

INDEX

A

ATP 95, 104, 106, 115, 116, 132, 145, 147, 159,
190, 193, 194, 202, 207, 223

B

Bacteria..... 200, 204
 Biolayer interferometry..... 223–230
 Biotin-16-2'-deoxyuridine-5'-triphosphate
 (Biotin-16-dUTP)..... 84
 Blue-native PAGE (BN-PAGE)..... 116, 119–121,
125–128

C

Copper ions 90
 Cultured cells..... 15, 29, 69, 70, 97, 103, 115–128,
155, 175, 211
 Cybrid (cytoplasmic hybrid)..... 148, 164
 Cytotoxicity 49–64

D

DNA methylation 131–141
Drosophila melanogaster 199–209

E

Electron transport chain..... 19, 27, 115–117
 Embryonic stem (ES) cells..... 131, 132, 163–172
 Enzyme assays 21

F

Fibroblasts 16, 30, 31, 70, 161, 165–168, 171, 172
 Fluorescence *in situ* hybridization (FISH) 51
 Fluorescent RNA 175–179
 Fusion..... 6, 163–169, 172, 200, 205, 208, 209

G

Gel mobility shift assay (GMSA)..... 212, 213,
215–216, 219, 220, 227
 Gene therapy 146
 Genetic engineering 146
 Glycerol gradient sedimentation..... 192–193, 220

H

Human 20, 27, 38, 49, 50, 53, 57, 63, 64, 70,
95, 96, 132, 136, 138, 145–161, 164, 177, 185–197,
211–221, 223

I

Imaging 49–64, 120, 127
 Isolated mitochondria..... 100, 102, 103, 115–128
 Isopycnic centrifugation 70

L

Labeled probes 101, 179
 Long-term drug treatment 64

M

Mammals..... 116
 Massively parallel sequencing 3–16
 Matrix-addressing sequence of mitochondrial
 ribosomal 5S-rRNA (MAM) 176
 Metabolism 49, 96, 145
 Methylated DNA immunoprecipitation
 (MeDIP)..... 132–137, 139–141
 Mitochondrial disease..... 3, 33, 116, 145, 146, 223
 Mitochondrial DNA (mtDNA)
 base lesions 27, 28
 BrdU (5-bromo-2'-deoxyuridine)-labeled 82, 84–91
 cleavage..... 82, 84, 85, 88, 90, 91, 146, 147
 copy number 103, 131–141, 146, 147,
150–151, 153, 157–159, 211
 D-loop..... 51, 171
 damage 19–25, 27–32, 68
 deletion breakpoints..... 4, 38, 146
 deletions 3, 15, 33–45, 146, 147, 163, 164, 186, 224
 double-strand breaks..... 27, 146, 147
 dynamics..... 49–65, 71, 82
 encoded-protein translation..... 115–128
 fluorescent *in vivo* hybridization 176
 haplotypes..... 146, 157, 158
 helicase 185–197, 211, 213
 heteroplasmy..... 3, 145–161
 homoplasmy 171

Mitochondrial DNA (mtDNA) (*continued*)

in organello labelling..... 95–110, 124
in situ tracking 81–91
labelling 58, 85, 102
mutation 3, 20, 33, 95, 145, 146, 148, 157, 164, 186
nucleoid 70, 71, 76–77, 176
polymerase γ (*POLG*) 19–25, 71, 89, 132, 186, 223
repair 27, 30, 224
replicating 95–110
replication 49, 51, 53, 54, 71, 82, 95–110,
131–133, 141, 148, 224, 228
replication intermediates 99
replicative efficiency index 132
replisome 211, 212, 223–230
single-strand breaks 27
strands 50
tracking 51, 81–91
transcription 49, 51, 71

Mitochondrial import
nucleic acid 176
protein 16, 69, 70, 74, 116, 123, 199
RNA 50, 51, 81, 176, 199–209

Mitochondrial isolation
cultured cells 69, 115–128
mouse tissues 123–124

Mitochondrial RNA (mtRNA) 50, 51, 53, 54,
71, 81, 176

Mitochondrial RNA polymerase 199–209

Mitochondrial single-stranded DNA-binding protein
(mtSSB) 71, 97, 99, 186, 190, 194, 197, 211–221

Mitochondrial transcription and replication
imaging protocol (mTRIP) 49–64

Mitochondrial transcription assay 202–203, 205–209

Mitochondrial transcription factor A 199

Mitochondrial whole genome analysis 15

Mitochondrially targeted zinc
finger-nuclease (mtZFN) 145–161

Mouse 28, 30, 31, 36, 70, 103, 123–124,
128, 132, 163–169, 171, 172

N

Next generation sequencing (NGS) 3, 37, 38

O

Oxidative phosphorylation (OXPHOS) 116, 132, 147,
164, 223

Oxidative phosphorylation (OXPHOS)

complex assembly 116
Oxidative stress 27, 33

P

Polymerase chain reaction (PCR)

long-range (LR-PCR) 4, 8
long-range single molecule (smPCR) 33–45
real-time (qPCR) 3, 14, 27–32, 133–140,
150, 151, 157, 159

Protein expression 200–201, 203–204, 208

Protein purification 201, 204–205

Protein–DNA interactions 223–230

Protein–protein interactions 223–230

Pulse labelling 106, 116, 117, 120–122, 124–125

Pulse-chase labelling 117, 120–122

R

Reactive oxygen species (ROS)

hydrogen peroxide 27
hydroxyl radical 27
superoxide anion 27

Real-time qPCR analysis of damage

frequency (RADF) 30–32

Recombinant protein 195

Respiratory chain 50, 116, 117, 126, 145

Restriction digestion 32–45, 99

S

Single-cell 39, 49–64, 163

Singlet oxygen 81

Sublethal cytotoxicity 49–64

SUMO fusion proteins 200, 205, 206, 208, 209

T

Translesion synthesis 19–25

Two-dimensional agarose gel

electrophoresis (2D-AGE) 95–110

X

Xenocybrid 165–169, 171, 172

Xenomitochondrial 163–172

Z

Zinc finger nuclease (ZFN) 146
