

Index

A

α -MSH, (*see also* melanocortin and POMC)
effects on human pigmentation, 343
role in regulating human cutaneous pigmentation, 522

A^y mouse

leptin resistance in, 428
obesity phenotype in, 421

ACTH

adrenal growth and development, 362
aldosterone production, 362
extraadrenal actions, 362
insensitivity syndrome, 373

ACTH²[4-10] analogues, 250

ACTH receptor (ACTH-R, MC2-R)

action on adrenocortical cells, 88
binding studies, 76
cloning, 78
expression, 79
ligand binding, 363
mutations, 97
pharmacology, 366
purification, 368
regulation, 83
signal transduction, 364
structure–function studies, 85

ACTH-R gene promoter, 82

Acute unilateral nephrectomy (AUN), 397

Adipocytes, 149

Adrenal androgens, 362

Adrenal cortex, 19

Adrenal growth, 94

Adrenal tumors, 97

Adrenocortical function, 75

Adrenocortical pathology, 96

Adrenocorticotrophic hormone (ACTH), 12

Agouti, 312, 393, 406, 418, 475, 543

active domain, 479

cloning, 475

effects on insulin sensitivity, 422

human, 477

human vs mouse, 479

intracellular Ca²⁺, 319

mRNA in humans, 422

pharmacology, 478

protein structure, 476

role in human pigmentation, 484

role in MC1 receptor regulation, 506

role in mediating insulin resistance, 486

signal transduction, 485

structure and function, 313

suppressors, 544

Agouti obesity syndrome, phenotype, 421

Agouti related protein, 406, 422, 543

Agouti related transcript, 393

Agouti signaling protein (ASP), 393

AGRP, 406, 418, 487

biochemical characterization, 424

expression in *anx/anx* mouse, 424

gene regulation, 427

neuron, 174

neuroanatomic distribution, 422

pharmacology, 424

transgenic mouse 425

Alarm substance, 159

Allgroves syndrome, 373

Angiotensin II, 362

Anx/Anx mouse, 424

Arcuate nucleus, 174

Avoidance behavior, 109, 120

B

β -MSH, 9

Blood-brain barrier (BBB), 242

Blood pressure, 122

Bovine MC2-R cDNA, 370

Brain melanocortin system, 109

C

cAMP, 75

Cardiovascular system, 21

Cattle, *extension* alleles in, 322

Central melanocortin system
 downstream effectors, 429
 Cerebral blood flow, 122
 Chimeric receptors, 394
 Combinatorial screening, 252
 Constitutively activating receptors
 MC1-R, 322
 MC2-R, 377
 Corticotropin hyperinsulinemia, 145
 Cytokines, 175

D

Depressor effect, 123
 DHICA oxidase, 310
 Dopachrome tautomerase, 310

E

E^{so} , 320
 E^{so-31} , 320
 E^{ob} , 320
 Energy homeostasis, 430
 Epilepsy, 125
 Eumelanins, 310
 Eumelanin/pheomelanin switch, 311
 Exocrine gland function, 20, 157
Extension, 312
 brindle and *tortoiseshell* alleles, 540
 extension and *agouti* phenotypes, 313
 extension locus, 310
 Eye, 21

F

Familial adrenocorticotrophic hormone
 resistance, 361
 Familial glucocorticoid deficiency, 96, 373
 with normal MC2-R, 376
 Fat tissue, 19
 Fever, 150
 Fever and inflammation, 117
 Fox, *extension* and *agouti* alleles in, 323

G

G4F cell line, 319
 Genes affecting pigmentation, 310
 Glucose metabolism, 145
 Gonads, 21

Grooming, 110, 112
 Guinea pig, *extension* alleles in, 324

H

Harderian gland, 455
 Human MC1-R, 341, 521
 expression, 342
 expression in non-melanocyte cell
 types, 353
 ligand binding, 343
 mutagenesis, 279
 signaling, 344
 ultraviolet (UV) radiation and, 342
 Hormone resistance, 361
 HS014, 418, 421
 HS024, 418, 421
 HS028, 418, 421
 HS964, 421
 Human MC2-R gene, 368
 Human MC4-R allelic variants, 433
 Human melanoma cell proliferation, 501
 Human pigmentation, evolutionary and
 physiologic aspects, 345
 Hyperpigmentation, 69, 71
 Hypothalamopituitary-adrenal axis, 116

I

Inheritance of red hair, 351
 Inflammation, 150
 Inflammatory cytokines, 152
 Immune system, 20
 Immunoassays, 23
 Immunosuppression in the skin, 17
 Insulin secretion, 146
 Intermedin, 3

L

Ligand binding affinities, 255
 Lipid metabolism, 149
 Lipolysis, 149

M

M3 Melanoma cell line, 375
Mahoganoid, 433
Mahogany, 543, 544
 coreceptor vs cell-adhesion models, 435
 role in MC4-R action, 433

- Mahogany* gene, cloning of, 434
- MC1-R (melanocyte stimulating hormone receptor), 309
- and UV light, 525
 - cell cycle-dependence of
 - expression, 504, 523
 - chromosomal mapping, 215
 - cloning, 212
 - comparison of mouse and human, 528
 - computer modeling of the receptor, 327
 - distribution in CNS, 192
 - expression on normal human melanocytes, 524
 - expression on melanoma cells, 503
 - gene structure, 214
 - in human microvascular endothelial cells, 525
 - in normal human keratinocytes, 525
 - in vitro mutagenesis studies, 326
 - models of activation, 294
 - molecular modeling, 265
 - pharmacology, 214
 - primary sequences, 267
 - regulation, 525
 - regulation by post inflammatory mediators, 523
 - regulation by the cAMP pathway, 522
 - roles outside the regulation of pigmentation, 330
 - structure and function, 312
 - tissue expression, 214
 - up-and downregulation of, 505
- MC1-R variants, 323,324
- human pigmentation, 346
 - in celtic individuals, 350
 - skin cancer, 351
- MC2-R (adrenocorticotropin receptor, ACTH-R), 361
- chromosomal mapping, 221
 - cloning, 219
 - difficulties in heterologous expression of, 372, 541
 - gene structure, 220
 - in adipocytes, 149
 - mouse gene, 370
 - pharmacology, 221
 - promoter, 371
 - regulation, 371
 - tissue expression, 220
- MC3-R, 541
- central sites of expression, 388
 - chromosomal mapping, 223
 - cloning, 221, 385
 - distribution in CNS, 191
 - gene structure, 222
 - genomic localization, 385
 - peripheral sites of expression, 391
 - pharmacology, 223
 - pharmacological properties, 391
 - structure, 386
 - tissue expression, 223
- MC4-R, 405
- actions outside energy homeostasis, 434
 - antagonists, 421
 - antiinflammatory activity, 435
 - antipyretic activities, 435
 - chromosomal mapping, 226
 - cloning, 224
 - developmental expression in the rodent, 409
 - distribution in CNS, 191
 - effects on evoked GABA currents, 430
 - expression, 408
 - gene structure, 224
 - in energy homeostasis, 425
 - knockout mouse, 425
 - mahogany* actions on, 433
 - mRNA distribution in the rat CNS, 410
 - neuroimmunomodulatory roles, 435
 - obesity, 425
 - other roles, 542
 - pharmacology, 225, 416, 426
 - role in cardiovascular homeostasis, 436
 - role in genetics of human obesity, 430
 - role in grooming behavior and the H-P-A axis, 436
 - role in leptin action, 427
 - signaling, 542
 - signaling properties in whole-cell recordings, 430
 - spare receptors, 427
 - structure, 406
 - tissue expression, 225
- MC5-R
- adipocyte expression, 149
 - cloning, 226, 450
 - distribution in CNS, 191

- expression in sebaceous gland, 460
- gene structure, 227
- Harderian gland, 460
- in spinal cord, 464
- lacrimal gland, 460
- mRNA distribution, 453
- pharmacology, 228, 450
- physiological functions, 454
- preputial gland, 460
- regulation of pheromone secretion, 463
- regulation of regulates, 461
- role in porphyrin production, 461
- tissue expression, 227
- MC5-R-deficient (MC5-RKO) Mice, 454
 - sebum production, 458
- Melanocortin
 - agonists, 240
 - antagonists, 246
- Melanocortin peptides
 - agonists, 25
 - antagonists, 25, 417
 - antipyretic activity, 175
 - assays, 22
 - autocrine production, 507
 - behavioral effects, 109
 - binding, 210
 - effects on melanoma cell differentiation, 492
 - effects on melanoma proliferation and metastasis, 499
 - fluorescent, 38
 - history, 3
 - in melanoma cells and tumors, 508
 - in melanoma tumor targeting, 509
 - in melanoma diagnosis and therapy, 510
 - intracellular signaling pathways, 210
 - melanoma, 491
 - metabolism, 145
 - opiate interactions, 119

- Monocyte/macrophage cell line, 342
- MSH
 - α -MSH, 6
 - β -MSH, 9
 - γ -MSH, 9, 122, 156, 199, 385, 541
 - δ -MSH, 12
 - isolation, 70
 - α -MSH, antiinflammatory actions, 153
 - γ -MSH
 - cardiovascular effects, 395
 - immuno-positive fibers, 390
 - natriuretic effects, 397
 - physiology, 395
- MT-I, 240
- MT-II, 241
 - derivatives, 242
 - erectogenic activity, 242
- Mus poschiavinus*, 320

N

Natriuresis, 156
Nerve regeneration, 125
Nucleus of the solitary tract, 174

O

ORG2766, 199
ORG2766 (Met(O₂)-Glu-His-Phe-D-Lys-Phe), 121

P

Panther, *extension* alleles in, 325
Pheomelanins, 310
Pigment migration, 16
Pigmentation, 69
Preputial gland, 455
Proopiomelanocortin (POMC),
 biosynthesis and
 processing, 41
 distribution, 144
 ectopic production of, 507
 evolution, 48
 gene structure, 40
 isoforms and
 mutants, 40
 neurons, 111
 processing, 3
 regulation, 47, 426

R

Receptor binding assays, 23
Recessive yellow (*c*), 320
Reflex natriuresis, 156

S

Sexual and social behavior, 124
SHU-9119, 156, 417, 428, 435
Skin darkening, humans, 522
Sombre mouse, 320
Specificity, 214
STAR protein, 364
Steroidogenesis, 75, 361
Stretching, 110
Stretching and yawning syndrome, 112

T

Ternary complex model, 295
Testicular function, 160
Tobacco mouse, 320
Triple A syndrome, 96, 373
Trophic actions, 17
TRP1, 310
TRP2, 310
Tyrosinase, 310, 311

U

Umbrous mouse, 544
Unidentified receptors, 395

Y

Y-1 adrenal tumor cells, 75, 364
Y6 cell line, 375
Yawning, 110\

Z

Zona fasciculata, 361
Zona glomerulosa, 361
Zona reticularis, 361
