

Index

■ A

- Android PackAge (APK), 126
- Adaptive Multi-Rate (AMR), 31
- Algorithmic effects, 56
 - Amplify effect, 56
 - Delay effect, 61
 - Equalization effect, 59
 - Low Pass Filter effect, 62
 - Notch Filter effect, 63
 - Pitch Shifting effect, 57
 - Reverb effect, 60
 - Speed effect, 58
- Aligning tracks
 - Align selection, 88–89
 - Envelope Tool, 91
 - multiple tracks, 88
 - text field, 89–90
- Align tracks feature, 88
- Amplify effect, 56
- Analog audio
 - amplitude, 7–8
 - resilient membranes, 6
 - wave cycle, 7
- Android
 - home appliances, 137
 - ROBOT, 137
 - VR, 137
- Android studio
 - AudioTrack class, 127–128
 - MediaPlayer class, 128–129
 - MediaRecorder class, 129–130
 - SoundPool Class, 126–127
- Apple iPhone and iPad, 137
- Audacity
 - audio transport controls, 24
 - menu sequence, 25
 - monitoring, 23
 - record button, 24
- Audacity Analyze menu, 65
 - Regular Interval Labels, 65
 - Sample Data Export, 67
- Audacity software
 - audacityteam.org, 1
 - audio file formats, 4
 - default installation options, 3
 - Finish button, 4
 - GNU licensing information, 3
 - installation, 4
 - LAME 3.99.3 and FFmpeg 2.2.2
 - libraries, 6
 - language selection, 2
 - operating system link, 5
 - plug-ins and sound libraries, 4
- Audacity synthesizer
 - Fire Explosion generator, 100–101
 - harmonic noise, 103–104
 - KLSTRBAS generator, 101–102
 - Oxygene Surf generator, 96
 - Pluck generator, 104–105
 - Track generator, 98
 - Tuning Fork generator, 99–100
 - virtual surf waveforms, 97
- Audio buffer, 128
- Audio Coding AAC-LC,
 - AAC-ELD/HE-AAC, 31
- Audio optimization
 - AIFF file format, 109
 - baseline PCM file, 108–110
 - device compatibility, 107
 - Edit Metadata dialog, 110
 - FLAC audio format, 111
 - MPEG3 audio format, 112–113
 - MPEG4 AMR format, 114–115

Audio optimization (*cont.*)

- MPEG4 audio format, 113–114
- ogg audio format, 112
- spanning 4 KB to 400 KB, 116
- Stereo Track menu, 109
- WMA audio format, 115–116
- work process, 108

<audio> tag, 125

AudioTrack class, 127–128

Automobile dashboard, 135–136

■ **B**

Binary data, 20

■ **C**

Consumer electronics genres, 131

■ **D**

Data footprint optimization, 107

Data formats

- compression, 27
- digital audio codec, 27
- file (*see* File formats)

Data sampling

- Audacity, 23
- digital audio, 19–20
- frequency, 21–22
- frequency and resolution, 19
- mathematics, 23
- resolution, 20–21
- sampler hardware and libraries, 23

DataSource object, 129

Delay effect, 61

Device compatibility, 107

Device memory, 108

Digital audio, 8

Digital audio content delivery platforms

- Android studio, 125
- HTML5 content, 125
- javafx.scene.media Library, 123

Dragging tracks, 87

■ **E**

e-Book readers, 134

Electronic Publishing (EPUB)

specification, 133

Equalization (EQ) effect, 59

Exporting lossless audio

FLAC audio format, 111

MPEG3 audio format, 112–113

MPEG4 AMR format, 114–115

MPEG4 audio format, 113–114

Ogg Vorbis audio format, 112

spanning 4 KB to 400 KB, 116–117

WMA audio format, 115–116

■ **F**

File formats

- AMR, 31
- FLAC, 30
- MIDI file, 29
- MPEG-3, 29–30
- MPEG-4, 31
- Ogg Vorbis format, 30
- PCM codecs, 32

Fire and Explosion generator, 100–101

Free Lossless Audio Codec (FLAC), 30

■ **G**

Game consoles, 136

■ **H**

Harmonic noise generator, 103–104

HyperText Markup Language (HTML), 132

■ **I**

Interactive television (iTV) set, 134–135

Isolated chirps, 47

remove artifacts, 49

scrubbing

- fit selection, 48
- level meters, 48
- silence audio icon, 48

Vocal Reduction and Isolation, 50

- cut settings, 51
- effect menu, 50
- FLAC format, 52
- sample waveforms, 52
- sci-fi-sound, 52

■ **J**

javafx.scene.media library, 123

AudioClip class, 123–124

AudioEqualizer class, 124

AudioTrack class, 124

■ **K**

KLSTRBAS generator, 101–102

■ **L**

Label tracks

- edit labels menu sequence, 77–78
- subsample selection set, 78
- text label subsample selection, 77

LISP command syntax, 122

Low Pass Filter effect, 62

■ **M**

Media overlay documents, 133

MediaPlayer class, 128–129

MediaRecorder class, 129–130

Memory footprint, 108

Mono tracks, 82

- conversion algorithm, 82–83
- function, 85
- label track, 84
- re-arrange menu, 85
- resample menu option, 84
- sampling frequency, 84–85
- sort tracks sub menu, 85
- Stereo Track data, 83

Musical Instrument Data Interface (MIDI), 15

- Android, HTML5, and Java, 17
- audio synthesis, 16–17
- data formats, 15
- digital audio, 16
- MID, XMF and MXMF, 29
- playback hardware, 17
- sampling keyboard, 16

myMediaPlayer object, 128

■ **N**

Noise removal

- algorithmic processing, 33
- background noise, 33
- CH3.aud project file, 33
- definition, 33
- Effect menu, 34–35
- FLAC, 37–38
- noise profile button, 35
- play icon, 36
- remove, 36

sharpness, 37

vertical bar icon, 34

waveform deselect, 36

Notch Filter effect, 63

Nyquist generate plug-ins

- download page, 93
- folder, 94
- generate menu, 95
- manage menu, 95

Nyquist programming

- batch processing language, 119
- integrated editor, 120–122
- NyquistIDE, 122
- overview, 119
- SourceForge.net repository, 120

■ **O**

Ogg Vorbis audio format, 112

Ogg Vorbis format, 30

Oxygene Surf generator, 96

menu sequence, 97

play button, 97

Stereo track, 96

■ **P, Q**

Pitch shifting effect, 57

Plot Spectrum tool, 69

Autocorrelation algorithm, 74

Cepstrum algorithm, 74

Fast Fourier analysis, 73

Notch Filter, 70

snippet, 72

subsample analysis, 71

Pluck generator, 104–105

Portable Document

Format (PDF), 132

Pulse-Code Modulation (PCM), 32

Pulse wave, 8

■ **R**

Randomized waveforms, 8

Resolution, 20

Reverb effect, 60

Rosegarden, 11

data file, 14

empty project, 13

fundamentals, 11

music notation features, 15

Rosegarden (*cont.*)
 scoring engine, 14
 welcome screen, 12
 xyglo.com, 12

■ **S**

SAL programming
 language, 122
Sampling digital audio, 19
Sampling frequency, 9, 21
Saw wave, 8
Scrubbing, 47
Sine wave, 8
Smartwatch, 135
SoundPool Class, 126–127
Sound wave
 analog audio, 6
