

## Subject Index

- ABC persistence curves 109, 110  
AC 12008 metabolism by algae, bacteria, and yeasts 31 ff.  
Acaricide residues, biological significance (see also specific compounds) 101 ff.  
Acaricides, qualities necessary to evaluate 102  
Acceptable daily intake 76, 78  
Acetaldehyde, minimum interval, Poland 9  
Agriculture in Poland 2 ff.  
Aldrin, effect on oysters and mussels 23  
——— effect on plankton 19  
——— from dieldrin in soil 31  
——— metabolism by microorganisms 29  
——— minimum interval, Poland 8  
——— tolerance, Poland 12  
Alewives, DDT in 25  
Algae (see specific compounds, effects on) 16, 18, 21, 22, 24, 25, 31, 33  
Almonds 82  
Ametryne photolysis 64  
Amiben photochemistry 57  
——— photolysis 52  
Amidithion in Czechoslovakia 77  
Apples 10, 11, 77, 80, 81  
Aquatic environment, entry of pesticides into 16, 17  
——— environment, pesticides detected in 17  
——— environment, sources of pesticides in 17  
——— microorganisms and pesticides 15 ff.  
——— microorganisms, definition 15, 16  
——— microorganisms, toxicity of pesticides to 17 ff.  
Aramite 128, 129, 131  
——— residues, biological significance 111 ff.  
——— residues, half-life 130  
——— residues, location in citrus fruit 130  
——— residues on and in lemons and oranges 111, 112  
——— residues vs. mite toxicity 112  
ASP-51, effect on plankton 19  
Atrazine metabolism by bacteria 33 ff.  
——— photolysis 64  
Azinphos ethyl, effect on *Daphnia* 22  
——— methyl, effect on bacteria 22  
Azodrin 128, 131  
——— residues and mite toxicity 127, 128  
——— residues, biological significance 126 ff.  
——— residues, half-life 130  
——— residues, location in citrus fruit 130  
——— residues on and in oranges 128  
Bacon, MGK 264 in 88-90  
——— piperonyl butoxide in 88-90  
——— pyrethrins in 88-90  
Barban, minimum interval, Poland 9  
Barley 81  
Bayer 37344, effect on plankton 19  
Bay leaves 82  
Baytex, effect on plankton 20  
Beef tallow, DDT in 80  
Beets 2, 3, 10, 77  
Berries, see specific kinds  
BHC, effect on bacteria 22, 23  
——— in Poland, prohibition 6  
——— minimum interval, Poland 8  
——— persistence in soils 27, 35  
——— tolerance, Poland 12  
Biological significance of acaricide residues (see also specific compounds) 101 ff.  
Biphenyl, see Diphenyl  
Bond dissociation energies for solvents 53, 54  
Brazil nuts, MGK 264 in 88-90  
——— nuts, piperonyl butoxide in 88, 90  
——— nuts, pyrethrins in 88, 90  
Bread 81  
Bromacil photolysis 68  
Bromophenol photolysis 52

- Bromoxynil photochemistry 63  
Brussels sprouts 80
- Cabbages 10, 11, 77, 80  
Capsicum 80, 81  
Captan, effect on plankton 22  
—— in Czechoslovakia 77  
—— minimum interval, Poland 9  
—— tolerance, Poland 12  
Caraway seed 82  
Carbaryl, effect on *Daphnia* 22  
—— effect on plankton 19, 21  
—— minimum interval, Poland 8  
—— tolerance, Poland 12  
Carbophenothion 116, 129  
—— residues, biological significance 114 ff.  
—— residues, half-life 130  
—— residues, location in citrus fruit 130  
—— residues on and in lemons and oranges 115  
—— residues vs. mite toxicity 116  
Cauliflower 80  
CEPC metabolism by bacteria 33 ff.  
Cherries 10, 11, 77, 79, 80  
Chickens, piperonyl butoxide in 93 ff.  
—— pyrethrins in 93 ff.  
Chinomethionat, minimum interval, Poland 9  
—— tolerance, Poland 12  
Chlordane, effect on plankton 19  
—— persistence in soils 27  
Chlorfenson, minimum interval, Poland 8  
—— tolerance, Poland 12  
Chlorfenvinfos, minimum interval, Poland 8  
Chlorinated benzoic acids, photochemistry 60 ff.  
—— phenylacetic acids, photochemistry 61 ff.  
Chlorine, photochemical loss from aromatic systems 48 ff., 55 ff.  
Chlorkamphen, minimum interval, Poland 8  
—— tolerance, Poland 12  
Chlorobenzilate 131  
—— residues, biological significance 113 ff.  
—— residues, half-life 130  
—— residues, location in citrus fruit 130  
—— residues vs. mite toxicity 114  
Chlorobenzoic acid photolysis 50, 51, 53
- Chloronitropane, effect on plankton 21  
Chloroxuron photolysis 66  
Chub, DDT in 25  
Cinerins 92 ff.  
Cinnamon 82  
CIPC metabolism by bacteria 33 ff.  
—— photolysis 68  
Citrus foliage and fruit, residues on 101 ff.  
Clams 23  
Clover 77  
Cocoa 78  
*Codex alimentarius* 79  
Codfish, piperonyl butoxide in 89  
—— pyrethrins in 89  
Coffee and beans 78, 81  
Copper, accumulation by algae 26  
—— effect on bacteria 23, 24  
—— minimum interval, Poland 9  
—— tolerance, Czechoslovakia 77  
—— tolerance, Poland 12  
Corn 78  
Cucumbers 11  
Currants 10  
Czechoslovakia, pesticide consumption 2  
—— residue problems 75 ff.  
—— The Methodical Manual of Plant Protection 76 ff.  
—— tolerances 75 ff.
- 2,4-D, effect on *Daphnia* 22  
—— effect on plankton 19  
—— metabolism by bacteria 33 ff.  
—— metabolism in aqueous vs. soil environments 17  
—— minimum interval, Poland 9  
—— photochemistry 61 ff.  
Dacthal, effect on plankton 19  
Dalapon, effect on plankton 19  
—— metabolism by actinomycetes, bacteria, and fungi 33 ff.  
*Daphnia*, effects of pesticides on 21, 22, 35  
2,4-DB metabolism by bacteria 33 ff.  
—— photolysis 62  
DDA 29  
DDD, see TDE  
DDE 27, 29  
—— in amphipods 25  
—— in butter, Czechoslovakia 80  
—— in yeasts 27  
DDT 83  
—— accumulation by algae 25  
—— accumulation by bacteria and fungi 25

- accumulation by protozoa 25
- accumulation in plant detritus 17
- and algae 18 ff.
- and plankton 18 ff.
- degradation by porphyrins 30
- effect on bacteria 22
- effect on clams 23
- effect on crustaceae 23
- effect on *Daphnia* 22, 35
- effect on photosynthesis by plankton 20
- effect on plankton 19, 21, 36
- in alewives 25
- in amphipods 25
- in beef tallow, Czechoslovakia 80
- in chub 25
- in diatoms 26
- in ducks 25
- in fish 25, 26
- in gulls 26
- in meals, Czechoslovakia 79
- in milk and butter, Czechoslovakia 79, 80
- in plankton 26
- in Poland, prohibition 6
- in porpoises 26
- metabolism by bacteria 28, 32
- metabolism by fungi and actinomycetes 30
- metabolism by marine organisms 27 ff.
- metabolism by microorganisms 29
- metabolism by plankton 30
- metabolism by yeasts 27
- metabolism in soil 28, 29
- minimum interval, Czechoslovakia 79
- minimum interval, Poland 8
- persistence in soils 27, 35
- reductive dechlorination by organisms 28
- residues in Czechoslovakia 79
- tolerance, Czechoslovakia 77
- tolerance, Poland 12
- vs. PCB's, confusion of identity 37
- DEF, effect on plankton 19
- Delicia 78, 81, 82
- Delnav, see Dioxathion
- Demeton 114, 116
  - distribution in leaves 128
  - effect on plankton 20
- Demeton-methyl, minimum interval, Poland 8
  - -methyl, tolerance, Poland 12
- Diatoms 16
- Diazinon, effect on algae 24
  - effect on *Daphnia* 22
  - effect on plankton 20
  - metabolism by bacteria 32
- Dibrom, effect on plankton 19
- Dicamba photolysis 60
- Dichlobenil, effect on *Daphnia* 22
  - photochemistry 61
  - photolysis 54, 55
- Dichlofluanid, minimum interval, Poland 9
  - tolerance, Poland 12
- Dichlorfos metabolism by bacteria 32, 33
  - minimum interval, Poland 8
  - residues in Czechoslovakia 80
  - tolerance, Czechoslovakia 77
  - tolerance, Poland 12
- Dichlorobenzoic acids, photolysis 56
- Dicofol 29, 126, 129
  - residues, biological significance 119 ff.
  - residues, half-life 130
  - residues, location in citrus fruit 130
  - residues on and in lemons and oranges 119
  - residues vs. mite toxicity 119
- Dieldrin, accumulation by bacteria and fungi 25
  - effect on bacteria 22
  - effect on clams and spot 23
  - effect on *Daphnia* 22
  - effect on plankton 19
  - in plankton 26
  - metabolism by bacteria 32
  - metabolism by fungi and actinomycetes 30, 31
  - metabolism by microorganisms 29
  - minimum interval, Poland 8
  - persistence in soils 27, 35
  - tolerance, Poland 12
- Dimefox metabolism by algae, bacteria, and yeasts 31 ff.
- Dimethoate, minimum interval, Poland 8
  - tolerance, Poland 12
- Dinitrobutyl-phenylacetate, minimum interval, Poland 9
- Dinitrothiocyanbenzene, tolerance, Poland 12

- Dinocap, minimum interval, Poland 9  
 ——— tolerance, Poland 12  
 Dioxathion 126, 129, 131  
 ——— residues, biological significance 116 ff.  
 ——— residues, half-life 130  
 ——— residues, location in citrus fruit 130  
 ——— residues on and in lemons and oranges 117  
 ——— residues vs. mite toxicity 118  
 Diphenyl tolerance, Czechoslovakia 78  
 Dipterex, see Trichlorfon  
 Diquat, absorption by aquatic vegetation 24  
 ——— effect on plankton 19, 21  
 Disulfoton, minimum interval, Poland 8  
 Di-Syston, effect on plankton 19  
 Diuron, effect on *Daphnia* 22  
 ——— effect on plankton 19, 21  
 ——— metabolism by bacteria 33 ff.  
 ——— photolysis 65  
 DMDT minimum interval, Poland 8  
 DN-111 104  
 DNCK tolerance, Poland 12  
 Dodine minimum interval, Poland 9  
 ——— tolerance, Poland 12  
 Dowacide A, effect on plankton 21  
 Drift 17  
 Ducks, DDT in 25  
 Dursban photolysis 59  
 Dyrene, effect on plankton 20  
  
 Effective residues 102  
 Eggs, piperonyl butoxide in 93 ff.  
 ——— pyrethrins in 93 ff.  
 Endosulfan, minimum interval, Poland 8  
 Endothall, absorption by aquatic vegetation 24  
 Endrin, effect on *Daphnia* 22  
 ——— effect on plankton 19  
 ——— metabolism by microorganisms 29  
 ——— persistence in soils 35  
 Environmental contamination 16 ff.  
 EPN 128, 131  
 ——— residues, biological significance 106 ff.  
 ——— residues, half-life 130  
 ——— residues, location in citrus fruit 130  
 ——— residues on and in oranges 107  
 ——— residues vs. mite toxicity 107  
 Eptam, effect on plankton 19  
  
 Eubacteria 16  
*Euglena*, effect of parathion 22  
  
 Fenac, effect on *Daphnia* 22  
 ——— photolysis 61  
 Fenitrothion, metabolism by bacteria 31–33  
 ——— minimum interval, Poland 9  
 ——— residues in Czechoslovakia 80  
 ——— tolerance, Czechoslovakia 77  
 ——— tolerance, Poland 12  
 Fenthion, metabolism by bacteria 32, 33  
 ——— minimum interval, Poland 9  
 Fentin acetate, minimum interval, Poland 9  
 Fenuron, effect on plankton 19, 21  
 ——— metabolism by bacteria 33 ff.  
 ——— photolysis 65  
 Ferbam, effect on plankton 20  
 Fish (see also specific kinds) 25, 26  
 Flash photolysis 52  
 Flax 2, 3  
 Flora and fauna, action on pesticides 17, 27 ff.  
 Flour 78, 81, 82  
 Fluoranthene 51  
 Folpet in Czechoslovakia 77  
 Formothion in Czechoslovakia 77  
 ——— minimum interval, Poland 9  
 ——— tolerance, Poland 12  
 Fruit vs. leaf deposits and residues 122  
 Fungi 16  
  
 German Federal Republic, pesticide consumption 2  
 Gooseberries 10  
 Grain, pyrethrins in 92, 93  
 Grapes 11, 77  
 Great Britain, pesticide consumption 2  
 Gulls, DDT in 26  
 Guthion, effect on bacteria 23  
  
 Half-lives of residues (see also specific compounds) 105, 122  
 Hay 6  
 Heptachlor, effect on *Daphnia* 22  
 ——— effect on plankton 19  
 ——— epoxide metabolism by microorganisms 29  
 ——— metabolism by microorganisms 29  
 ——— residues, Czechoslovakia 76  
 Herbicide metabolism 33 ff.  
 Herbicides, photochemistry 45 ff.  
 Hops 2, 3, 10, 11

- Hydran, effect on plankton 19  
 Hydrogen cyanide residues in Czechoslovakia 81, 82  
 ——— cyanide tolerance, Czechoslovakia 78  
 Hydrogen phosphide residues in Czechoslovakia 81, 82  
 ——— phosphide tolerance, Czechoslovakia 78
- Imidan, effect on plankton 20  
 Iodobenzene photolysis 50  
 Iodobenzoic acid photolysis 50  
 Iodobiphenyl photolysis 57  
 Ioxynil photochemistry 63  
 IPC photolysis 67
- Kelthane, see Dicofof  
 Kepone, effect on plankton 19  
 Kohlrabi 11  
 Kuron, effect on plankton 20  
 Kurosai SL, effect on plankton 19
- Lead arsenate, persistence in soils 27  
 Lemons (see also specific pesticides) 78, 111 ff.  
 Lettuce 11, 80  
 Light absorption process 48 ff.  
 Lignasan, effect on plankton 21  
 Lindane 83  
 ——— effect on algae 21, 22, 24  
 ——— effect on *Daphnia* 22  
 ——— effect on plankton 19, 21  
 ——— isomers, degradation in soil 31  
 ——— metabolism by algae 31  
 ——— metabolism by bacteria 31, 32  
 ——— metabolism by microorganisms 29  
 ——— tolerance, Czechoslovakia 77  
 ——— tolerance, Poland 12  
 Linuron photolysis 66  
 Lipid contents of microorganisms 37  
 Lucerne 77
- Malathion, effect on *Daphnia* 22  
 ——— effect on oysters and mussels 23  
 ——— effect on plankton 20  
 ——— metabolism by bacteria 32  
 ——— minimum interval, Poland 9  
 ——— residues in Czechoslovakia 80  
 ——— tolerance, Czechoslovakia 77, 78  
 ——— tolerance, Poland 12  
 Maneb, minimum interval, Poland 9  
 ——— tolerance, Poland 12
- Mangel 11  
 Margarine, MGK 264 in 88–90  
 ——— piperonyl butoxide in 88–90  
 ——— pyrethrins in 88–90  
 Marjoram 82  
 MCP amine, effect on plankton 19  
 MCPA, minimum interval, Poland 9  
 Mercury residues, Czechoslovakia 76  
 Meta, see Acetaldehyde  
 Metasystox, effect on bacteria 23  
 ——— effect on plankton 21  
 Methoxychlor, effect on plankton 19  
 ——— minimum interval, Poland 8  
 ——— tolerance, Poland 12  
 Methyl bromide residues in Czechoslovakia 82  
 ——— bromide tolerance, Czechoslovakia 78  
 Methyl demeton, see Demeton-methyl  
 Methyl parathion, effect on bacteria 22  
 ——— parathion, effect on plankton 21  
 ——— parathion, metabolism by bacteria 32, 33  
 ——— parathion, minimum interval, Poland 9  
 ——— parathion, tolerance, Poland 12  
 Methyl Trithion, effect on plankton 19  
 Metiram, minimum interval, Poland 9  
 Metobromuron photolysis 66  
 Mevinphos residues in Czechoslovakia 80  
 ——— tolerance, Czechoslovakia 77  
 MGK 264 residues 88 ff.  
 Microorganisms, see also Aquatic microorganisms  
 ——— dimensions 36  
 ——— known to metabolize pesticides 28  
 ——— lipid contents 37  
 ——— surface areas and adsorption 36  
 Milk 6, 79, 80  
 Mirex, effect on plankton 19  
 Monuron, effect on plankton 19, 21  
 ——— metabolism by bacteria 33 ff.  
 ——— photolysis 65–67  
 Morello 77  
 Morestan 129, 131  
 ——— residues, biological significance 125  
 ——— residues, location in citrus fruit 130  
 ——— residues on and in lemons and oranges 124

- residues, removal by washing 125
- residues, half-life 125, 130
- residues vs. mite toxicity 124
- Mushrooms 11, 78, 82
- Mussels 23
- Myxo-bacteria 16
  
- Nabam, effect on plankton 21, 22
- Neburon, effect on plankton 19, 21
  - photolysis 65
- Neotran 129, 130
  - residues, biological significance 104 ff.
  - residues, half-life 130
  - residues, location in citrus fruit 130
  - residues on and in oranges 150
  - residues vs. mite toxicity 105
- N-Serve, effect on plankton 19
  
- Omite residues, biological significance 125 ff.
  - residues, half-life 130
  - residues, location in citrus fruit 130
  - residues on and in oranges 126
  - residues vs. mite toxicity 126
- Onions 10, 11
- Oranges (see also specific pesticides) 104 ff.
- Organochlorine pesticide metabolism 27 ff.
- Organophosphorus pesticide metabolism 31 ff.
- Orthodichlorobenzene, effect on plankton 21
- Ovex 129
  - residues, biological significance 109 ff.
  - residues, half-life 130
  - residues, location in citrus fruit 130
  - residues on and in lemons 110
  - residues vs. mite toxicity 110
- OW-9 compounds 126, 130
  - compounds, biological significance 122 ff.
  - compounds residues, half-life 130
  - compounds residues, location in citrus fruits 130
  - compounds residues on and in oranges 123
  - compounds residues vs. mite toxicity 123
  
- Oxygen, role in photochemistry 56 ff.
- Oysters 23
  
- Paraquat, effect on plankton 19
- Parathion, accumulation by algae 25
  - accumulation by protozoa 25
  - effect on bacteria 22, 23
  - effect on *Euglena* 22
  - metabolism by algae, bacteria, and yeasts 31 ff., 33
  - persistence in soils 27
- PCB's in the environment 37
- PCNB, accumulation by microorganisms 25
  - metabolism by fungi and actinomycetes 30
- PCP, see Pentachlorophenol
- Peanuts 78, 81, 82
- Pears 10, 11, 77, 80, 81
- Peas 82
- Pentachlorophenol photochemistry 64 ff.
- Pepper 82
- Pesticide runoff 16
- Pesticides, action on flora and fauna (see also specific compounds) 17 ff.
  - and aquatic microorganisms 15 ff.
  - and plankton 15 ff.
  - effects on photosynthesis (see also specific compounds) 17
  - removal from water by organisms 24
  - use in Poland 2 ff.
- Phaltan, effect on plankton 20
- Phenol, effect on plankton 21
- Phenylnaphthalenes, photolysis 50
- Phorate metabolism by algae, bacteria, and yeasts 31 ff.
- Phormothion in Czechoslovakia 77
- Phosphine, see Hydrogen phosphide
- Phostoxin 78, 81
- Photochemical mechanisms 48 ff.
  - reactions 48 ff.
- Photochemistry of herbicides 20, 47 ff., 60 ff.
- Photolysis and electronic effects 56
- Photosynthesis, effects of pesticides on (see also specific compounds) 17, 61
- Photosynthetic decouplers 69
- Picloram metabolites 59
  - photochemistry 58 ff.
- Piperonyl butoxide in foods 88 ff.

- butoxide tolerance, Czechoslovakia 78  
 Plankton and pesticides 15 ff.  
 — definition 15, 16  
 — effects of pesticides on (see also specific compounds) 18 ff.  
 Plums 10, 11, 77, 80  
 Poland, chief pests and diseases 3 ff.  
 — documentation required for use of pesticides 5 ff.  
 — minimum intervals 4, 6 ff.  
 — "Official Bulletin" 4  
 — pesticide consumption 2  
 — pesticide research 7 ff.  
 — residue control 12  
 — residue problems and regulations 1 ff.  
 — The Food Act 7  
 — The Plant Protection Act 7  
 — The Poison Act 7  
 — tolerances 6 ff.  
 — trade legislation 5  
 Polish agriculture, structure of 2 ff.  
 Poppy seed 81, 82  
 Porpoises 26  
 Potatoes 2, 3, 10, 11, 89, 91  
 — and chips, pyrethrins in 89, 91  
 — and chips, piperonyl butoxide in 89, 91, 92  
 Practical residue limits 79  
 Propanil photolysis 68  
 Protozoa 16  
 Proxopur, minimum interval, Poland 9  
 Prunes 10  
 PVP-iodine, effect on plankton 21  
 Pybuthrine 78  
 Pyrenone 96  
 Pyrethrins 87 ff.  
 — effect on *Daphnia* 22  
 — synergists, residues in foods 87 ff.  
 — terminal residues in foods 87 ff.  
 — tolerance, Czechoslovakia 78  
 Pyridine photolysis 59  
  
 Radishes 10, 11  
 Rape seed 2, 3, 81, 82  
 Raspberries 10  
 Rats 93  
 Red pepper 82  
 Residue half-lives (see also specific compounds) 105  
 — regulation in Poland 1 ff.  
 Rice 63, 78, 82  
  
 Ronnel, effect on plankton 19  
 — metabolism by algae, bacteria, and yeasts 31 ff.  
 Rye 81  
  
 Schradan metabolism by algae, bacteria, and yeasts 31 ff.  
 Seeds, see specific kinds  
 Silvex, effect on *Daphnia* 22  
 — effect on plankton 19, 21  
 — photolysis 62  
 Simazine, effect on plankton 21  
 — metabolism by bacteria 33 ff.  
 — photolysis 64, 65  
 Simateone photolysis 64, 65  
 Slime molds 16  
 Sodium arsenite, effect on *Daphnia* 22  
 — arsenite, effect on plankton 21  
 Soils, persistence of insecticides in 27  
 Solan photolysis 68  
 Solar energy, wavelength limit 48  
 Spices 78, 82  
 Spirochetes 16  
 Strawberries 10, 80  
 Sugar beets 2, 3, 10, 11, 76  
 Sulfur residues, Czechoslovakia 76  
 — tolerance, Poland 12  
 Sumithion, see Fenitrothion  
 Sunflower seed 81, 82  
 Surface areas of microorganisms 36  
 Synergists, see Pyrethrins and Piperonyl butoxide  
  
 2,4,5-T, effect on plankton 19  
 — metabolism by bacteria 33 ff.  
 — photolysis 62  
 2,3,6-TBA photolysis 55, 56, 60  
 TCA metabolism by bacteria 33 ff.  
 TDE 28  
 — in amphipods 25  
 — in yeasts 27  
 — metabolism by microorganisms 29  
 Tedion, see Tetradifon  
 TEPP, effect on plankton 21  
 Tetradifon 129, 131  
 — minimum interval, Poland 9  
 — residues, biological significance 121 ff.  
 — residues, half-life 130  
 — residues, location in citrus fruit 130  
 — residues on and in lemons and oranges 120-122  
 — residues, removal by washing 121

- residues, solvent removal 122
- residues vs. mite toxicity 121
- tolerance, Poland 12
- Tetram 128, 131
  - residues, biological significance 107 ff.
  - residues, half-life 130
  - residues, location in citrus fruit 130
  - residues on and in oranges 108
  - residues vs. mite toxicity 108
- Thiocyan-dinitrobenzene, minimum interval, Poland 9
- Thiodan, effect on plankton 19
- Thiomethon, minimum interval, Poland 9
  - tolerance, Czechoslovakia 77
  - tolerance, Poland 12
- Thiram, see TMTD
- Tillam, effect on plankton 19
- TMTD in Poland, prohibition 6
  - minimum interval, Poland 8
  - residues, Czechoslovakia 76
  - tolerance, Poland 12
- Tobacco 2, 3
- Tolerances, Czechoslovakia 75 ff.
  - Poland 6 ff.
- Tomatoes 10, 80, 81
- Tordon, effect on *Daphnia* 21
  - effect on plankton 19
- Toxaphene, effect on *Daphnia* 22
  - effect on oysters and mussels 23
- effect on plankton 19–21
- persistence in soils 27
- Triazines, photochemistry 64 ff.
- Trichlorfon, effect on plankton 21, 23
  - minimum interval, Poland 9
  - residues in Czechoslovakia 80
  - tolerance, Czechoslovakia 77
  - tolerance, Poland 12
- Trichlorobenzoic acid photolysis 55, 56
- Trichloropyridinol photolysis 59
- Trifluran, effect on *Daphnia* 22
- Trithion, see Carbophenothion
- Turnips 10, 80
- Urea herbicides, photochemistry 65 ff.
- Vernam, effect on plankton 19
- Wheat 2, 3, 59, 81, 82
  - pyrethrins and cinerins in 92, 93
- Whitefish, DDT in 25
- Yeasts 16
  - DDT in 27
  - lipid content 37
  - surface area 36
- Zineb, minimum interval, Poland 9
  - residues in Czechoslovakia 81
  - tolerance, Czechoslovakia 77
  - tolerance, Poland 12
- Zytron, effect on plankton 19
