

# Index

## ■ A

- Activation process, windows, 60–64
- Active Directory–based activation, 62
- Automated Installation Kit (AIK), 13, 17
- Automating Deployment
  - clients, 136
  - distribution points, 134
  - installation process, 135
  - logs, 135
  - MDT functionality
    - Configure ConfigMgr Integration application, 127
    - Create MDT Task Sequence, 128–129
    - customsettings.ini file, 131
    - Deployment Method, 130
    - SCCM/MDT task sequence, 130
- OSD
  - configuration, 125
  - MDT and WDS, 124
  - PXE support, 125–126
- SCCM
  - clients installation, 122–123
  - components, 120
  - site system servers, 121
  - task sequences, 136

## ■ B

- Basic Input/Output System (BIOS), 34
- Boot and system partitions, 42–45
- Boot Configuration Data (BCD), 2
  - BCDEdit.exe, 4
  - BIOS-based systems, 3
  - components, 2
  - EFI, 3
  - HAL, 6

- Ntldr process, 2
  - startup and recovery, 4
  - system configuration utility, 4
  - third-party tools, 4
  - WMI, 4

Bring Your Own Device (BYOD), 167

## ■ C

- Cabinet (.cab) files, 7
- Certificate of authenticity (COA), 85
- Choose Your Own Device (CYOD), 167
- Current Branch for Business (CBB), 83, 148

## ■ D

- Deployment Image Servicing and Management (DISM), 1, 7, 18
- Deployment Shares, 107
- Device management
  - Windows 10
    - CBB, 148–149
    - Current Branch, 148
    - Insider program, 148
    - long-term servicing branch, 150
    - service model, 147
  - Windows Update
    - Control Panel, 142
    - services, 146
    - Windows 10, 144–145
- WSUS
  - client configuration, 157, 163
  - computer groups, 155, 164
  - detection process, 162
  - Group Policy settings, 157, 159
  - HFNetChk, 151
  - hierarchy configuration, 154

## ■ INDEX

Device management (*cont.*)  
  infrastructure, 152  
  Installation process, 153  
  reporting, 165  
  services, 163  
  source of, updates, 161  
  updates *vs.* upgrades, 139, 141  
  WiFi connection settings, 163  
disk management, 43  
DiskPart, 12  
Distribution point (DP), 125

## ■ E

Electronic Software Download (ESD), 79  
Enterprise Mobility Suite (EMS), 168  
Extensible Firmware Interface (EFI), 3

## ■ F

Floppy disks, 1

## ■ G

Globally Unique Identifier (GUID), 44  
Graphical User Interface (GUI), 10, 12  
Group Policy Object (GPO), 182

## ■ H

Hardware abstraction layer (HAL), 6  
Hyper-V, 56–58, 60

## ■ I, J

Image-based setup (IBS), 7  
ImageX, 12  
Imaging and Configuration Designer (ICD)  
  customization, 19, 22  
  MDT, 19  
  online and offline images, 19  
  provisioning package  
    creation, 19–20  
    digitally signed catalog file, 22  
    installation, 22  
    .ppkg file, 22  
    scenarios, 20  
  SCCM, 19  
Independent software vendors (ISVs), 27  
Information center, 107

## ■ K

Key Management Service (KMS) key, 61

## ■ L

Linux/MAC, 51, 53  
Long-Term Servicing Branch (LTSB), 85

## ■ M, N

Media Creation Tool (MCT), 71  
Microsoft Baseline Security Analyzer  
  (MBSA), 151  
Microsoft Deployment Toolkit  
  (MDT), 17, 19, 107  
Microsoft Intune  
  configuring  
    agent settings, 179  
    automatic approval rules, 176  
    default groups, 177  
    EXE, 176  
    MSI, 176  
    MSP, 176  
    update classifications, 175, 178, 179  
  creation  
    adding users, 172  
    assign role, 173  
    computer management, 169  
    Microsoft\_Intune\_Setup.exe, 174  
    tenant subscription, 170  
  features, 168  
  integration, 168  
  troubleshooting, service status, 182  
Microsoft license keys, 61  
Microsoft volume licensing program, 62  
Multi-Booting Windows, 45–46, 48, 50  
Multiple activation key (MAKs), 62

## ■ O

Operating System Deployment (OSD), 123  
Original equipment  
  manufacturer (OEM), 61  
Out-of-box-experience (OOBE), 80, 93

## ■ P, Q

PowerShell, 13

■ **R**

Retail license key, 61

■ **S**

Security Identifier (SID), 12  
 System center configuration manager (SCCM), 17, 19, 85, 119  
 System image manager (SIM), 91  
 System preparation tool (Sysprep), 1, 10

■ **T, U**

Thied-party migration tools (Paid), 41  
 Third-party dual-boot tools, 50  
 Troubleshooting activation, 65–66  
 Troubleshooting process  
     BitLocker Drive Encryption, 87  
     device, 85  
     policy settings, 87  
     reliability monitor screen, 86  
     setuperr.log, 87  
 Trusted Platform Modules (TPM), 81

■ **V**

Virtual hard disk (VHD), 53–55  
 Volume licensing service center (VLSC), 30

■ **W, X, Y, Z**

WDS  
     clients, 116  
     device drivers, 115  
     DISM  
         boot images, 102  
         DHCP settings, 105–106  
         install images, 103  
         install WDS server, 98  
         NTFS permissions, 106  
         PXE response settings, 101  
         WIM file, 97  
         WinPE, 97  
     gold image, 90  
     iceberg, 116  
     iterative testing, 117  
     MDT  
         add applications, 112  
         BDD.log, 113

    bootstrap.ini, 114  
     customsettings.ini, 113  
     Deployment Workbench, 107–108  
     edit task sequences, 111  
     new task sequences, 108–109  
     packages, 112  
     update Deployment Share, 112  
 OOBE, 93  
     reference computer, 92  
     Sysprep tool, 93, 116  
     virtual machine, 91  
     Windows Activation, 114  
     Windows SIM, 94  
 Windows Assessment and Deployment Kit (ADK), 7, 13–15, 17–18, 20, 40  
 Windows Assessment Toolkit, 23  
 Windows Automated Installation Kit (AIK), 7, 14  
 Windows Boot Loader identifier (GUID), 45  
 Windows Deployment Services (WDS), 90  
 Windows image format (WIM), 1, 7, 29, 79  
 Windows installation  
     BCD, 2  
         BCDEdit.exe, 4  
         BIOS-based systems, 3  
         components, 2  
         EFI, 3  
         HAL, 6  
         Ntldr process, 2  
         startup and recovery, 4  
         system configuration utility, 4  
         third-party tools, 4  
         WMI, 4  
     cloud installation, floppy disk to, 1  
     tools  
         ADK, 13  
         DiskPart, 12  
         DISM, 19
