

# Index

0-1 model, 9  
1-dimensional cutting stock problem, 414  
1st Model, 116  
2-dimensional cutting stock problem at MMC, 423  
2nd Model, 118  
    decision making problems in, 438  
    Gilmore-Gomory approach for, 420  
    normal strips, 424  
    solution procedure using 1-D SHP, 426  
    tangential strips, 424, 425

## A

Adjacency of Indian States, 47  
    0-1 Model for, 50  
    algorithm for, 49, 50  
Aircraft fundamentals, 358  
Allocating patients to PCPs, 97  
    classification of patients, 98  
    data for, 98  
    equalizing workloads, 97  
    objective function in, 101  
    real-time algorithm for, 102  
Allocation of operating room time to departments, 485  
Anand Pattern, 63  
Appointment scheduling to patients, 103  
    DSS for, 108  
    real-time algorithm for, 102  
Approach for modeling, 214  
Arriving container dispatching policy, 12

## B

Batteries powering forklifts, 466  
Blood and its components, 434  
Blood bank Inventory management, 432, 438, 441

Blood banks, 430  
    decision making problems in operation of, 438, 467  
    flow of blood units in, 438  
Blood collection, 435, 436  
Blood collection policies, 438, 447  
Blood demand characteristics, 444  
Blood groups, 433  
Blood supply variables, 458

## C

Central Police forces (CPF), 40, 55  
Compact model for scheduling, 524  
Comparison with MINLP, 178  
Component separation & storage, 436  
Components in surgical procedures, 480, 483  
Computational experiments, 330, 510  
Container  
    Export (EC), 3, 5  
    External Truck (ET), 3  
    FEU, 3  
    Import (IC), 4  
    Internal Truck (IT), 4  
    quota number, 11  
    shipping, 3  
    TEU, 3  
Contest problems set up by AIMMS/MOFTA, 491  
    its solution, 491  
Crane, 3, 4  
    Quay (QC), 4  
    shore, 4  
    Yard (YC), 3  
Crude oil refining, 221  
    fractional distillation, 221  
Cutting stock problems, 413  
    1-dimensional, 420

- 2-dimensional, 423
- 2-dimensional based on guillotine cuts, 414
- D**
- Data for example problem, 421
- Decision making problems DMP-1, 469
- Decision making problems DMP-2, 469
- Decision support system (DSS), 7, 210
- Demand for electric power, 337
  - peak power issue in, 337
- Design optimization model, 154
  - computer program prepared, 160
  - factor of safety of a design, 141
  - heuristic algorithm for, 120
- Determining optimal collection & componentizing policies, 442
  - simulation model for, 462
- Discussion of Solutions obtained, 124
  - comparisons, 126
- Drilling rig hiring, 318
- Drilling wells, 319
- Dynamic network flow model, 330, 331, 334
- E**
- Earliest mathematical result of mankind, 2
- Earth dams, 134
  - basic terminology, 138
  - berms and slopes, 138, 140
  - cross section of, 137, 138
  - design parameters in, 135, 138
  - shell, 134
- Edges, 43
- Elective surgeries, 480
- Electricity markets, 167
  - clearing price, 167
- Enlarged Integer Programming model, 527
- Example problem, 192, 375
  - formulation & solution, 376
  - solution found, 193
- Example with sample data, 210
- Experimental analysis with example, 531
- F**
- Factor of safety WRT a slip circle, 141
  - chord based approach for, 149
  - cohesion, 145
  - computation of, 146
  - computer programs prepared, 160
  - driving forces & resistance, 144
  - effect of earthquakes, 146
  - slip circle, 142
  - upstream & downstream factors, 149
- Ferry flow network, 522, 524
- Ferry scheduling problem
  - notation & definitions, 320
  - planning horizon, 517
- Fill-ratio
  - equalization policy, 11
- Fixing surgery dates for patients, 486
- Flight optimization problem, 357
- Flight parameters & variables, 363, 366
- Flight planning for jet aircraft, 374
- Foot ware inventory management (FIMP), 298
  - dynamic version, 299
  - set-up version, 299
- Fuel cost, 19
- Fueling trucks, 19, 20
  - contracting cost, 19
  - utilization of, 26, 31
- Functional relationships, 71
  - between procurement price & volume, 71
  - between sales price & volume, 74
- G**
- General elections in India, 38
- Graph partitioning problem, 47
- Graph, 43
- Greediness criterion, 21
- Greedy method, 20
- Gross crane rate (GCR), 5
  - standard for, 5
- H**
- Hamiltonian path, 47
  - breaking into segments, 48, 49
  - heuristic, 47
  - segment of, 48
  - shortest, 47
- Handling nonconvexity, 189
- Heat transfer & Heat exchangers, 225
  - Heat exchanger networks (HEN), 217, 225
- Helical flight segments
  - selection of, 361–363
  - concatenation of, 362
- HEN design
  - graphical method, 239–247
  - problem, 248, 249
  - solution methodology, 249–256
- High variation in surgery times
  - by surgeon performing, 485
  - by type of surgery, 486, 488
- History of crude oil
  - kerosene lamps, 220
  - oil lamps before crude oil, 219
  - whale oil, 219
- History of dams, 130
  - beaver dams, 131

types of dams, 134  
 History of forklifts, 465, 466  
 History of freight shipping by rail, 391  
 History of medicine, 84  
   19th century, 90  
   20th century, 91  
   middle ages, 89  
   renaissance, 90  
 History of milk products, 61–63  
 History of paper making, 199, 200  
 History of Polling in India, 38  
 Hospital Appointments to patients, 103, 479

**I**

Illustration of greedy algorithm, 26, 401, 404  
 Indian milk cooperatives, 65  
 Initial fuel, 20  
 Input data, 277, 322  
 Issuing & cross-matching, 438

**J**

Jet aircraft propulsion systems, 358, 361

**K**

King Asoka, 36

**L**

Locomotive fueling problem (LFP), 17  
 Locomotive tank capacity, 21, 22, 24, 25

**M**

Managing warehouse storage space, 297–299  
 Mathematical models for DMP-1, 2, 469, 470  
   approaches to solve, 472–474  
   data & solutions obtained, 475, 476  
 Milkman of India, 63  
 MILP model, 169, 177, 178  
 MINLP solver Bonmin, 190  
 MIP model, 20, 28, 29, 31, 32, 410  
 Mission planning of Earth observing satellites, 497  
 Model for wood inventory management  
   constraints in, 207  
   decision variables, 206  
   parameters in, 206  
   objective function in, 209  
   rolling horizon approach for, 214  
 Model formulation, 323  
 Modeling rig intake problem, 320  
   notation & assumptions, 320, 321  
 MMPC, 63  
   data for decision making in, 66  
   decision making in, 68

operating policies of, 64  
 products of, 66  
 sales trend in, 67  
 Modena's water distribution network, 184  
   head loss, 185  
 Multicommodity flow model, 9

**N**

Network  
   adjacency, 47  
   connected, 43, 47, 393  
   undirected, 43, 47  
 Nodes  
   adjacency of, 400, 401  
 Nomenclature, 169, 185

**O**

Occupancy ratio, 10  
 Offshore oil & gas fields  
   categories of layouts for developing, 315  
   decisions to be made, 321  
   operations in development, 317  
   platform development, 315  
   sub-sea development, 315  
 Operating room management  
   decision making problems in 483–485  
 Optimal flight planning, 356  
   hierarchical decomposition of, 357  
 Optimization model, 205, 207, 491  
 Optimum solution, 10, 11, 29, 52, 119, 120, 416

**P**

Paper making process description, 200–203  
   making paper board, 203  
 Partial network, 47, 48  
   induced by subset of nodes, 43  
 Passenger flow network, 522, 524, 526, 528  
 Patient arrival process, 484  
 Pendekal dam example, 151  
   solution of, 157  
 Planning horizon, 18, 64, 168, 171, 207, 523  
 Planning period, 8, 10–12, 205  
 Polling stations, 38–44, 47–49, 52, 54, 55  
 Pooling system, 8, 12  
 Prehistoric medicine, 84  
   Babylon, 85  
   China, 85, 86  
   Egypt, 86  
   Greek & Roman, 86–88  
   India, 88, 89  
   Iran, 89  
 Primary Care Physicians (PCP), 92  
   how patient selects, 93

skill needed, 92  
 specialties, 93  
**Problem**, 41  
   constraints in, 42  
   data in, 42  
   objective function in, 41, 42  
   statement, 41  
**Problem description**, 248, 340, 499  
   3 types of flows, 113  
   constraints in, 186  
   costs, 114  
   data & assumptions, 344  
   decisions to be made, 115  
   linearization of constraints in, 173  
   mathematical model for, 172  
   model, 186  
   outputs desired, 345  
   solar stoves, 112  
**Problem formulation**, 345–348  
**Problem solution & analysis**, 348  
**Process for receiving health services**, 93-96  
**Pumped storage hydro power station**, 168  
   planning problem in, 168

**R**

**Railroad industry terminology**, 392  
**RAS**, 17  
**RAS 2011 Competition problem**, 392  
   description of data in, 396  
**Real-time decision making**, 102  
**Recommendations for real world implementation**, 458  
**Reconstituting milk powder into milk**, 65  
**Refinery HEN problem examples**, 281  
**Refueling**, 20  
   constraint on number of, 19  
   plan, 17  
   set-up cost, 31  
   trucks, 20  
   yards, 22  
**Reshuffling**, 9  
**Route**, 18  
   categories of, 21  
   pairs, 19

**S**

**Scheduling of image acquisition**, 497  
**Scheduling of image downloading (SIDSP)**, 499  
   constraints in, 499  
   construction heuristics, 506  
   ejection chain improvement heuristic, 507

  greedy algorithm for it, 504  
**Scoring method**, 95  
**Sequencing surgeries for a surgeon in a day**, 488  
   scheduling algorithm, 103, 499  
**Sequential Heuristic Procedures (SHP) for 1-D**, 420  
**Smoothing**, 189  
**Solution methods**, 119  
   exact method, 120  
   heuristic algorithms 120  
   summary, 127  
**Solution of FIMP**, 312  
   mathematical formulation, 302  
   notation in, 304  
   of dynamic version, 307–312  
   of set-up version, 305–307  
**Staffing decisions**, 108  
**Steady flight**, 359  
   conditions for, 368  
   constraints, 367  
   description of, 363  
   distance traveled in, 374  
   elapsed time in, 376  
   fuel consumption in, 373  
   minimum fuel consumed in, 375  
   optimality conditions for, 370  
   relationships, 366  
**Storage**, 3, 4  
   block, 4  
   yard (SY), 3–5  
**Storage patterns**, 301  
**Stream matching problem**, 256, 261, 266  
**Strengthening model with clique constraints**, 326  
   valid inequalities, 327  
**Substitute objective function technique**, 13  
   MIP formulation, 268  
**Surgery development in modern times**, 480

**T**

**Traffic congestion**, 7, 356  
**Train design problem**, 392  
   an algorithm for, 395  
   objective function to minimize in, 394  
   other approaches for, 407  
   solution using greedy algorithm, 404  
**Thermal energy storage (TES)**, 339  
**Types of surgeries & Departments performing them**, 483

**V**

**Vessel turnaround time**, 5, 6, 13

**W**

Waypoints, 355, 363

Wood inventory management, 204

    decision making problems in, 205

    direct & indirect feeds, 204

    planning horizon, 204, 207,  
    210

**Y**

Yards

    committed, 20

    destination, 19

    feasible couple of, 24

    intermediate, 18

    origin, 18, 22

    refueling, 22
