

INDEX

A

Antibody.....26, 37–47, 49–54, 59,
62, 69, 71, 72, 74, 77, 79, 115, 168, 170, 171, 173,
179, 185, 198, 206, 207
Antibody-immobilized microbeads 49–51, 53, 54
Antigens25, 45, 46, 49, 50, 53, 69, 77, 168, 170

B

Bacteremia.....188
Bacteria.....175–185, 188
Bacterial blood stream infection (BSI) 175, 176
 β -cells58, 66
 β -Galactosidase 87, 88, 93, 95
Biomarker..... 15, 77, 114, 133, 143, 167, 188, 212
protein markers..... 50, 70, 211
nucleic acid markers
Biotinylated β -Galactosidase (B β G).....88, 93, 95, 96, 99
Blood.....58, 70, 143, 167–185, 188, 197
cells.....168, 176, 177, 181, 182, 184, 185, 188
stream infection 175, 176, 178–185

C

Cancer
cell114, 143, 145, 169, 173,
188, 190, 191, 197, 198, 206, 211–219
cell isolation.....167, 169, 172, 173, 188
circulating tumor cells (CTC) 167–174, 188,
197, 204
colon cancer.....167
lung cancer.....167, 169
metastasis.....167
mutations.....143, 168, 211
Capillary-driven flow25–47
Capillary electrophoresis (CE)206
Cell
 β -cells58, 66
fluorescence in situ hybridization
(FISH).....206, 211–219
lysis176–178, 181–182, 184,
191, 193, 195, 198–201, 205–207
negative enrichment of circulating tumor cells
(CTCs).....167–174

permeabilization191, 193, 198–202,
205, 206, 213
single cell 57, 114, 187–207
sorting
staining 171–173, 190–191, 195, 197–198, 206
trapping189, 190, 192, 193,
195–204, 206, 207
white blood cell (WBC) depletion176
Chip singulation30–34
Clinical diagnostics..... 5, 37, 69–81
Commercialization5, 6
Competitive immunoassay.....58
Continuous flow70
C-reactive protein (CRP)50, 53–55, 70–72, 74, 76–79

D

Deflection.....70
Diabetes.....58
Diagnostics.....3–18, 85, 144, 175–176, 187–207
cartridge..... 8, 10, 12–16, 18
Digital bioassays99
Digital microfluidics (DMF). *See* Microfluidics
Digital PCR124, 125, 128, 129, 143–162
DNA
amplification.....140, 144, 145, 156, 160
detection 87, 144, 145
digital PCR.....124, 125, 129, 143–162
gene amplification 158, 211, 212, 218
multiplexing.....133, 134
mutations.....143–145
nucleic acid amplification 8, 123–131
PCR.....134, 144, 145, 149, 154, 156
probes37, 145, 154, 156, 211–213
single-molecule detection 85–100, 105–110
stretching.....105–110
trapping106–109
Dry-film resist (DFR)26–47

E

Electrophoresis 8, 58–60, 62, 64, 189, 206
Electrowetting 86, 97
Electrowetting-on-dielectric-based digital
microfluidics (EWOD-DMF)86

Epithelial cell adhesion molecule
(EpCAM)..... 191, 197, 198
Escherichia coli 94
Eucaryotic cell

F

Femtoliter-sized microwells..... 85–100
Fluorescence in situ hybridization (FISH). *See* Cell

G

Gene amplification..... 158, 212, 218
Glucose detection
Glucose sensitivity..... 58, 63, 66

H

Hoechst 33342 170, 172, 173, 191
Hormone monitoring..... 57–66
Hydrogel..... 49–54

I

Immunoassays 14–17, 25–47,
49–54, 57–66, 69–81, 125
Immunocytochemistry..... 169
Immunomagnetic separation 169, 172
Immuno-pillars device..... 50, 51, 53, 54
In vitro diagnostics 58, 197, 204
Infections..... 17, 70, 175–185
Inflammation..... 70
Islets of Langerhans 58

K

KRAS..... 133–141, 143–162

L

Lab-on-a-chip..... 7, 34
Laminar flow 27, 40, 70, 71, 77, 81
Laser induced fluorescence (LIF) detection 62–63

M

Magnetic particles 16, 69–81, 85–100,
113–120, 169, 171
Magnetic tweezers..... 114, 116, 117, 119
Marker..... 90
Microbeads..... 49–54
Microcontact printing 26, 37–47
Microfabrication..... 26, 38, 106, 114, 212
Microfluidics
chip fabrication..... 59–60, 215–216
device..... 6, 8–11, 25, 37, 38, 49,
57, 58, 61, 69, 72, 75, 79, 80, 106, 114, 141, 149, 156,
162, 176, 177, 180–181, 189, 190, 192–199, 201,
214–216

digital microfluidics 85–100
droplet-based 113–120, 135, 143–162, 207
immunoassay 49–54
lab-on-a-chip..... 7, 34
silicon-based microfluidic chips 7, 13, 15, 26
Microparticles..... 15, 173
Micropillars 49–54, 70
Micro slit membrane 168, 170, 171, 173
Microtас, μ -TAS..... 3, 6
Microwell array..... 86, 87, 89, 91, 93, 95, 96, 98, 99, 207
Molecular diagnosis..... 8, 12, 14–16, 18, 129, 176
Molecular patterning..... 105, 106
Multilaminar flow..... 69–81
Multiplexing..... 133–141

N

Nucleic acid amplification 8, 123–131

O

Optical mapping..... 105

P

Parallel single cell analysis (PaSCAL)..... 187–207
Parylene filter membrane..... 169
Passive droplet fusion 133–141
Pathogens 25, 176
Patterning antibodies..... 26, 37–47
Perfusion..... 57, 59–61, 64
culture..... 59
reservoir 61
Photomasks 26, 28, 29, 33, 34, 39,
51, 53, 54, 59, 64, 72, 89–91, 95, 106, 125, 126, 136,
148, 178, 179
Picoliter size droplets..... 153
Point-of-care diagnostics..... 16, 18, 38, 113
Polydimethylsiloxane (PDMS) 25, 35, 38,
39, 41–46, 106, 108–110, 116–118, 120, 135–137,
146–148, 150, 176–178, 180–183, 189, 192, 194,
203, 206, 207
Polymerase chain reaction (PCR)..... 8, 12, 14, 16,
114, 115, 118, 119, 124–126, 128, 129, 134–137,
139–141, 143–162, 176, 206, 207
Polymethyl methacrylate (PMMA)..... 168
Probes..... 37, 92, 116, 131, 134–141,
145–147, 154, 156, 157, 161, 191, 195, 198,
211–215, 217, 219
Product development..... 3, 4, 7–15, 18

Q

Quantification 86, 96, 123, 124, 129, 139, 144, 145

R

Reverse transcription (RT)..... 114, 115, 117, 119, 145

S

Sample preparation.....6, 8, 171, 176, 190,
 194–195, 212, 216–217
 Sandwich immunoassays 15, 46, 70, 71
 Sealing..... 11, 25–36, 38, 40, 44–46,
 85–100, 126, 196, 204
 Sepsis..... 175, 177
 Silicon-based microfluidic chips7, 13, 15, 26, 194
 Single cells..... 57, 114, 187–207
 Single-molecule detection 85–100

Soft-lithography85–100, 105–110, 116,
 120, 123, 136, 144, 148, 176, 194, 207
 Streptavidin-coated superparamagnetic
 particles.....72, 79, 88, 94, 97
 Superparamagnetic particles.....72, 79, 88, 93, 94
 Surfactant88, 116, 118, 135,
 137, 138, 146, 149

U

Ultrasensitive detection123
