

INDEX

A

- Alexa Fluor 647-castasterone (AFCS)108–116
 ARA7(Q69L).....120–121
Arabidopsis thaliana
 growth 9, 10, 21, 33, 37–40, 42,
 65, 102, 103, 110, 112, 157, 193, 203, 209, 211, 215,
 216, 238–240, 247, 271, 276, 277, 279
 seedlings 3, 5–7, 9, 10, 16, 21,
 23–27, 35, 37, 38, 40, 42, 67, 110–115, 157, 193, 195,
 209–211, 239–240, 246, 271, 276–280, 282
 suspension culture cells6, 9, 10, 100–103,
 120, 123, 127, 128, 167, 168, 174

B

- BFA. *See* Brefeldin A (BFA)
 Bimolecular fluorescence complementation
 (BiFC)97–104
 Biomodulators251–263
 BOR1
 boron-induced degradation204, 209
 endocytosis203–216
 polar localization204, 209
 ubiquitination203–216
 Brassinosteroid insensitive1 (BR11).....108
 Brassinosteroids
 imaging.....107–116
 receptor-mediated endocytosis107–116
 Brefeldin A (BFA)..... 13, 15, 17, 19–21,
 23, 25–27, 35, 40, 204, 206, 209–211, 216, 265–267
 BR insensitive 1. *See* Brassinosteroid insensitive1 (BR11)
 BY-2 cells. *See* Tobacco Bright-Yellow 2 (BY-2) cells

C

- Carboxypeptidase S (CPS).....143–148
 Carboxypeptidase Y (CPY)..... 143, 252–258, 261, 262
 Chemical genomics 180, 251–263
 Clathrin-coated vesicles
 negative-staining for electron
 microscopy..... 164, 172–173, 196
 subcellular fractionation.....164, 165
 Confocal microscopy 85–87, 92, 121,
 179, 205, 206, 210

- Contrast-enhanced video light microscopy36, 38
 CPS. *See* Carboxypeptidase S (CPS)
 CPY. *See* Carboxypeptidase Y (CPY)

D

- Desensitization 150, 153, 160, 161

E

- Electronic light microscopy33
 Electron tomography.....63–79
 Endocytosis 1–11, 13–15, 19, 26, 32,
 33, 45–60, 64, 107–116, 149, 150, 156, 160, 161, 163,
 189, 203–216, 220, 255, 257, 265–282
 Endosomal Sorting Complex Required for Transport
 (ESCRT).....64, 76, 143–148, 190, 204
 Endosomes 3, 6, 7, 17, 19, 31–43,
 63–79, 97, 108, 121, 204, 209, 255, 259
 ESCRT. *See* Endosomal Sorting Complex Required for
 Transport (ESCRT)

F

- Fei-Mao (FM) styryl dyes1
 Filipin..... 14–27, 36
 Flagellin 22 (flg22) 149–161,
 222–224, 226
 Flagellin-sensing 2 (FLS2)
 flagellin-induced degradation221
 ubiquitination 220, 221, 2231
 flg22. *See* Flagellin 22 (flg22)
 Fluid phase endocytosis.....45–60
 Fluorescence microscopy4–6, 47
 Förster resonance energy transfer-fluorescence lifetime
 imaging microscopy (FRET-FLIM).....81–94

G

- GFP. *See* Green fluorescent protein (GFP)
 GFP-RabA1d..... 32, 266, 278
 Golgi N-glycan processing enzymes.....84
 Green fluorescent protein (GFP) 7, 10, 15, 21,
 32, 35, 48, 53, 83, 85, 89, 90, 94, 119–123, 131,
 144–148, 179, 183, 185, 186, 204–206, 209, 210,
 216, 278–279

H

High-pressure freezing 64, 65, 67, 77

I

Immunoblot 104, 121, 123, 127,
132, 133, 136, 176, 205, 207, 213–215, 220, 222, 223,
225–228, 237–238, 266, 276–277

Immunofluorescence microscopy 17

Immunogold labeling 63–79, 132

Immunoprecipitation 181, 205, 207, 213,
222, 223, 225–226, 233, 234, 236, 238, 239, 242,
246, 248, 265

IMOD 66, 72–75, 77, 78

Intraluminal vesicles 63, 64, 75,
76, 143, 190

L

Ligand-induced endocytosis 149, 150, 156, 160, 161

Luminol-based assays 150, 151, 154–159

LY294002 266, 267

M

Mass spectrometry (MS) 229, 268, 269,
274, 275, 280

Medicago sativa 33–34, 37, 41–43

MS. *See* Mass spectrometry (MS)

Multiphoton microscopy 92–93

Multivesicular body/prevacuolar compartment 3, 8,
17, 19, 63, 64, 67, 72–76, 108, 110, 119–128, 143,
144, 184, 186, 190, 204, 209, 210

P

Pathogen-associated molecular pattern
(PAMP) 149, 150, 159, 161, 223

Pattern recognition receptor (PRR) 149, 161

Pharmacological inhibition 113, 180

PIN2
degradation 204
ubiquitination 233–248

Polar auxin transport 233–248

Posttranslational modifications 221

Protein interaction assays 98

Proteomics 98, 179–186, 265–282

Protoplasts 46–50, 53, 54, 57,
98, 100–104, 120–128, 221, 223, 226, 229

PRR. *See* Pattern recognition receptor (PRR)

R

Rab GTPase-effectors 97–104

Reactive oxygen species (ROS) 150, 154–157, 266

Recombinant protein purification 192–193, 196–200

Root hairs 31–43, 203

ROS. *See* Reactive oxygen species (ROS)

S

Saccharomyces cerevisiae 143, 144, 251–253,
256, 260

Seed storage proteins

2S albumins 136, 139, 140, 270

12S globulins 136, 139, 140

SerialEM 66, 72, 77

Single-molecule imaging 47–49, 52

Sterols

endocytosis 3

labeling 15–21

SYP61 180–186

T

Time-correlated single photon counting
(TCSPC) 83–85, 88, 94

Tip growth 30, 32, 33, 38–40, 42

Tobacco Bright-Yellow 2 (BY-2) cells 3, 6–10, 46–50,
54, 120

Trans Golgi network (TGN)

immunoisolation 179–186

proteomics 179–186

Transient expression 86, 98, 120, 128

Trans-species complementation 143–148

Triticum aestivum 33–35, 37, 41–43

2-D electrophoresis 268, 272–274

2-D liquid chromatography coupled to tandem mass
spectrometry (2-D LC/MSMS) 268, 275

Tyrosine-based sorting signal sequences 203, 204

U

Ubiquitin

binding assay 193, 198–200

detection 237

lysine mutants 229

Ubiquitin-binding domains 189–201

Ubiquitylation/ubiquitination 64, 189–201,
203–216, 219–230, 233–248

V

Vacuolar sorting 119, 132

Vacuolar transport 121

Vicia faba guard cells 46, 47, 52, 53

W

Wortmannin 120–122, 124, 126,
127, 161, 206, 209–211, 265–267

X

2xFYVE-GFP 32, 35, 39, 266, 278

Y

YFP-RabF2a 266, 278
