

INDEX

B

- Batch effects 26, 108, 187–188, 196, 199
- Bioinformatics 35, 42
- Bisulfite conversion 17–19, 21, 43, 90, 139–158, 163–165, 167, 178, 180
- Bisulfite sequencing 43, 90, 104, 170, 171, 175
- Body fluids 141–145, 150, 154, 157

C

- Cell type 25, 38–40, 44, 99–106, 108, 109, 111–113, 116, 117, 161, 162, 182
- Chromatin dynamics and organization 75
- Chromatin interactions 41, 48, 49
- Chromatin modification 31, 113
- Chromosome conformation capture (3C) 47–73, 75, 76
- Chromosome topology 48
- Cis-regulatory genome 30
- Computational method 109
- CpGs 17, 40, 90, 112, 113, 116, 121, 162

D

- Differentially methylated region (DMR) 162
- DNA
 - hydroxymethylation 139
 - immunoprecipitation and enrichment 89
 - methylation 17–26, 29–32, 40, 99–106, 109, 110, 113, 115, 116, 139, 140, 148, 155, 158
 - quantification 20, 132, 144–145, 151–154

E

- Effusions 139–158
- Epigenetics 29–32, 44, 107, 185
- Epigenome-wide association study (EWAS) 107–109, 113

F

- FFPE tissue 141, 142, 148, 149, 157

G

- Genome databases 30

H

- Hi-C. *See* High-throughput sequencing (Hi-C)
- High-throughput sequencing (Hi-C) 2, 6, 12, 47–73, 75, 76
- 5-Hydroxymethylcytosine (5hmC) 43, 89–93, 95–97
- Hydroxymethyl-DNA immunoprecipitation (HmeDIP) 89–95, 97

I

- Illumina Infinium HumanMethylation450 BeadChip 109, 111
- Imprinted gene 161–182

L

- Linear model 102–105, 188–197
- Low concentration 142

M

- 5-Methyl-cytosine (5mC) 43, 89, 90, 97
- Mobile element 1–13
- Mobile element scanning (ME-Scan) 2–7, 11, 12
- Monoallelic expression 161, 162, 173, 175–177

N

- Next-generation sequencing 33, 41, 91, 107, 116, 133

P

- Plasma 20, 139–158
- Polymer-mediated enrichment (PME) 142, 145
- Polymorphic variation 30
- Polymorphism 162, 182
- Population diversity 1
- Principal component analysis (PCA) 103, 106, 188, 189, 193, 194, 196, 199–201
- Pyrosequencing 17–26, 104

Q

- Quantitative PCR (qPCR) 11, 76, 78, 83, 84, 94

R

Regression99–106, 111, 180,
191, 196, 200
R statistical software..... 101, 105

S

Sample heterogeneity..... 107–113
Serum.....96, 139–158

Single nucleotide polymorphism (SNP) 32, 41,
43, 162, 173
Statistical adjustment 101
Statistical power 190–192, 197, 199

W

Whole genome2, 5, 34, 104
