

INDEX

A

- Advanced intercross line (AIL) 4–8, 12–19
- Antibody 63–68, 86, 94, 96, 101, 106, 113, 172–174, 177, 181, 185, 193, 200, 201, 204, 206, 207, 212, 216–223, 226, 227
- Antigen recall 66
- Antigen retrieval 193, 199, 201, 206, 212, 218, 219, 226
- Association mapping 3, 8, 19–20
- Autoantibody(ies) 99–103, 105–114
- Autoimmune disease 26, 40, 53, 145, 166
- Autoimmunity 39, 150
- Axon 132, 199, 206
- Axonal damage 73, 93, 193, 197, 202, 204, 208
- Axonal loss 111, 113, 166, 197, 202, 204, 208

B

- Backcross 4, 9, 12, 13, 21, 22, 34
- Bielschowsky 189, 190, 192, 197–199, 202, 204, 206
- Biomarker 93, 99
- Blood–brain barrier (BBB) 73, 117, 206

C

- Callithrix jacchus* 171
- CD4+ T cells 81, 85, 87, 88
- Cell culture 48, 60, 66, 82, 89, 101, 102, 108, 172, 173, 177, 180, 182
- Central nervous system (CNS) 39, 73–79, 81–90, 99, 117–129, 145, 161, 189–208, 211–227
- Cerebrospinal fluid (CSF) 93, 94, 96, 97
- Chronic 39, 44, 46–48, 145–149, 153, 161, 163, 166, 202, 211
- Cryopreservation 54, 57, 58
- Cytokine(s) 48, 54, 57, 63–69, 74, 75, 85, 87–89, 118, 156, 171, 172, 179, 184
- Cytotoxicity 175, 183

D

- Demyelination 99, 100, 105, 111, 113, 166, 189, 190, 198, 201–203, 207
- Density gradient 54, 56, 59

- Disease course 131, 146, 155, 157, 161, 163, 166, 202
- DNA vaccines 39–50
- Dura (mater) spinalis 123, 124

E

- Electrochemiluminescence (ECL) 94, 96
- ELISPOT 53, 63–69
- Encephalitogenic T cells 117, 118
- Experimental autoimmune encephalomyelitis (EAE) 40, 42–50, 69, 73–75, 81–83, 85–89, 117–121, 126–128, 145–157, 161–168, 171–186, 189–208

F

- Flow cytometry 26, 83, 88, 100, 102, 126, 172, 173
- Freezing 53–61, 166, 167

G

- Gene identification 5, 9, 12

H

- Hematoxylin 217, 224
- Hematoxylin/eosin (HE) 189–191, 195–197, 202, 207, 208
- Heterogeneous stock 5, 12, 15–16
- Histology 79, 189–191, 196, 224, 225

I

- Immune cells 53, 63, 68, 81–90, 117, 118, 145
- Immune profiling 172
- Immunofluorescence microscopy 111
- Immunohistochemistry 192–193, 199–201, 212–213, 216, 218–219, 223–226
- Inbred 4, 5, 9–12, 15, 16, 21, 26, 27, 161–164
- Inbred and congenic strains 5, 10
- Inflammation 74, 81, 83, 85, 86, 123, 161, 162, 190, 202, 219
- Inflammatory cells 63, 75, 85–86
- In situ hybridization (ISH) 213–215, 217, 223–224, 226, 227
- Intercross 4, 7, 8, 10, 12–18, 22, 36
- ISH. *See* In situ hybridization (ISH)

L

Laminectomy 123
 Lentivirus 28, 29, 32
 Linkage analysis 3, 9, 10
 Luxol fast blue (LFB) 189–191, 196–198,
 203–206, 208, 216

M

Marmoset 171–186
 MBP. *See* Myelin basic protein (MBP)
 Microdissection 105
 MOG. *See* Myelin oligodendrocyte glycoprotein (MOG)
 Mononuclear cells 53–61, 68, 69,
 82–84, 87, 88, 155, 157, 172, 176–179,
 181, 184
 Monophasic 147, 149, 162, 164,
 166, 168
 Mouse model 74, 149
 Multiple sclerosis (MS) 25–27, 39,
 40, 44, 53, 73, 99–103, 105, 117, 118,
 131–140, 145, 146, 161–163, 166,
 171, 189, 190, 211–227
 Myelin 39–41, 43, 44,
 68, 74, 77, 81, 99–103, 105, 108,
 111–113, 118, 120, 145, 146,
 150, 152, 153, 155–157,
 162, 165, 172, 189, 198, 206,
 216, 217, 223, 226
 Myelin basic protein (MBP) 40, 41, 43,
 44, 48, 82, 108, 120, 121,
 147, 150, 153, 162, 163,
 166, 168, 223
 Myelin oligodendrocyte glycoprotein (MOG) 40–45,
 48, 75, 99–103, 111, 112, 117, 120, 126, 128,
 146, 150, 153, 162–164, 166, 168, 172, 175,
 176, 178, 181–184, 216

N

Neurodegeneration 93, 131–140
 Neurofilament light chain (NfL) 93–97
 Neuromyelitis optica 100, 163
 Neuromyelitis optica spectrum disorders (NMOSD)
 100
 Neuropathology 211, 225

O

Oocyte injection 33–34
 Optical coherence tomography 131–140
 Optic neuritis 100, 133, 135, 149,
 163, 168

P

Paraffin embedded 212
 Pathology 93, 100, 137, 138, 161, 163,
 189–208, 212
 PBMCs. *See* Peripheral blood mononuclear cells
 (PBMCs)
 Percoll 74–79, 82, 84, 85, 89, 151,
 155, 157
 Periodic Acid Schiff (PAS) 189–191, 196–198,
 203–206, 208
 Peripheral blood mononuclear cells (PBMCs)
 53–61, 65, 69, 172, 175
 Perivitteline space 35
 PLP. *See* Proteolipid protein (PLP)
 Positional cloning 3–4
 Proteolipid protein (PLP) 40, 41, 43, 44,
 108, 112, 146, 147, 150, 163, 217, 223, 227
 Protocol 16, 22, 40, 41, 43, 47, 67, 74,
 111, 112, 132, 136–140, 150, 153, 157, 172,
 173, 175, 185, 190, 193, 196, 199–201, 205,
 207, 217–223

Q

Quantitative trait loci (QTL) 3–10, 13, 14, 17–23
 Quantitative trait nucleotide (QTN) 9–10, 20–21

R

Rat 6, 11, 15, 17, 19, 25, 26, 87, 97,
 109, 117, 119, 120, 124, 127, 147, 161–168,
 192–194
 Relapsing-remitting 100, 146–149, 153,
 161, 163, 166

S

Serum 27, 42, 55, 58, 64, 66, 82, 94, 96,
 100–103, 107, 108, 111, 150, 172, 176–178,
 206, 207, 212
 Spinal cord window 122–124, 128

T

T cell proliferation 172, 173, 176, 179–180, 182
 T cells 26, 39, 40, 44, 53, 54,
 64, 65, 69, 74, 75, 81, 85–88, 117–128, 145, 146,
 156, 162, 166, 172, 173, 175–185, 189, 193,
 197, 202, 203
 Thawing 53–61, 113, 167
 Transcription factors 21, 85, 88, 111
 Transgenesis 25, 26
 Two-photon laser scanning microscopy (TPLSM)
 117–121, 124–128
