Index

A
Abel theorems on power series, 442
Abel's formula, 469
absolute convergence, 429
absolute value estimate for integral, 188
adiabatic compressibility, 293
air resistance, 513
algebra, 14
alternating harmonic series, 428, 445
alternating series, 426
Ampère law, 407
amplitude modulation, 508
analysing functions, 160
analysing functions: steps, 169
Approximations of functions, 136
approximations of functions, 155
Archimedean spiral, 60
Archimedes law, 387
area of figure via line integral, 350
area of plane figure, 242
area of sphere, 361
area of surface, 360
arithmetic progression, 42
Arrhenius rate formula, 519
asymptotes of function, 167
average value theorem for integral, 187

B
beats, 508
Bessel equation, 505
binomial coefficients, 45, 141, 153
binomial formula, 44
biorthogonal basis, 34
Bolzano-Cauchy first theorem, 113
Bolzano-Cauchy second theorem, 114
Bose-Einstein statistics, 441
boundary conditions, 456
Brownian motion, 333
Brownian particle, 226

C
Cartesian coordinates, 10
center of mass, 252
changing variables in double integral, 327
changing variables in triple integral, 335
Chebyshev polynomials, 452
circle, 11, 22
classical nucleation theory, 173
collinear vectors, 26
combinatorics, 49
complementary solution of ODE, 474
complex numbers, 37
composition functions, 67
concave behaviour of function, 163
conditional convergence, 429
connection equations, 335
conservation of charge, 386
conservative field, 394, 406
conservative vector field, 394
continuity equation, 384, 408, 409, 412, 415
continuity of function of many variables, 268
continuity of functional series, 437
continuous function, 108
convex behaviour of function, 163
coplanar vectors, 26
cosine function, 18

© Springer Science+Business Media, LLC 2016

L. Kantorovich, *Mathematics for Natural Scientists*, Undergraduate Lecture Notes in Physics, DOI 10.1007/978-1-4939-2785-2

cosine theorem, 20
critical dumping in harmonic oscillator, 511
critical points of function, 161
cross product of vectors, 28
crossing of line and plane, 65
crossing of two lines, 64
crossing of two planes, 66
cumulants, 450, 452
curl, 372, 391
curl via determinant, 375
curved lines, 58
cylinder coordinates, 337

D
Darboux sums, 182, 319
DE, 455
de Moivre's formula, 98
decimal representation, 7
defects in crystal, 518
del operator, 296
derivative chain rule, 131
derivative geometric interpretation, 125
derivative of function, 125
derivative of inverse function, 132
derivative quotient rule, 130
Derivatives main theorems, 127
derivatives of composite functions, 280
Derivatives of higher orders, 140
determinant of matrix, 23
determinant of quadratic equation, 18
differential, 127
differential equations, 455
differentiation of functional series, 439
differentiation of power series, 445
diffusion constant, 411
diffusion equation, 273, 411
directed surface element, 367
directional derivative, 294
discontinuity of first kind, 110
discontinuity of second kind, 110
displacement current, 409
distance between lines, 65
distance between parallel planes, 66
distance between point and line, 62
distance between point and plane, 62
distribution of particles in volume, 515
divergence, 381, 388
divergence theorem, 381
division theorem for numerical sequences, 74
dot product of vectors, 27
double integral, 315
driven harmonic oscillator with friction, 511
driven oscillator without friction, 507

E
eccentricity of ellipse, 22
electric field, 404
electromagnetism, 404
electrostatic field, 256
electrostatic potential, 365
electrostatics, 404
elementary geometry, 11
ellipse, 22
ellipsoid, 262
elliptic cone, 363
enthalpy, 291
entropy, 290
equation of line, 56
equation of motion, 513
equation of plane, 59
equation of state, 291
equilateral triangle, 13
error function, 453
Euler's substitutions, 215
Euler-Mascheroni constant, 425
even function, 20, 178
exact differential, 277, 351, 379, 458
exact differential equations, 458
exhaust velocity, 514
expansion into solenoidal and conservative fields, 401
exponential function, 90, 134
exponential functions, 112
extremum of function of many variables, 301

F
Faraday law, 408
ferromagnetic material, 172
Fick's first law, 411
finite series, 41
fluid in vortex, 393
flux integral, 367
flux of liquid through surface area, 367
focal points of ellipse, 23
foci of ellipse, 23
force, 254
Fourier's law, 412
Fresnel integrals, 453
friction coefficient, 513
Frobenius method, 492
function, 16
functional series, 434

G
Gamma function, 229
gas distribution function, 281

Gauss theorem, 381
Gauss theorem variants, 383
Gaussian integral, 332
general power function, 84, 132
general power functions, 111
general solution of differential equation, 455
generalised binomial coefficients, 153, 450
geometric progression, 417
geometrical progression, 41
geometrical series, 78
Gibbs free energy, 291
gradient, 294
Green's formula, 346

H
Hamiltonian, 282
harmonic motion, 507
harmonic oscillator, 441, 506
harmonic oscillator equation, 495
harmonic oscillator with friction, 510
harmonic series, 418
Hartree potential, 433
heat capacity, 292, 413
heat transport equation, 411
Heaviside function, 67
Helmholtz free energy, 291
Hermite polynomials, 452
homogeneous differential equations, 462
homogeneous equation, 467
homogeneous linear differential equations with constant coefficients, 471
horizontal asymptote, 167
Hydrodynamic equation, 413
hyperbolic functions, 91, 112, 135
hyperbolic paraboloid, 264

I
ideal liquid, 413
ideal rocket equation, 514
improper integrals, 226
indefinite integral formula, 190
indefinite integrals, 188
indicial equation, 492, 494
induction, 4
inequalities, 15, 52
infinite geometrical progression, 78
infinite limits, 115
infinite numerical sequence, 71
infinite numerical series, 77
infinite series, 417
infinite series integral test, 423
infinite series ratio test, 421
infinite series root test, 422
inflection point of function, 165
inhomogeneous equation, 467
inhomogeneous linear differential equations, 474
initial conditions, 455
integrals depending on parameter, 223
integrating factor, 460, 465
integration by changing variables, 195, 220
integration by parts, 198, 222
integration of functional series, 439
integration of irrational functions, 213
integration of power series, 445
integration of rational functions, 204
integration of rational functions with e^x, 212
integration of trigonometric functions, 209
inverse function, 69
inverse trigonometric functions, 98, 112, 135
irregular singular point, 491
isosceles triangle, 13
isotherm of gas, 171
isothermal compressibility, 293
ISP, 491
iterated integral, 317

J
Jacobian, 327, 335, 357, 361

K
kinetic Monte Carlo, 518
Kirchoff's law, 506
Kronecker symbol, 34

L
L'Hôpital's rule, 158
Lagrange formula, 152, 190, 301
Lagrange multipliers, 310
Laguerre polynomials, 452
Landau-Ginzburg theory, 172
Langevin equation, 226
Laplace equation, 406
Laplace operator, 412
Laplacian, 287, 390
least square method, 307
Legendre equation, 497
Legendre polynomials, 452, 500
Leibnitz convergence test, 427
Leibnitz formula, 226
Leibniz formula, 141, 154, 155
length of circle, 340
length of curved line, 238

length of parabola, 342
length of spiral, 342
Levi-Civita symbol, 30
limacons of Pascal, 60
limit of composition of functions, 107
limit of function, 100
limit of inverse function, 108
limit of numerical sequence, 72
limit theorems, 105
limits at infinity, 115
line integral, 338
line integral for scalar field, 338
line integral for vector field, 342
linear first order differential equations, 464
linear operator, 475
linear second order differential equations, 468
logarithmic function, 91, 112, 133
logic, 3
Lorenz force, 407

M
Maclaurin formula, 299, 448
Maclaurin series, 448
Maclaurin's formula, 152
magnetic charges, 410
magnetic field, 257, 404
major axis of ellipse, 22
mass calculation, 252
mass conservation, 385
maximum of function, 161
Maxwell relations, 292
Maxwell's equations, 404
Möbius strip, 359
mechanical equilibrium, 297
method of undetermined coefficients, 476
method of variation of parameters, 480
minimum of function, 161
minor axis of ellipse, 22
moment of inertia, 337
moments, 450, 452
monotonic function, 69
multinomial expansion, 52

N
Newton's equation of motion, 483
Newton-Leibnitz formula, 228, 232
Newton-Leibniz formula, 191
non-linear second order differential equations, 483
normal to cylinder, 357
normal to sphere, 362
normal to surface, 275, 297, 357
number e, 86, 155
number π, 11, 156
numbers, 5

O
oblique asymptote, 168
odd function, 20, 178
ODE, 455
one-pole hyperboloid, 264
one-side limit of function, 104
operator, 143, 474
ordinary differential equations, 455
ordinary point of differential equation, 486
orientable surface, 359
orthogonal vectors, 28
Ostrogradsky-Gauss theorem, 381
over-dumping in harmonic oscillator, 511

P
parabola, 17
paraboloid, 364
parallel lines, 12
parallelogram, 12
partial derivative, 268
partial sum of numerical series, 77
particular integral of ODE, 474
particular solution of differential equation, 456
particular solution of ODE, 474
Pascal's triangle, 44
periodic function, 19
points of discontinuity, 268
Poisson's equation, 401
polar coordinates, 57, 329
polynomial, 16
polynomials, 79, 110
power series, 441
pressure, 255, 290
principal value Cauchy, 235
product theorem for numerical sequences, 74
proving by contradiction, 4
Pythagorean theorem, 18

R
radians, 11
radius of convergence, 443
random process, 450
rational function, 17
rational functions, 80
rational functions decomposition, 81
reciprocal basis, 34
rectangle, 21

recurrence relation, 41, 154, 492, 494, 496, 498
regular singular point, 491
remainder term, 148
reminder term, 448
residence kinetics, 517
residence probability, 517
resonance, 478, 508, 512
resonance frequency, 509, 512
rhodonea curve, 60
Riemann definite integral, 177
Riemann integral sum, 176
right triangle, 13
right-hand rule, 359
roots of polynomials, 79
RSP, 491

S
saddle point, 161, 163, 265
scalar field, 294
scalar potential, 394
scalar product of vectors, 27
Schrödinger equation, 471
second order phase transition, 172
separable differential equations, 456
series solution of linear differential equations, 486
series with positive terms, 420
sign function, 68
similar triangles, 13
simply connected region, 346, 351
sine function, 18
sine theorem, 20
singular point of differential equation, 486
smooth surface, 356
snail curve, 60
solenoidal field, 397
solenoidal vector filed, 394
solids of revolution, 247
sphere, 262
spherical coordinates, 58, 336, 361
stationary points, 302
steady-state solution, 512
steepest descent, 297
Stokes's theorem, 371
subsequence theorem for numerical sequences, 75
sufficient condition of differentiability, 271
surface, 355
surface charge density, 365
surface integral for scalar field, 364
surface integral for vector field, 366
surface integrals, 355
surface of cone, 249
surface of elliptic cone, 363
surface of revolution, 248
surface of sphere, 249
surface of torus, 249
surfaces of second order, 262

T
tangent plane, 275
Taylor expansion, 504
Taylor series, 446
Taylor's formula, 146
Taylor's theorem, 151, 299
temperature, 290
terminal velocity, 513
theorem on mixed derivatives, 273
theorems for numerical sequences, 73
thermal expansion coefficient, 293
thermal pressure coefficient, 293
thermodynamic potentials, 291
thermodynamics, 290
three dimensional space, 26
three-leaf rose, 60
torus, 249
total derivative, 414
total derivative of function, 283
transition probabilities, 519
transition rates, 519
transition state, 265
triangle, 12
trigonometric functions, 18, 93, 111, 134
triple integral, 333
Tsiolkovsky formula, 514
two-pole hyperboloid, 264
two-sided surface, 359

U
uncertainties when taking limit, 117
under-damping in harmonic oscillator, 510
uniform convergence, 323, 435
uniform convergence of improper integral, 323
uniform convergence of power series, 445
uniqueness theorem for numerical sequences, 76
unit base vectors, 28
unit step function, 67

V
van der Waals equation, 171
vector field, 342
vector potential, 394
vector product of vectors, 28

vector-columns, 36
vectors, 26
vectors-rows, 36
vertical asymptote, 167
volume of bodies, 245
volume of cone, 246
volume of cylinder, 245
volume of ellipsoid, 246
volume of solid of revolution, 248
volume of sphere, 246, 320, 330, 334, 336
volume of tetrahedron, 247

W
wave equation, 410
Weierstrass convergence test, 436
work done, 255, 342
Wronskian, 469, 473, 482
