 digital subtraction, 186
 R-carotid, 148–149
 vertebral, 189–191
Antisiphon device (ASD), 245
Aorta, coarctation of, 184
Arachnoid cysts, 53, 95, 129
 age distribution of, 102–107
 anatomical distribution of, 105, 108
 cavities, 79, 81
 classification of, 53, 101, 105, 108
 cortical, 143–150
 age distribution of, 146
 clinical presentation and diagnosis, 145–146
 focal, 143, 147, 150
 hemispheric, 143–146, 148, 151
 incidence of, 143–145
 surgical management of, 147–151
 varieties of, 143–144
 definition of, 101
 enlargement, pathophysiology of, 59–66
 epicranial, 154
 false, 79, 101, 114
 fluid, 79–83, 85, 101, 103, 120
 heredity, 102–105
 incidence of, 102–105
 infratentorial, 54, 58, 66, 70, 72, 105–106, 129–140
 age distribution of, 130–131
 anatomical distribution of, 130–136
 sex distribution of, 130
 surgical treatment of, 137–140
 interhemispheric, 153–161, 164
 age and sex distribution of, 155–158
 clinical presentation and diagnosis of, 158–164
 incidence of, 155–158
 intradural, 154
 surgical management and results, 156–167
 intracranial, 53–74, 103, 108, 130, 155–157, 205–206
 anatomical distribution of, 54
 classification of, 53–54
 dynamics of formation of, 53
 etiology of, 53, 58
 mechanisms of formation of, 58–59
 traumatic origin for, 205
 intradiploic, 108
 intrasellar, 114–115, 214
 lining, cellular mechanisms in fluid secretion by, 83–85
 mechanisms of formation of, 82
 parasellar, 114
 pathogenesis of in relation of mechanism of CSF absorption, 79–85
 posterior fossa, 129–130, 132–140, 192–193, 205
 posttraumatic, 201–207
 primary, 58, 101, 114
 retrocerebellar, 129, 185, 187
 secondary, 101–102
 sex distribution of, 103–104
 significance with regard to pressure/volume relationship, 81
 similarity to mechanism of CSF absorption, 82–83
 suprasellar, 70, 81, 105, 113–126, 158, 214
 age distribution of, 115–116
 clinical presentation of, 117–119
 diagnosis of, 119–121
 incidence of, 116–117
 management and results of, 121–125
 relationship with hydrocephalus, 119
 sex distribution of, 117
 supratentorial, 105–106, 251
 tetrosellar, 114
 traumatic without fracture, 108
 true, 85, 92, 114, 130
Arachnoid diverticula, 53, 101–102
Arachnoid granulations, 20, 24–27, 30–31, 33, 37, 39, 41–42, 44–45, 48, 50, 59, 83, 85
 internal structure of, 42–46
 subarachnoid hemorrhage and, 46–49
Arachnoiditis, 254
 basal, 56, 251
 chronic cystic, 53

- Arachnoiditis (*cont.*)
 involving chiasmatic area, 256
 opto-chiasmatic, 113
 in spinal cord, 251
 Arachnoid malformations, 60,
 69, 101–102
 Arachnoid mater, 19, 39–40, 54,
 83, 101–102
 Arachnoid pouches, 53, 101
 Arachnoid villi, 20, 24–33, 37,
 39, 48, 50, 59, 234
 functional aspects of, 29–33
 gross anatomy of, 25
 histology of, 26–27
 morphology of, 41–42
 ultrastructure of, 29–33
 Arterovenous malformations,
 163
 Astrocytes, 1–9, 14
 density of, 3
 embryonal, 2
 ependymal, 11
 fibrous, 3–4, 6–7, 11
 freeze-fracture replica of, 8
 marginal, 3

 Posttraumatic cysts, *see* Arachnoid cysts, posttraumatic
 Praziquantel, 255
 Precocious puberty (PP), 9, 118, 134, 152, 166
 Prepontine cistern, 105
 Primitive neuroectodermal tumor (PNET), 214–215
 Pronathism, 184
 Prosencephaly, 162
 Psychomotor retardation, 104, 118, 133, 136, 139, 145–146, 186, 223, 231
 Ptosis, 146
 Pulmonary stenosis, 184
 Pupillary reactions, impairment of, 163
 Pyramidal signs, 118, 134, 140
 Pyramidal syndrome, 185
 Quadrigeminal cistern, 105, 132, 163, 165–166
 Radiation therapy, 213–215
 Radiography, skull, 186
 Radioimmunoassay, 254
 Radiolabeled human iodinated serum albumin (RHISA), 41
 Rathke's cleft cysts, 120, 170
 Respiratory problems, 185
 Retrocerebellar cysts, *see* Arachnoid cysts, retrocerebellar
 Rhinencephaly, 184
 Sclerosis, tuberous, 171
 Sebaceous cysts, 217
 Seizures, 144–147, 161, 163–164, 170, 174, 178, 203, 255
 Sexual conduct, inappropriate, 105
 Silver techniques, 1–2
 Sinography, 186
 Skull fracture, growing, 201–205
 Spongioblasts, 1
 Starling fluid flux equation, 79
 Stenosis, aqueductal, 184, 196, 233
 Stereotaxy, 95, 123–124, 166, 173, 213
 Strabismus, 118
 Subarachnoid pouches, 56, 129, 164
 Subarachnoid space (SAS), 19, 23–24, 28, 30–31, 38–41, 44–46, 48, 50, 53–55, 58–59, 63–64, 68, 70, 79, 81–83, 101–102, 120–121, 130, 138, 143, 162, 166, 177, 196, 201, 205
 Sylvan fissure, cistern of, 105, 113
 Sylvius, scissura of, 143, 160
 Symptomatic cysts, 87
 Syringomyelia, 184
 Tancocytes, ependymal, 3, 11
 Temporal lobe agenesis syndrome, 58
 Tentorial notch, 165
 Teratoma, 171, 221
 Torkildsen procedure, 165
 Tuberculomas, 251
 Turner's syndrome, 184
 Ultrasonography, 103, 116, 121, 124, 146, 165, 173
 Urea, 255
 Vasculitis, 228–229, 250–251, 254
 Ventricular asymmetries, 224, 226, 235
 Ventricular compartmentalization, 227–230
 Ventricular septal defect, 184
 Ventriculitis, 223, 226–227, 237
 Ventriculoatrial shunt, 137, 166, 238
 Ventriculocystostomy, percutaneous, 125
 Ventriculography, 119–120, 135, 170, 186, 214, 251
 air, 226
 CT, 186, 234
 Ventriculomegaly, 173, 223
 Ventriculoperitoneal (VP) shunt, 137, 139, 166, 196–197, 238
 Ventriculoscopy, 173, 178, 228
 Visual acuity, 118–119, 162, 166
 Visual impairment, 117, 119
 Volpe's ischemic cascade, 238
 Vomiting, 163, 170, 175, 201, 207
 Walker-Warburg syndrome, 184
 Wandering eyes, 162
 World Health Organization (WHO) classification, 217–218
 Xanthogranuloma, 170
