
Index

- acetylcholine 1-3
 release of 3-4; responses of
 cultured neurones to 246-9;
 uptake in cultured neurones
 243-4
- acetylcholine receptor
 mixed type 26; muscarinic 20-6
 distinction between M₁ and M₂
 23; drug specificity 20-6;
 structure of 22
- nicotinic 4, 8-20
 drug sensitivity of 11-18; effects
 of toxins on 263; genetics of
 19-20; immunological
 properties of 10-11; location
 of 8-9; on cultured neurones
 247, 249; structure of 9-11
- acetylcholinesterase (AChE) 6-8
 see also cholinesterase,
 pseudocholinesterase,
 butyrylcholinesterase isoenzymes
 of 7
- aconitine 258-9
- adenylate cyclase 20-1, 145, 147-50
- adipokinetic hormone *see* AKH
- AKH 185-7, 211, 215
- γ-aminobutyric acid (GABA) 90-2
 in cultured neurones 244-6;
 responses of cultured neurones
 to 249; synthesis of 93-9;
 uptake systems 101-5
- γ-aminobutyric acid receptor 105-13
 bicuculline sensitivity of 107-8;
 interaction with pesticides
 113-14; on cultured neurones
 109
- 4-aminobutyrate-2-oxoglutarate
 transaminase (GABA-T) 99-101
- anatoxin-a 15
- apamin 260
- aromatic amino acid decarboxylase
 136-8
- bag cell peptide (BCP) 195-7, 213
- batrachotoxin 258-9
- BCP *see* bag cell peptide
- benzodiazepine receptors 110-11
- biogenic amines 124-6
 see also monoamines
 quantitative measurement of
 129-31
- black widow spider venom 272-5
 crustacean specific factors 296-8
- botulinum toxin 4
- Bracon* venom 265-7
 purification of toxins 266-7
- obungarotoxin (BGT) 13-17, 247,
 263
- βbungarotoxin 261-2
- butyrylcholinesterase (BuChE) 6
 see also cholinesterase,
 acetylcholinesterase,
 pseudocholinesterase
- CAAT boxes 198
- cage convulsants 111
- calcium channel toxins 260-1
- calmodulin 21, 147, 155
- catecholamines *see* monoamines
- catechol-O-methyl transferase
 (COMT) 139-41
- charatoxin 17
- charybdotoxin 260
- choline 8
 uptake in cultured neurones 243-4
- choline acetyltransferase (ChAT) 4-5
 antibodies to 5
- cholinesterase (ChE) 5-8
 see also acetylcholinesterase,
 pseudocholinesterase,
 butyrylcholinesterase
- ciguatoxin 260
- COMT *see* catechol-O-methyl
 transferase
- conotoxins 263-2
- crotoxin 261-2
- crustacean hyperglycaemic hormone
 (CHH) 212
- cyclic AMP 147-50, 154-6, 211-12
- cyclic GMP 150-1, 212
- DARPP *see* dopamine and adenosine
 3';5'-monophosphate-regulated
 phosphorylation
- dendrotoxin 4

INDEX

- L-dopa 135-5
dopamine 134-8
 stimulation of adenylate cyclase
 148-9
dopamine and adenosine
 3':5'-monophosphate-regulated
 phosphorylation (DARPP) 160-1
- egg laying hormone *see* ELH
ELH (egg laying hormone) 193-8,
213
 genetic aspects 194-8
enkephalins 191
- FMR Famide 187, 211-12, 213
 genetic aspects 199-200
- G-proteins 20-1
 see also acetylcholine receptor
 muscarinic
CABA *see* α -aminobutyric acid
GABA-T *see*
 4-aminobutyrate-2-oxoglutarate
 transaminase
GAD *see* glutamate decarboxylase
glutamate 42-3
 in subcellular fractions 55-6, 63;
 localisation of uptake 53-4;
 release of 57-65; synthesis of
 44-8; uptake 48-58
glutamate decarboxylase (GAD) 94-9
 invertebrate-vertebrate
 comparisons 97-8; purification
 of 94-6
glutamate receptors 65-77
 classification of 67; desensitisation
 of 76-7; effects of toxins 264-5;
 in central nervous system 68-70;
 in muscle 70-7; sub-populations
 of 73-4
guanylate cyclase 150-1
- haemocytes
 glutamate content of 49
haemolymph
 glutamate content of 49-50
histrionicotoxin (HTX) 11-12, 17
Hydra head activating peptide 190-1
- inositol triphosphate 151-3, 213
insulin 188, 210-11
- latrotoxin 262-3, 274-5
- maitotoxin 260-1
MAO *see* monoamine oxidase
N-methyl-D-aspartate (NMDA) 73,
75
monoamine oxidase 139-42
monoamines
 biosynthesis of 133-9; effects of
 reserpine 132; inactivation of
 139-42; storage and release of
 131-2; synaptic location 127-9;
 uptake systems 139
MRCH (melanisation and reddish
 colouration hormone) 189
- nemertine venoms 300-4
nereistoxin 17
neuromodulators 126-7
neuronal cell culture
 of *Aplysia californica* 232-3; of
 Drosophila 228-30; electrical
 properties of cells 235-8; of
 Helisoma trivolvis 230; of
 Hirudo medicinalis 230-2;
 neurite outgrowth 233-5; of
 Periplaneta americana 228-30;
 synapse formation 239-43
neuronal growth factors 233-5
neuropeptidases 214-15
neuropeptides 176-7
 assay of 201-3; co-localisation with
 other transmitters 208-9; effects
 on cyclic AMP 211-12; families
 of 185-7; immunochemistry of
 205-6; inactivation of 214-15;
 localisation of 203-5; receptors
 for 209-11; sequencing of
 178-85
neurotoxins
 species selectivity 306-8; *see also*
 individual toxins
nicotine 15-17
NMDA *see* N-methyl-D-aspartate
notexin 261-2
- octopamine 133-7
 receptor sites 144, 148-50;
 stimulation of adenylate cyclase
 147-8; stimulation of protein
 phosphorylation 161
opioid peptides 210-11
- pertussis toxin 152

- philanthotoxin 76, 270-2
Philanthus venom 267-72
 phosphatidyl inositol 20-1, 147, 151-3
 stimulated hydrolysis of 147
 phosphodiesterase 20-1
 phospholipase A₂ toxins 261-3
 photoreceptors 152-3
 picrotoxin receptor 111
 potassium channel toxins 260
 proctolin 191-2, 208-9, 211, 215
 protein kinase C 159
 protein kinases 147
 Ca⁺⁺/calmodulin dependent
 157-8; cyclic AMP dependent
 153-6; cyclic GMP dependent
 156-7
 prothoracicotrophic hormone *see*
 PTTH
 pseudocholinesterase 6
 see also acetylcholinesterase,
 cholinesterase
 PTTH (prothoracicotrophic hormone)
 189-90

 scorpion toxins 259-60, 276-7, 284-5
 chactoid group 283-4, 294-6;
 crustacean specific 291-4;
 depressant 282-3; excitatory
 277-82
 mode of action 280-2
 target site for 286-90
 sea anemone toxins 259-60
 crustacean specific factors 298-300
 second messengers 144-6, 211-13
 serotonin 138-9
 in cultured neurones 241, 244;
 receptors for 144; responses of
 cultured neurones to 249-51;
 stimulation of adenylate cyclase
 148
 sodium channel toxins 257-60
 spider toxins 76
 see also black widow spider venom
 synapsin 154, 157-8, 160
 synaptosomes 3-4, 8, 64, 104-5, 132

 taipoxin 261-2
 TATA boxes 198
 tetrodotoxin (TTX) 257-8
 tyramine 134-7
 tyramine β hydroxylase 138

 veratridine 258-9
 VIP 191, 192
