

- CABD, 54
- calibration, stereoscopic cameras, 102
- CCTV, 40
- central alarm system, 40
- central systems, 13
- channeling, 150
- client-server, 59
- closed circuit television, 40
- coaxial cable, 50
- common protocol, 46, 171
- communal aerial broadcasting, 54
- communication, 49
- computer algebra, 73, 137
- computer network, 59
- computer vision, 91, 101, 123, 134, 143
- convolution, 86, 91
- cost analysis of IB, 6

- CRC, 52
- CSMA/CD, 60
- cyclic redundancy check, 52

- data management centre, 167
- defuzzification, 78, 113
- degree of chaos, 145
- demodulation, 49
- DFT (discrete Fourier transform), 86
- digital carrier, 53
- digital image, 89
- digital sampling, 85
- digital signal, 85
- direct digital control, 44, 47, 170
- discrete Fourier transform, 86
- distortion power, 23
- distribution circuits, 18
- DNS (domain name system), 62
- DTMF (dual-tone multi-frequency), 52
- dynamic zoning, 150, 151

- earthing system, 19
- effective temperature, 9
- effects of harmonics, 21
- eigenvalues, 66
- eigenvectors, 66
- electric lift, 27
- electric power transmission, 17
- electrical installation, 15
- elevator drives, 30
- emergency generator, 19
- energy management, 163
- Ethernet, 60
- expert rules, 72
- expert system, 71, 95, 149

- extension principle, 76
- FDDI (fiber digital data interface), 58
- fiber, 50, 57
- filter, 87
- FIR filter, 88
- fire, 35
- fire alarm, 35, 38
- fire detection, 143
- foam system, 37
- forward chaining, 73
- Fourier transform, 87, 130
- fuzzification, 75, 111
- fuzzy clustering, 104
- fuzzy control, 77, 111
- fuzzy expert systems, 77
- fuzzy linear equations, 128
- fuzzy modelling, 79
- fuzzy number, 75, 125
- fuzzy relations, 76
- fuzzy sets, 75
- fuzzy systems, 75

- gateway, 61
- genetic algorithm, 82, 157
- geosynchronous orbits, 56
- glare estimation, 25
- glare index, 26

- hall call allocation, 150
- harmonics, 20, 125, 130
- hose reels, 37
- Hough transform, 92, 124
- human comfort, 7
- HVAC (heating ventilation and air-conditioning), 7
- hydrants, 37
- hydraulic lift, 29

- IIR filter, 88
- image processing, 90
- inference engine, 73
- ISDN (integrated services digital network), 54

- intelligent building, 1
- Internet, 61, 168
- Intranet, 62
- intrusion sensors, 39

- knowledge engineering, 72
- knowledge-based systems, 71, 93
- knowledge sources, 165

- LAN (local area network), 60
- least-squares fitting, 70, 98, 131
- lift, 27
- lift supervisory control, 33, 149, 157
- lift traffic analysis, 31
- lighting, 23
- lighting control, 134
- lighting design, 137
- lighting methods, 24
- linear equations, 65
- linear system, 86
- linear transformation, 67
- local loop, 53
- LonWorks, 171
- lumen method, 25
- luminance, 24
- luminous flux, 24

- maintenance, preventive, planned and breakdown, 95
- Maple, 74, 141
- matrix, 64
- mean radiant temperature, 8
- microprocessor control, 47, 170
- microwave transmission, 50
- modem, 52
- modulation, 49
- moment of distribution, 68
- multi-layer neural network, 80
- multiple packaged unitary equipment, 13

- network, 59
- network control unit, 43
- neural network, 79, 164
- neural network based control, 106

- normal distribution, 69
- open system, 46, 171
- operator workstations, 43
- optical fiber, 50, 57
- optical flow, 102
- PABX (private automatic branch exchange), 54
- partial differentiation, 67
- PBX (private branch exchange), 53
- peer-to-peer, 59
- perceptron, 79
- performance index, 108, 119
- periodogram, 89
- photometry, 24
- PID control, 96
- pixel correspondence, 104
- PMV (predicted mean vote), 10
- Poisson distribution, 69
- power factor, 19
- power quality, 20
- PPD (predicted percent dissatisfied), 10
- private branch exchange, 53
- programmable logic controller, 49
- PSTN (public switched telephone network), 52
- radio transmission, 50
- random variable, 68
- reactive power, 23
- recursive least squares, 99
- reflectance, diffuse and specular, 135
- remote monitoring, 34, 148, 168
- round trip time, 32
- safety systems, 39
- sampling theorem, 85
- satellite communication, 55
- security, 39, 143
- self-learning system, 81, 116
- serial communication, 51
- simulated annealing, 83
- skin wettedness, 9
- SMATV, 56
- Sobel operation, 92
- space sensors, 39
- spectral analysis, 89
- spectral leakage, 130
- sprinkler, 36
- steepest descent, 67, 129
- subscriber loop, 53
- switchboard, 18
- system identification, 98
- system-level controller, 48
- TCP/IP, 61
- TDD (total demand distortion), 22
- telephone system, 52
- template matching, 92
- THD (total harmonic distortion), 22
- token ring, 61
- topology, 59
- total power factor, 23
- twisted pair, 50
- unsupervised learning, 81, 159
- variable volume box, 13
- variance, 69
- vector, 63
- vector space, 65
- vertical transportation, 28
- vision 91, 101, 123, 134, 143
- VSAT (very small aperture terminal), 57
- WBGT, 9
- WCI, 9
- wet-bulb temperature, 9
- wind chill index, 9
- zone-level controller, 48
- z-transform, 86
