Subject Index

The letters ‘f’ and ‘t’ following the locators refer to figures and tables respectively

A
ABCs, see Aneurysmal bone cysts (ABCs)
Abscess, 120, 363, 366, 370, 376, 387, 389, 394, 426, 449, 631, 632
  brodie, 243, 263, 370
  muscle, 387
  paraspinal or psoas, 452
  soft tissue, 370, 373
AC, see Acromioclavicular (AC)
Achille’s quadriiceps, 93
Achondrogenesis, group 12, 537, 540, 589
  types, 540
Achondroplasia, 12, 540, 548, 565, 566, 567, 572, 589
  group 1, 536–540
    clinical features, 537
    diagnostic appearance, 538–539
    differential diagnosis, 540
    inheritance, 537
    prognosis, 540
    radiological manifestations, 538
Acromegaly, 8, 20, 61–67, 69, 70, 420, 421
  arrow head deformity, increased girth of bones
    of hand, 69f
  diffuse calvarial thickening consistent, 66f
  enlarged sella turcica, 68f
  GH-secreting pituitary adenoma, 63
  heel pad thickness, 69
  macroadenoma with, 65f
  hyperostosis frontalis interna, 67f
  hypertrophic arthropathy, 63
  increased vertebral bodies of thoracic spine, 70f
  non-contrast CT examination of head, 67f
  osteoarthritis of lumbar spine, 70f
  pituitary macroadenoma
    decompression of optic chiasm, 65f
    of sellar origin with suprasellar extension, 64f
    without parasellar invasion, 66f
    radiological manifestations, 63–66
  empty sella syndrome, 63
  enchondral bone formation, 65
  osteoarthritis, 65
  prognosis, 66
  treatment options, 65–66
  thickening of calvarium, 69f
  thickening of lips, 63f
  tufting of fingers, 64f
  widened joints, hook-like projections of distal metatarsal, 69f
Acrometastasis, 303, 304f
Acromioclavicular (AC), 85, 436, 446, 619
Acute chest syndrome, 352
Acute dermal gangrene, see Necrotizing fasciitis
Acute neuropathic or infantile cerebral form, 555
Acute osteomyelitis, radiographic diagnosis of
  factors
    clinical setting, 368
    cortical destruction, 368
    marrow space, 369
Acute pyogenic osteomyelitis, 364, 365f
  in adult, 364
  brodie abscess, 370
  in children, 364
  diagnosis, clinical aspects of, 364
  garre disease, 373
  imaging utility, 373
  infectious agent, 364
  radiological diagnosis, 368
  radiological pathophysiology, 366
  adult osteomyelitis, 367
  pediatric osteomyelitis, 366
  surgical pathology of chronic osteomyelitis, 370
  discitis, 370
Adamantinoma, 291, 293f
surgical pathology, 293
Adipocytic tumors, 316–323
Adult
  fibrosarcoma, 328
Adult (cont.)
  long bone, 3f
  osteomyelitis, 364
AFIP, see Armed Forces Institute of Pathology (AFIP)
“Aggressive” osteoblastomas, 265
AJCC, see American Joint Commission on Cancer (AJCC)
Albers–Schonberg disease, see Osteoporosis
Albright hereditary osteodystrophy, 95
Aluminum toxicity, 88–89
American Joint Commission on Cancer (AJCC), 248
Amphiarthrodial/fibrous, 612
Amyloidosis, 37, 86, 89, 90, 92, 94, 370, 461, 468
Anaerobic species, 394
  Bacteroides, 394
  Clostridium, 394
coliforms, 394
  Enterobacteriaceae, 394
  Klebsiella, 394
  Peptostreptococcus, 394
  Proteus, 394
  Pseudomonas, 394
Anemia, 351, 352, 355, 356, 358, 359
Aneurysmal bone cysts (ABCs), 255, 271, 283, 284f, 285,
  primary ABC, 285
  secondary ABC, 285
  septated cystic mass, 285f
  “solid ABC”, 285
  surgical pathology, 285
Angiolipoma, 316, 317, 334
Angiosarcoma, 261, 279, 280, 283f, 337
  surgical pathology, 280–281
Ankle arthrography, 622, 624f
Ankle joints
  with JRA showing tarsal bone fusion, 449f
  with PVNS showing saucérizations of bone, 477f
  in RA showing uniform joint space, 445f
  saucérizations of bone, 477f
Ankylosing spondylitis (AS), 46, 420, 446, 449, 461, 477, 523
  bamboo spine appearance, 469f
  sacroiliac joints with bilateral complete fusion, 469f
  showing dorsal bursal erosions from bursitis, 472f
  showing syndesmophytes, 467f
  SI joints symmetrically typical, 466f
  of thoracic spine/kyphosis, 468f
Anorexia, 47, 76, 364
Anterior interosseous nerve syndrome, 158
Anteroposterior (AP), 42, 65, 164, 498, 567, 569, 570, 602, 607
Anti-cyclic citrullinated peptide (CCP), 434
AO, see Arbeitsgemeinschaft für Osteosynthesefragen (AO)
AO tube–rod system, 229
AP, see Anteroposterior (AP)
Apert syndrome, 12, 545, 546
  group 30, 545–546
  syndactylysm, 546
Arachnodactyly, 35, 561, 562
  or spider fingers, 562
Arbeitsgemeinschaft für Osteosynthesefragen (AO), 206,
  211, 214, 215, 217, 219, 224, 229, 231, 238
  angled blade plate, 227f
  tubular external fixator system of bridging, 235f
Architectural trusses, examples, 129, 130f
ARCO staging system, 101
Armed Forces Institute of Pathology (AFIP), 242
  AFIP system, 242, 243
Arthrography, technique for
  ankle arthrography, 622
  elbow arthrography, 620
  hip arthrography, 620
  knee arthrography, 621
  shoulder arthrography, 619
  wrist arthrography, 620
See also individual
Arthopathies, systematic approach to, 407
  avascular gouty tophus, 462f
  Boutonnière deformity, 413f
calcium pyrophosphate dihydrate deposition arthropathy, 407
  common ages of, 420t
destructive (inflammatory) arthropathies, 432–473
  amyloid arthritis, 467–468, 473f, 474f, 475f, 476f

  reactive arthritis, 459–461
  rheumatoid arthritis, 432–446
  SAPHO syndrome, 464–465
  septic arthritis, 448–452, 450f, 451f, 452f, 453f, 454f,
    455f, 456f
  spondyloarthropathy of IBD, 464
  hemochromatosis, 431f
  hemophilia, 429–431, 429f, 431f
image analysis
  alignment, 411, 412f, 413f, 414f
  bones, 411–413
cartilage spaces, 413–418, 415f, 416f, 418f
distribution, 418–419f
  extraordinary findings, 419–420
  soft tissue, 409–411f, 412f
  ivory phalanx/periosteal reaction, 414f
miscellaneous joint-related conditions, 477
  chondromalacia patella, 486–487
  DISH, 477–480
  Haglund’s disease, 480–481
  osteochondromatosis, 485–486, 486f, 487f
  scleroderma, 481–484, 484f, 485f, 486f
  needle-shaped crystals of uric acid, 458f
  ochronosis, 431–432, 432f
  prevalence of, 420f
  productive and destructive arthropathies, 474–487
  erosive osteoarthritis, 474, 479f, 480f
  Jaccoud’s Arthropathy, 475–476, 481f, 482f, 483f
  nondestructive and nonproductive arthropathies, 474
  SLE, 475, 481f
  productive arthropathies, 420–426
  neuropathic arthritis, 422–426, 424f, 424t, 425f
  osteoarthritis, 420–422
  sausage digits of toes, 410f
  synovial enhancement of carpal joint, 437f
  synovial joint, 409f
  tibia, intraosseous tophus in, 460f

Arthroplasty
  complications specific to, 512–514
  indications and contraindications to, 508
  types of
    hemiarthroplasty, 500
    osteocapsular arthroplasty, 501
    resurfacing hip arthroplasty, 501
    revision or replacement arthroplasty, 501, 502f
    total joint arthroplasty, 500

Bone density
  bone turnover (remodeling or coupling), 17
  diminished bone density, 17–19
    involutinal osteoporosis, 17
    postmenopausal women, 17
    post-oophorectomy, 17
    premenopausal women, 17
Bone dysplasias, 46, 47, 382, 532, 534, 536, 586
  learning and remembering, 534
  descriptive terminologies in skeletal dysplasias, 534
  pathophysiology, anatomic abnormalities and terminology, 534
  pictures of patients with bone dysplasias, 534
  skeletal aplasias, hypoplasias and malformations, 534–536
Bone formation and degradation
  bone is calcified, 2
  coupling, 1
  matrix formation (osteogenesis), 1–2
Bone healing (callus healing)
  ankle, lateral radiograph of, 226f
  callus bone healing stages, 205
  Coapteur de Danis, fracture fragments compression, 206f
  dynamic compression plate on lateral forearm radiographs, 208f
  dynamic tension band, 223f
  femur creates a bending moment with a tension force laterally, 222f
  fracture fragments, compression of, 217f
  Herbert type headless screws, 214f
  histological appearance of direct bone healing, 207f
  malleable contouring template, 220f
  mortise view of ankle, 219f
  pediatric subtrochanteric osteotomy blade plate, 225f
Bone hypertrophy, 616
Bone island (enostosis), 261, 262f, 285, 596
Bone marrow edema, 104, 111, 112, 369, 449
  syndrome, 104
Bone matrix, 6–7, 11, 12, 18, 31
  components of bone matrix, 7t
Bone metabolism, 1, 5, 15–17, 16, 75, 92
Bone mineral density (BMD), 10, 11, 17, 19, 20, 24–29
Bone morphogenetic proteins (BMPs), 5, 6, 11, 12, 524
Bone neoplasms, 241
groups, 241
Bone remodeling, 8, 11, 12, 17, 96, 152, 290, 366, 417, 586
Bone resorption, 1, 6, 8, 9, 10, 11, 16, 17, 29, 32, 74–76, 78, 130, 204, 231, 290, 297, 303, 306, 384, 500
periodontal, 85
subchondral, 85
subperiosteal, 85
subtendinous and subligamentous, 85
Bone screws
anatomy of, 209f
anchor screws fracture reduction, 211f
ankle showing a compression plate/cortex screws, 210f
cannulated screw, 213f
interference Screw, 213f
lateral proximal forearm radiograph., 208f
locking head screw, 211f
malleolar screw has a trocar shaped tip, 209f
Phillips head mini-screw with a cruciate recess, 212f
poller screw, 212f
schanz screws in pin-type external fixators, 215f
screwdriver, with a hexagonal, 212f

  kyphosis of cervicothoracic spine, 549f
  Trevor disease, 549f
dysplasias, learning and remembering, 534
enchondromatosis (Ollier disease), group 28, 549–551
  endosteal scalloping is noted in several bones, 550f
  longitudinal striations are radiolucent, 550f
  endosteal hyperostosis, hyperostosis corticalis generalisata, group 23, 551
  fibrodyplasia ossificans progressiva, group 28, 551
  fibrous dysplasia, group 28, 551–554
Gaucher disease, 554–556
hyperphosphatasemia
  (juvenile paget disease), group 23, 557
hypophosphatasemia
  group 25, 557–559
  hypophosphatemic rickets, 560
infantile cortical hyperostosis, 560–561
marfan syndrome, 561–562
melorheostosis, group 22, 562
metaphyseal chondrodysplasia, 564–566
metaphyseal dysplasia, 562–563
metatropic dysplasia
  group 11, 566–567
mucolipidosis III, group 26, 571
  multiple epiphyseal dysplasia, 571–573
mucolipidosis type II, group 26, 571
mucopolysaccharidosis
  group 26, 571
  I H, 567–569
  II, group 26, 569
  IS, group 26, mucopolysaccharidosis IH/S, 569
  IV, group 26, 569–570
  VII, group 26, 571
multiple hereditary cartilaginous exostoses, 573–575
neurofibromatosis, 575–577
order of selected entities, 537t
osteogenesis imperfecta, 578–582
osteolysis, torg syndrome, group 27, 582
osteopathia striata with cranial sclerosis, 582
osteopetrosis, group 22, 582, 584f, 585f
  bone modeling, 586f
  osteopoikilosis, 585, 587f
progressive diaphyseal dysplasia, group 23, 546
  calvarium thickening and increased bone density, 547f
  dense vertical sclerotic striations, 547f
pseudarthrosis, 577–578
pseudoachondroplasia, group 8, 586
pyknodysostosis, group 22, 586–589, 587f, 588f
SADDAN, group 1, 589
spondyloliphepysyal dysplasia
  spondyloephipyal dysplasia congenita, 589
spondyloepiphyseal dysplasia tarda, 589
thanatophoric dysplasia, group 1, 589–593
Skeletal dysplasias with emphasis, systematic approach (cont.)
tuberous sclerosis complex, 593–597
unclassified metaphyseal chondrodysplasia, 566f
Skeletal fluorosis, 48, 50
Skeletal lesion biopsy, technique for, 626
Skeletal muscle tumors, 332–333
Skeleton
bone tissue formation, 1
coupling, 1
modeling, 1
SL, see Scapholunate ligaments (SL)
SLE, see Systemic lupus erythematosus (SLE)
