

# Index

- Abstract geometric surface, 157
- Additive identity, 19
- Additive inverse, 19
- Additivity of angular defect, 77
- Adjoining a number to a field, 257
- Alternate interior angles theorem, 31
- Angle, 13, 163
  - between two half-planes, 134
  - interior of, 11
- Angle of parallelism, 69, 81, 97
  - construction of, 265
  - formula for, 190
- Angle sum of a triangle, 48
- Angular defect, 76, 120
  - bounds on, 114
  - of a circular sector, 123
  - of a polygon, 78
- Angular excess, 17
- Archimedean property of a field, 22
- Arclength
  - along a circular arc, 123
  - along a general curve, 153
  - along a horocycle, 98
- Area, 170
- Area and angular defect, 114
- Associativity, 19
- Astronomical parallax, 118
- Asymptotic, 70
- Asymptotic bundle, 139
- Asymptotic pencil, 69
- Asymptotic pencil of lines, 76
- Asymptotic planes, 140, 239
- Axioms for 2-dimensional
  - hyperbolic space, 2
  - categoricalness, 207
  - consistency, 207
- Axioms for 3-dimensional
  - hyperbolic space, 129
- Axioms for a complete ordered
  - field, 22
- Axioms for an ordered field, 18
- Axioms for the space of constructible figures, 280
- Beltrami, 4
- Beltrami–Klein ball model, 238
- Beltrami–Klein disk model, 211
- Boost, 251
- Bounds on angular defects, 120
- Calculus of variations, 159
- Cancellation, law of, 19
- Cantor, Georg
  - continuum hypothesis, 28
- Categorical, 3
- Categoricalness of the axioms of a complete ordered field, 23
- Categoricalness of the hyperbolic axioms, 3–4, 207–208
- Cauchy sequence model of the real number system, 27
- Charts, 232
- Christoffel symbols
  - of the first kind, 167
  - of the second kind, 167
- Circle
  - area of, 195
  - circumference of, 195
- Common perpendicular
  - of ultraparallel lines, 88
  - of ultraparallel planes, 141
- Commutativity, 19
- Compatible charts, 232
- Complete ordered field, 22
- Completeness axiom, 22
- Completion of a field, 27
- Complex number, 3
- Congruence of quadrilaterals, 51
- Congruence of triangles, 41
- Congruent segments, angles, 14

- Consistency of the hyperbolic axioms, 202, 207
- Consistent, 3
- Construction by straightedge and compass, 254
  - initial configuration for, 255
  - necessary condition for, 264
  - of regular polygons, 275
  - sufficient condition for, 274
- Continuum, 2
- Continuum hypothesis, 28
- Contravariant vector, 181
- Coordinate chart, 151
  - compatible charts, 232
- Coordinates
  - curvilinear, 150
  - line, 11
  - surface, 171
- Cotangent vectors, 182
- Criteria for congruence of triangles
  - right angle-side-side, 46
  - side-angle-angle, 42
  - side-angle-side, 14, 130
  - side-side-side, 41
- Crossbar Theorem, 35
- Curvature constant, 16
- Curvilinear coordinates, 150, 171
  
- Decimal model of  $\mathbb{R}$ , 25
- Dedekind cut, 24
- Dedekind cut model of the real number system, 27
- Degenerate triangle, 112
- Degenerate vertex, 78
- degree, 257
- Differentiable surfaces, 176
- Directed line, 11
- Discrete point set, 112
- Distance, 10
- Distance from a point to a line, 35
- Distributivity, 19
  
- Electromagnetic field, 242
- Elliptic geometry, 17
- Elliptic modular function, 231
- Embedding of Klein bottle in 4-space, 234
- Equidistant, 103, 223
  - equation of, 195, 197
- Equivalence of polygons by triangulation, 114–115
- Erlanger Program of Klein, 101
- Euclid, 30
- Euclidean fine structure of the
  - hyperbolic plane, 128, 144
- Euclidean geometry of the horosphere, 144, 237
- Euclidean parallel axiom, 15
- Extension of a field
  - algebraic, 257
  - degree of, 257
  - finite algebraic, 257
  - primitive element of, 257
- Exterior Angle Theorem, 38
  
- Fermat number, 275
- Fermat prime
  - in connection with Gauss' Theorem, 275
- Field
  - algebraic extension, 257
  - complete ordered, 22
  - ordered, 18
  - quadratic-surd, 257
- Fixed point, 221
- Four-vector potential, 244
- Fractional linear transformation, 205, 218
- Frame of reference, 252
  
- Gödel's incompleteness theorem, 28
- Galilean transformation, 243
- Gauss' Theorem on construction of regular polygons, 275
- Gauss, C. F., construction of complex numbers, 3
- Gaussian curvature, 187
- Gaussian total curvature of a surface, 172
- Geodesic, 155, 203
  - equation for, 159, 168
  - in 2-dimensional hyperbolic space (equation), 162
  - in 3-dimensional hyperbolic space, 235
  - initial-value problem, 168–169
  - null, 240
  - spacelike, 240
  - timelike, 240
  - two-point boundary problem, 168
  - two-point value problem, 169
- Glide reflection, 96
- Group
  - general linear  $GL(n, \mathbb{R})$ , 219
  - isometry, 59
  - Lorentz, 246
  - Poincaré, 246

- simple, 224
- $SL(2, \mathbb{R})$ , 219
- $SL(2, \mathbb{Z})$ , 228
- special linear  $SL(n, \mathbb{R})$ , 219
- Hamilton, W. R., construction of
  - complex numbers, 3
- Hilbert's fifth problem, 6
- Hilbert, David, reworking of
  - Euclidean geometry, 1
- Homeomorphism, 177
- Horocompass, 276
- Horocycle, 97
- Horosphere, 142, 236
  - Euclidean geometry of, 146, 237
- Hyperbolic parallel axiom, 15
- Hyperbolic space
  - 3-dimensional, 128, 232
- Ideal points at infinity, 83–84
- Ideal rotation (parallel displacement), 92, 95, 222
- Identification of points (in a manifold), 233–234
