SUBJECT INDEX

- Androgens
 biosynthesis, 178
 busulfan and, 235
 and cryptorchidism, 236
 and estrogen biosynthesis, 163, 184
 and follicular atresia, 182
 and follicular growth, 181
 and progesterone biosynthesis, 183
 role in ovary, 167
 and stress, 222
 testicular descent and, 269
Anti-Müllerian hormone, 269, 281
Arachidonic acid, 135, 148, 159
Arginine vasopressin, see Vasopressin
Arginine vasotocin, 307
 and amniotic membrane, 310
 and fetal bladder, 316
 and fetal skin, 315
Biogenic amines, 71, 99, 113
Calcium, 140, 157
cAMP, see Cyclic AMP
Catecholamines, 71, 99, 113
 brain pathways, 94, 105
 in immunohistochemical studies, 90
 and LH surge, 74
 and pulsatile LH release, 84, 99
 synthesis inhibitors, 74
 and testicular steroidogenesis, 221
 in testis, 222
 turnover, 88
Chorionic mammatropin, see Placental lactogen
Corpus luteum
 and oxytocin, 211
 regression of, 212
Cryptorchidism, 233
Cyclic AMP
 in FSH action, 164, 177
 in GnRH action, 150, 155
Cyclic AMP (continued)
 in LH action, 177, 198, 226, 238
 and oocyte maturation, 198
 and testicular steroidogenesis, 238
Dopamine, see Catecholamines
Estrogens
 action on hypothalamus, 1, 15, 23, 27, 51, 65
 and aromatase, 163, 180
 effects on GABA release, 67
 feedback actions of, 1, 13, 28, 51, 65, 71, 99, 114, 119
 and puberty, 114
 role in ovary, 165, 178
 trophic effects, 1, 7
Feedback regulation
 of GnRH, 23, 27, 42, 51, 65, 71, 99
 short-loop, 41
 vascular basis for, 37
Fetal bladder, 316
Fetal lungs
 and epinephrine, 319
 and prolactin, 321
 and somatostatin, 320
 and vasopressin, 318
 and water metabolism, 318
Fetal maturity
 and cortisol, 332
 and parturition, 331
Fetal neurohypophysis, 303, 305
Fetal skin, 315
Fetal small intestine, 317
Follicle-stimulating hormone
 action in granulosa cells, 163, 177
 and aromatase assay, 170
 effects on ovary, 163, 177
 measurement, 169
 and ovarian peptides, 167
 and ovarian steroids, 165
FSH, see Follicle-stimulating hormone

- GABA, see Gamma-aminobutyric acid
- Gamma-aminobutyric acid
 effects of estrogen, 67
 and GnRH release, 65
- GnRH, see Gonadotropin-releasing hormone
- GnRH precursor, 127
 and gonadotropin secretion, 128
 post-translational processing of, 131
- Gonadal steroids, 1, 13, 23, 27, 37, 51, 65, 71, 99, 113, 163, 177, 211, 221, 233, 273
 control of synaptogenesis, 13, 15
 and gonadotropin secretion, 23, 27, 51, 65, 71, 99, 113
 trophic effects of, 1
- Gonadotropin-releasing hormone and arachidonic acid, 135, 155
 and calcium, 140, 155
 electrophysiology, 23
 GABA and, 65
 gene expression, 4, 127
 mechanism of action, 135, 155
 and phosphoinositide metabolism, 116, 121, 144, 155
 and phospholipase A₂, 148, 155
 and phospholipase C, 144, 155
 precursor of, 127
 and protein kinase C, 121, 135
 and puberty, 116
 pulse generator, 23, 99
 secretion of, 23, 27, 37, 51, 71, 99, 116, 119, 127
 ultrashort loop feedback, 58
- Gonadotropins
 biogenic amines and, 71, 99, 113
 catecholamines and, 74, 99, 113
 effects on ovary, 163
 inhibition by norepinephrine, 100
 and luteolysis, 211
 neurotensin and, 57
 norepinephrine and, 71, 99
 and puberty, 115
 pulsatile release of, 84, 99
 role of opioids, 52
 sauvagine and, 57
 serotonin and, 79
 stimulation by non-GnRH peptides, 127
 stimulation by norepinephrine, 71, 100
 and testicular blood flow, 243
- Granulosa cells
 differentiation, 164
 FSH action in, 163, 177
 and oocyte maturation, 197
- Growth hormone, 291, 294
- Gubernaculum, 261
- hCG, see Human chorionic gonadotropin
- Hemicastration, 221, 228
- Human chorionic gonadotropin
 and testicular blood flow, 243
 and testicular microcirculation, 255
 and testicular vascular permeability, 248
- 5-Hydroxytryptamine, see Serotonin
- Inhibin, 32
- Leydig cells
 adrenergic receptors in, 223, 225, 228
 androgen production in, 221, 236
 primary culture of, 223
- LH, see Gonadotropins
- LHRH, see Gonadotropin-releasing hormone
- Lordosis, 2
- Luteinizing hormone, see Gonadotropins
- Luteinizing hormone-releasing hormone, see Gonadotropin-releasing hormone
- Müllerian inhibiting factor, see Anti-Müllerian hormone
- Neuropeptide Y, 93, 118
- Neurotensin, 57
- Norepinephrine, see Catecholamines
- Oocyte maturation, 197
- Opioids
 and gonadotropin secretion, 52
 receptors in brain, 54
- Ovary, 117, 163, 177, 197, 211
 development and puberty, 117
 differentiation, 274
 response to FSH, 163, 177
 steroid biosynthesis in, 163, 177, 211
- Oxytocin
 in corpus luteum, 211
 in fetal neurohypophysis, 305
 and luteolysis, 211
 mechanism of action, 212
- Parturition, 331
 in birds, 334, 344
 in humans, 338, 346
 in marsupials, 336, 345
 maternal control of, 339
 in monotremes, 336, 344
 in sheep, 333, 340
- Phospholipase A₂, 148, 155

Phospholipase C, 144, 155
 Placental lactogen, 289
 control of, 294
 genetic expression, 291
 in human, 294
 mechanism of action, 299
 in rat, 290
 Progesterone
 biosynthesis, 181
 on estrogen biosynthesis, 186
 and follicular growth, 185
 Prolactin
 and amniotic membrane, 313
 gene structure, 292
 Proliferin, 290
 Prostaglandins
 and GnRH secretion, 116, 120
 and oxytocin, 213
 Protein kinase C
 in GnRH action, 135, 157
 and GnRH secretion, 116, 120
 Puberty, 113
 estrogens and, 114
 and ovarian development, 117

 Sauvagine, 57
 Seminiferous tubules, 244
 Serotonin, 79
 Sertoli cells, 274, 282
 Sex differentiation, 273
 anti-Mullerian hormone and, 281
 genetic factors of, 275
 of genital tract, 278
 gonadal, 273
 Sexual dimorphism, 13
 Spermatogenesis, 233, 277

 Testis
 blood flow, 224, 243
 catecholamine effects on, 221
 descent of, 261
 differentiation, 274
 microcirculation in, 243, 255
 spermatogenesis in, 233
 steroidogenesis in, 221, 236,
 243
 vascular permeability in, 243,
 248
 Testosterone, see Androgens

 Vasopressin
 and amniotic membrane, 310
 and fetal bladder, 316
 and fetal lungs, 318
 in fetal neurohypophysis, 305
 and fetal skin, 315
 and fetal small intestine, 317

 Water metabolism
 and amniotic membrane, 310
 in fetal bladder, 316
 Water metabolism (continued)
 in fetal lungs, 318
 and fetal skin, 315
 in fetal small intestine, 317
