

# INDEX

## A

Absolute quantification ..... 237, 281, 337  
 Amplification efficiency ..... 284–290, 392, 397  
 Antigen retrieval (AR)..... 116, 117, 119, 120, 122–127  
 Arrhythmia..... 187  
 ATP..... 207, 262, 271, 298, 303, 307  
 Automatization..... 188

## B

Biofluids ..... 230, 231, 234, 237, 238, 240, 241, 245, 246, 250, 350, 379–382, 385–397, 400, 416  
 Biomarkers ..... 12, 130, 222, 232, 238, 260, 337, 350, 379–381, 399–410, 414–417

## C

Carbon 13 NMR..... 259–277  
 Cardiomyocytes ..... 201–209  
 Catalase ..... 338, 340–342  
 Cell culture ..... 162, 173, 180, 189, 192, 202–204, 231, 233–234, 247, 299, 301, 303, 325, 382, 384  
 Cell preparation..... 189, 193–194, 299–301  
 CellTiter-Glo® ..... 299, 302, 303  
 Cellular metabolomics..... 231, 259–277  
 Clark electrodes ..... 299, 304  
 Combination drugs..... 3–22, 39–40  
 Comet assay..... 173–183  
 Contractility measurement ..... 202  
 Cytotoxicity study..... 299, 301–303, 307

## D

Developmental toxicity..... 21, 22, 28, 48, 52, 54, 55, 62, 311–323, 326  
 DNA damage ..... 174, 175, 180, 181  
 Dose selection..... 8, 10, 18–19, 36, 48, 50–51  
 Drug development..... 7, 15, 26, 30, 31, 39, 40, 61, 201, 231, 311  
 Drug metabolism..... 34, 260

## E

Egg culture ..... 314–318  
 Egg fertilization..... 312–314, 322, 323, 327, 331  
 Electrophoresis ..... 164, 170, 173–179, 181  
 Electrophysiology..... 188, 190, 191, 195, 201

Embedding..... 77, 87, 95, 96, 102, 103, 105–109, 113, 117, 123, 130, 137, 173, 176, 178, 183, 329, 401  
 Embryos ..... 58, 318, 319, 323, 326–329, 331, 332, 400  
 Embryotoxicity..... 312, 318, 319, 325–332  
 Exosome ..... 350, 351, 354–355, 357, 376, 382, 386, 387, 390, 394–397, 413–422

## F

Fixation ..... 72, 73, 77, 85–88, 90–97, 102, 104–105, 112, 116–118, 123, 127, 130, 137, 138, 407  
 Flow cytometry..... 144–146, 151, 154, 156, 162, 166–167, 171  
 Frog embryo teratogenesis assay Xenopus (FETAX) ..... 311

## G

Gas chromatography-mass spectrometry (GC-MS) ..... 231, 246, 247, 251, 416  
 Genetic toxicology..... 11, 173  
 Genomics ..... 230

## H

High performance liquid chromatography (HPLC)..... 130, 131, 245, 246, 338, 342  
 Histological slide ..... 72, 104  
 Histology..... 72, 77, 101–103, 105, 113, 115, 116, 129  
 Histopathological procedures ..... 102  
 Human *ether-a-go-go* (hERG)..... 187–199, 201

## I

Immunohistochemistry (IHC)..... 102–104, 110, 115–127, 135, 406, 408, 410  
 Impedance measurement ..... 201–207  
 Induced pluripotent stem cells (iPSCs) ..... 201–209  
 In silico ..... 33, 241, 340, 343, 346  
*In situ* hybridization (ISH) ..... 102, 399, 405, 408  
 Investigative toxicology ..... 54

## J

Juvenile toxicity ..... 39, 47–49

## K

Kidneys..... 32, 34, 44, 45, 72, 76, 83, 87, 90, 244, 261, 264, 265, 267, 268, 273, 277, 298, 390

**L**

Lactate dehydrogenase (LDH) release ..... 262, 273, 301  
 Liquid chromatography-mass spectrometry  
 (LC-MS) ..... 130, 231, 232, 234, 235, 245–247,  
 339, 340, 346  
 Liver ..... 32, 35, 39, 45, 72, 76, 83–86, 95, 96,  
 261, 264–268, 271, 272, 297, 298, 300, 338, 400

**M**

Macroscopy ..... 71, 75, 77, 85  
 Malformations ..... 313, 315–320,  
 323, 326, 330  
 Mass spectrometry (MS) ..... 130, 133, 138, 229–254, 260,  
 337–345  
 Mass spectrometry imaging (MSI) ..... 129–139  
 Matrix assisted laser desorption/ionization (MALDI)  
 imaging ..... 129, 130, 133–135, 138  
 Metabolic profiling ..... 229, 235, 236, 247,  
 250, 252–253  
 Metabolomics ..... 229–254  
 MicroRNA ..... 349–378, 399  
 Microtomes ..... 103, 107–109, 117  
 Mitochondrial respiration ..... 297–307  
 Monkey ..... 42, 43, 45–47, 49, 57, 227, 349  
 Mouse ..... 19, 43, 45, 48, 49, 53, 62, 73, 76, 81,  
 85–87, 94, 96, 124, 132, 136, 146, 148, 161–171, 219,  
 221, 224, 232, 233, 312, 384, 397, 400, 407  
 Multiple reaction monitoring (MRM) ..... 246, 338, 340,  
 342–347

**N**

Necropsy ..... 45, 59  
 Next-generation sequencing (NGS) ..... 349, 400  
 Normalization ..... 195, 242–245, 282–283, 286,  
 381, 383, 390, 393, 397, 414  
 Nuclear magnetic resonance (NMR)  
 spectroscopy ..... 229–254, 260

**O**

Oxygen consumption ..... 304, 306, 307

**P**

Patch-clamp ..... 187–199, 201  
 Pathology ..... 45, 57–59, 62,  
 233, 312  
 Pediatric ..... 25–62  
*Pig-a* assay ..... 143–159, 162–167  
 Potassium channel ..... 187–199  
 Precision-cut tissue slices ..... 259–277  
 Preclinical studies ..... 18, 20–22, 39, 298  
 Protein extraction ..... 176, 338  
 Proteomics ..... 230, 414, 416

**Q**

QT interval ..... 8  
 Quality control (QC) ..... 132–134, 180–181,  
 230, 379–382, 385, 387, 395, 396  
 Quantitative RT-PCR ..... 281

**R**

Rat ..... 19, 25, 35–40, 42, 44–49, 51, 53, 54, 56,  
 61, 62, 73, 76, 81, 85–89, 91, 94, 96, 132, 143–159,  
 162, 219, 221, 232, 233, 238, 261, 264–272, 274, 300,  
 326, 338, 341, 350, 378, 397, 400  
 Rat hepatocytes ..... 267, 297  
 Regulatory guidelines ..... 7–15, 27, 38, 51  
 Relative quantification ..... 281–286, 292, 342, 345  
 Repair endonucleases ..... 173–183  
 Respirometer ..... 299, 306, 307  
 Reverse transcription-polymerase chain reaction  
 (RT-PCR) ..... 163, 167, 281–295, 392, 395  
 RNA extraction ..... 156, 376, 385, 389, 396, 415, 419  
 Rodents ..... 8, 19, 38, 39, 42, 45–48, 51–59, 62,  
 72, 75, 76, 80, 84, 85, 87, 91, 93, 96, 144, 201, 232

**S**

Safety biomarkers ..... 48, 225  
 Safety pharmacology ..... 8, 9, 11, 14, 16–18, 27, 47, 58  
 Safety testing ..... 49, 62  
 Sampling  
     blood ..... 57, 96, 231, 233  
     GC-MS ..... 247  
     LC-MS ..... 231  
     NMR ..... 232, 235  
     urine ..... 87, 231, 232, 380, 386  
 Sampling procedures ..... 72, 86  
 Screening assay ..... 312  
 Sectioning ..... 102–105, 107–110, 112, 130,  
 132–133, 137, 138, 404, 407  
 Staining ..... 102, 104, 110–113, 118, 119,  
 122–125, 127, 129, 131, 134–135, 139, 163–165, 175,  
 178, 179, 400, 409, 410  
 Standardization ..... 102, 115, 123  
 Statistical analysis ..... 52, 247, 263, 281, 318, 384  
 Strand breaks (SBs) ..... 173–175, 179–182  
 Study design ..... 29, 31, 43, 44, 49–50, 59

**T**

Target safety assessment ..... 213–228  
 Teratogen ..... 311, 318, 320  
 Teratogenic index (TI) ..... 318–322  
 Tissue sampling ..... 233–234  
*Torsades de Pointes* (TdP) ..... 188  
 Toxicology ..... 11, 15, 18, 38, 41, 43, 47–49, 51,  
 61, 76, 85, 220, 226, 260, 379, 415

Transcriptomics ..... 312, 416  
 Trimming ..... 72, 73, 77, 86, 87, 96, 97, 102–103,  
 105, 109, 117, 149, 369, 374  
 Trypsinization..... 300, 303,  
 306, 307

**U**

Ultra Performance Liquid Chromatography-Mass  
 Spectrometry (UPLC-MS) ..... 231, 249

**W**

Western blot..... 123, 414–416, 418

**X**

*Xenopus laevis*..... 312–314, 321–323

**Z**

Zebrafish ..... 325, 330, 400
