

## INDEX

- Alytesin, 52  
Amino acid sequence of  
    peptides, 135  
Amphibian skin peptides, 51-64  
APUD concept, 28
- Bombesin, 42  
    cell localization, 16  
    effect on gastrin release,  
        319-323  
    and glucagon release, 259-261  
Bombesin-like peptides, 52-59  
Brain-gut peptides, 3, 7,  
    263-267
- Caerulein-like peptides, 61-62  
Candidate peptides, 23-26  
Carcinoids, 15  
Cellular localization of  
    peptides, 6, 11-22, 33  
Chagas' disease, 45  
Chemistry of intestinal  
    peptides, 133-146  
Cholecystokinin (CCK), 41  
    trophic effect on pancreas,  
        147-150  
Cholecystokinin-like peptides  
    in brain and gut, 263-267  
Cimetidine  
    use in Zollinger-Ellison  
        syndrome, 111-116  
Diarrheogenic syndromes,  
    285-295, 195-202  
    VIP and, 195-202
- Eledoisin, 59  
Endocrine cells of gi tract, 11-22  
    D cell, 17  
    L cell, 18  
    Lausanne 1977 classification, 33  
    N cell, 19  
    P cell, 16  
    Varese 1977 classification, 12  
    VL cell, 20  
Endorphin, 43  
Enkephalin, 43  
Enteropancreatic axis, 151-163
- G cells  
    in duodenal ulcer, 97-104  
    and parietal cells, 65-68  
Gastric inhibitory peptide (GIP),  
    157, 169-171  
    and small bowel, 105-110  
Gastrin, 75-84  
    big gastrin, 76  
    big, big gastrin, 78  
    biological activity, 85-89  
    clearance, 85-89  
    component I gastrin, 78  
    little gastrin, 76  
    minigastrin, 77  
    N-terminal fragment of gastrin, 78  
    in peptic ulcer, 91-96  
    release in dog, 207-210  
    and small bowel, 105-110  
Gastrinoma, 15  
    calcitonin in, 117  
    insulin in, 117  
    parathyroid hormone in, 117

- Gastrointestinal hormones  
 amino acid sequence of, 135  
 candidate peptides, 23-26  
 cellular localization, 6,  
 11-22, 12, 33  
 chemistry of, 133-146  
 overview, 1-4  
 sequence similarities of, 137
- Glucagon, 155  
 gastric, 173-181  
 release by bombesin, 259-261
- Glucagon-like immunoreactivity  
 cell localization, 18
- Hirschsprung's disease, 45
- Histamine H<sub>2</sub>-receptors, 69-74
- History of digestive  
 endocrinology, 5-10
- Insulin, 157  
 in gastrinoma, 117
- Kassinin, 59
- Litorin, 52
- Lower esophageal sphincter,  
 121-131  
 effect of gi hormones on, 125
- Motilin, 241-257  
 in brain and gut, 269-283
- Neurotensin, 40  
 cell localization, 19
- Pancreatic polypeptide, 152
- Pancreatic secretion,  
 role of vagus in, 211-216
- Pancreozymin  
 trophic effect on pancreas,  
 147-150
- Peptic ulcer  
 G cells in, 97-104  
 and gastrins, 91-96
- Peptidergic innervation,  
 27-49
- Phyllocaerulein, 61
- Phyllomedusin, 59
- Physalaemin-like peptides, 59-60
- Prostaglandins  
 in diarrheogenic syndromes,  
 285-295  
 effects on secretion and  
 motility, 297-307
- Ranatensin, 52
- Secretin radioimmunoassay, 309-316
- Secretin release, 203-205, 207-210  
 effect of atropine, 217-220  
 effect of bile, 221-226  
 role of vagus, 211-216
- Serotonin  
 in diarrheogenic syndromes,  
 285-295
- Small bowel  
 and gastrin, 105-110  
 and GIP, 105-110
- Somatostatin, 34-36  
 in brain and gut, 269-283  
 cell localization, 17  
 effect on secretion and motility  
 227-234  
 inhibitory effect of, on stomach  
 235-240
- Substance P, 41-42, 59  
 in brain and gut, 269-283
- Tachykinins, 59
- Tumours of gut endocrine cells, 15
- Uperolein, 59
- Vasoactive intestinal peptide (VIP)  
 36-39  
 radioimmunoassay of, 317-318  
 and watery diarrhoea syndrome,
- Watery diarrhoea syndrome, 195-202
- Zollinger-Ellison syndrome  
 use of cimetidine in, 111-116
