A

Advanced Find views

- columns, add, 211
- filter, 208–209
- grouping, 209
- limitations, 214
- look up records, 208
- member subscription, 207
- saved view, 212
- target users, 213

Automating business processes

actions

- arguments, 125–128
- creation, 124
- definition, 123

business process flows

- application review process, 110
- creation, 111
- data fields, 113
- definition, 110
- designer window, 112
- enabling entity, 112
- unified interface, 115
- workflow, 114

check conditions, 122

Microsoft flow

- creation, 130
- definition, 129

Dynamics 365 Settings, 129

external database, 133

scenarios, 129

triggers and connectors, 131

Twilio connection, 132

workflows

- check conditions, 122
- condition configuration, 119–120
- creation, 117
- definition, 115
- membership registration, 116
- properties, 118, 121

Auto Number Manager

configuration window, 81–83

definition, 79

Event entity setting, 84

XrmToolBox, 80

Azure Active Directory (AAD), 157

Azure app service, 167

Azure DevOps, 4–5

Azure functions, 174–175

CORS, 181

creation

app, 176

Azure subscription, 179

HTTP trigger, 177

properties, 178

templates, 177

testing, 180

INDEX

Azure functions (*cont.*)

- JavaScript file, 180, 184
 - OnChange event, 184
 - plugin registration tool, 184
 - webhook, 185–186, 188
- Azure key vault, 162
- Azure logic apps, 16, 46
- CSV table, 196
 - dynamic content, 197
 - dynamic expressions, 199
 - Microsoft flow, 189–190
 - project deployment, 201–203
 - project selection, 191
 - properties window, 193
 - template, 192
 - Visual Studio, 189
 - workflow, 200
- Azure webJobs, 13–14, 46
- access layer, 162–164
 - business logic, 165–167
 - connection string, 162
 - creation (*see* WebJobs creation)
 - file types, 158
 - subscription creation, 159–161

B

Base solution, creation

- entity metadata, 55
- existing entities, 51
- new entities, 52–53
- new solutions, 49–50
- primary field, entity, 55–56
- publisher, 47–49

Business Intelligence

- Development Studio, 228

Business process flows, 110

C

- callCustomAction function, 155
- Chart wizard, 226
- Clone solution, 43
- Common Data Service, 2, 248
- CRM projects, 30
- CrmSvcUtil.exe tool, 135
- Cross-origin resource sharing (CORS), 181
- Custom actions, JavaScript, 154, 156
- Customer engagement, 1

D

Dashboards

- Advanced Find view, 239
- components, 237
- layout, 236
- views and charts, 235
- visual representation, 235

Data export services, 253

Data migration

- import wizard
 - data management section, 284
 - file upload, 286
 - limitations, 289
 - mapping fields, 288
 - member accounts, 282–283
 - progress, 288
 - select data map, 286
 - select record type, 287

SSIS

- connection manager, 291
- data flow, 299–307
- destination, configuration, 294–296
- error handling, 296, 298–299
- source, configuration, 292–294
- strategy, 279–281

- Data validations
 - business rules, 91–96
 - calculated field, set up, 86–87
 - required field, 85
 - rollup fields, 88–91
 - Decision-makers, 205
 - Default solution, 40
 - Development environment
 - account creation, 27
 - organizational scenario, 28–29
 - sign up here option, 25–26
 - trial, 24
 - Direct debit payments
 - Azure logic apps, 16–17
 - CSV file, 16
 - SBMA, 16
 - Dynamics 365 portals
 - access, 255
 - authentication, 260
 - child pages section, 263–264, 267
 - common function, 155
 - configuration, 255–256, 258
 - customization
 - classic interface, 268
 - entity list, 272–273
 - event form, 274–275
 - events list, 274
 - navigation editor, 270–271
 - view details window, 276
 - web page, 269
 - early-bound types
 - generation, 135–136
 - liquid templates, 276
 - menu, 266
 - page settings, 263
 - Power Platform admin center, 256
 - root pages section, 267
 - settings, 259
 - support section, 265
 - technologies, 277
 - web editor, 260–262
 - web forms, 276
 - web site settings, 268
 - Dynamics 365 report wizard
 - columns, add, 218–219
 - filters, 217
 - grouping, 219–221
 - report data, 228
 - report display, 227
 - report format, 222, 224–225
 - summary type, 224–225
- ## E
- Early Bound Generator
 - plugin, 136
 - base class, 139
 - classes, 137
 - execution method, 143
 - image availability, 141
 - membership, 144, 145
 - member subscription, 140
 - payment creation, 138
 - SPKL, 143
 - Entity icons, base solution
 - fundamental properties, 61
 - Lookup More Records, 58
 - lookup search, 57
 - relationship, 59–60, 62
 - update icon, 57
 - Entity model
 - entities, 18–19
 - high-level relationship, 19
 - mapping, Dynamics 365, 20–21

F

- FetchXML, 10, 14, 303
 - reports, 215
 - Dynamics 365 report wizard, 229
 - fetch query, 229
 - parameters, 231–232
 - performance, 234
 - RDL file, 233
 - SBMA, 233
- Fetch XML Builder plugin, 230
- Form customizations
 - cloning base solution, 70
 - editor ribbon, 74–76
 - event form, 78
 - member form, 72–73
 - solution patch, 69–71
 - unified interface, 77–78

G

- Grid filters
 - index filtering, 206

H

- History and evolution, 2

I

- Independent software vendor (ISV), 44
- Interactive dashboards, 240

J, K

- JavaScript
 - definition, 96
 - example, 97–102
 - solution, creation, 97

L

- Liquid templates, 276

M

- Managed solution, 41
- Managed *vs.* unmanaged solutions
 - Azure DevOps release process, 45–46
 - clone solution, 43, 44
 - SBMA, 44
 - solution patches and upgrade, 42–44
- Member registration, 10
 - documents, 12–13
 - Dynamics 365 workflow engine, 10, 11
 - flow designer, 12
 - subscription, 13–14
- Microsoft FastTrack
 - for Dynamics 365, 281–282
- Microsoft Flow, 2, 11, 129
- Microsoft Power BI, 240
- Microsoft Power platform, 2
- Microsoft.Xrm.Tooling.Connector, 161
- Multistream dashboards, 240

N

- NuGet, 29
 - package manager, 33, 62
- Nullfactory Generator, 46

O

- Online *vs.* on-premises Dynamics 365, 23–24

P, Q

- Platform as a service (PaaS), 188
- Plugin event pipeline, 141

- Power BI
 - chart visualizations, 247
 - custom columns, 248–249
 - dashboard, 249–251
 - Dynamics 365
 - connection, 242
