

Index

- Bochner spaces, 12
- Brouwer fixed point theorem, 26
- Bundle method, 209
 - ε -steepest descent method, 213
 - bundle-Newton, 217, 223
 - conjugate subgradient, 212
 - cutting plane, 212
 - diagonal variable metric, 214
 - general, 209
 - generalized cutting plane, 213
 - level, 216
 - proximal, 220
 - tilted, 215
 - translated, 215
 - variable metric, 214
- Carathéodory conditions, 23
- Cea's lemma, 49
- Conditionally stable, 68
- Convex
 - function, 18
 - set, 18
- Crank-Nicolson scheme, 66
- Delamination, 90
- Differentiable
 - Fréchet, 18
 - Gâteaux, 18
 - continuously, 18
 - strictly, 18
- Dunford-Pettis theorem, 5
- Effective domain, 19
- Egoroff's theorem, 6
- Elliptic problems
 - inequality of the first kind, 27
 - inequality of the second kind, 28
 - linear equation, 27
- Evolution triplet, 16
- Explicit scheme, 66
- Fatou's lemma, 6
- Finite element method, 68
- Friction
 - Coulomb friction, 89
 - nonmonotone friction, 90
 - given friction, 36
- Fully discrete approximations, 66
- Galerkin method, 49
- Generalized derivative, 7, 15
- Generalized directional derivative, 20
- Generalized gradient, 20
- Green's formula, 12
- Hemivariational inequality, 93
 - elliptic scalar type constrained, 139
 - elliptic scalar type unconstrained, 105
 - elliptic vector-valued constrained, 157
 - elliptic vector-valued unconstrained, 152
 - hyperbolic, 192
 - parabolic scalar type constrained, 196
 - parabolic scalar type unconstrained, 164
- Imbedding theorems, 9
- Implicit scheme, 66
- Indicator function, 19
- Inverse inequality, 67, 71
- Kakutani fixed point theorem, 26
- Korn's inequality
 - first, 12
 - second, 11
- Lagrange interpolate
 - piecewise constant, 122
 - piecewise linear, 70
- Lax-Milgram theorem, 27
- Lebesgue spaces, 5
- Linear elasticity
 - constitutive law, 86
 - strain tensor, 11, 33
 - stress tensor, 33, 86
 - stress vector, 87
- Linear operator
 - V-elliptic, 27
 - bounded, 27
 - symmetric, 28
- Lipschitz
 - locally Lipschitz function, 20
 - Lipschitz boundary, 7

- Lipschitz function, 4
- Load vector, 48
- Mass matrix, 56
- Mazur's lemma, 6
- Nonlinear operator
 - bounded, 47
 - coercive, 47
 - demicontinuous, 47
 - locally Lipschitz, 37
 - monotone, 46
 - strongly monotone, 37
- Normal cone, 19
- Optimality conditions, 24
- Parabolic problems
 - inequality of the first kind, 40
 - inequality of the second kind, 40
 - linear equation, 39
- Poincaré-Friedrichs inequality, 10
- Potential operator, 37
- Potential, 38
- Rellich's theorem, 10
- Ritz method, 49
- Ritz projection, 60
- Semidiscrete approximation, 55
- Set-valued mapping
 - coercive, 26
 - upper semicontinuous, 22
- Signorini problem, 35
 - Signorini-Fichera conditions, 35
- Sobolev spaces, 6
- Standard Galerkin method, 55
- Stiffness matrix, 48
- Subdifferential, 19
- Subgradient locality measure, 220
- Subgradient method, 207
 - basic, 208
 - variable metric, 208
- Subgradient, 19
- Substationary point, 24
- Trace mapping, 8
- Trace theorem, 8
- Triangulation, 69
 - consistent, 69
 - degrees of freedom, 70
 - element, 70
 - regular, 69
 - strongly regular, 69
- Unconditionally stable, 68
- Unilateral problem, 34, 88
- Upper semismooth, 223
