

SUBJECT INDEX

A

- Acetoamido-4'-maleimidylstilbene-2-disulfonic acid
disodium salt (AMS) 66, 70, 74, 76, 88,
95–97
- Alkaline phosphatase (PhoA) 104–113, 115, 157–171,
226–228, 230–234, 247
- Amber suppressor tRNA 219, 221–223, 226–236
- AMS gel-shift 66, 74
- Autotransporter 4, 8, 13

B

- Basal body 3, 242
- Beta barrel assembly machinery (BamA) 8, 13

C

- Cardiolipin 155
- Chaperone 2, 5, 7, 9, 12, 16, 131, 173–174, 178,
192, 196, 207–209, 234, 242–244, 308–309,
312–314, 317, 366, 368, 412, 414, 428
- ChloroP 292–293
- Coatome 378
- Co-translational translocation 340–341
- Cross-linking 5, 15, 217–238, 311, 313–314, 328, 394
- Cysteinylyl residue 40

D

- Denaturing conditions 381
- De novo prediction 296–299
- Digitonin 353, 362, 390–391, 394, 399,
419–420, 426–429, 431–432, 434
- Dihydrofolate reductase (DHFR) 427, 429, 431, 433
- Disulfide relay 412

E

- Effector 3, 7, 10, 13, 15, 241–255
- Electron paramagnetic resonance spectroscopy 173–189
- Energetics 158, 323–337
- Enthalpy change 192, 207
- Equilibrium dissociation constant 207
- ER-associated degradation (ERAD) 365–375
- ER membrane 341, 349, 355, 366, 389

F

- Floatation 350–351
- Fluorescence 48, 57, 62, 91, 135, 137, 140, 243–244,
246, 251–252, 325, 330–331, 333–335, 404
- Fluorescent lipid analog 134
- Fluorescently labeled peptide 22

- Foldase 12
- Free energy of protein transport 324

G

- Gram negative bacteria 2–4, 7–8, 12, 16, 25, 117,
241–242, 287, 289–290, 293
- Green fluorescent protein (GFP) 193, 243–244, 404
- Guanine-nucleotide exchange factors (GEFs) 377

H

- Haemolysin 7, 14
- Hidden Markov models (HMMs) 271–283, 291
- Homology-based inference 286, 295–296

I

- Image analysis 24, 252
- Immunofluorescence 243, 403–410
- Import receptor 308–309
- Injectisome 9–10, 241
- Insertase 2, 4–6, 8, 12–13, 39–40, 63
- Integral membrane proteins 2–3, 5–6, 11, 15, 66, 94,
103, 312, 315
- Ion-exchange 27
- Isothermal titration calorimetry (ITC) 174, 192, 196,
207–211, 213
- In vivo* assay 104

J

- Juxtannuclear Golgi 404

L

- LipoP 291–293
- Lipoprotein 11, 22, 118–121, 123, 125–127, 291, 293
- Liposomes 40, 45, 47–48, 56–62, 132–135, 137–138,
141, 146, 310, 348, 353–354, 356, 362
- LOChom 292, 295–296
- LOCKey 296–297

M

- Machine learning 286, 291, 300
- Mature protein 22, 26–27, 31, 36, 104
- Membrane protein complex 258, 266, 353
- Membrane proteome 257–268
- Membrane vesicles 14, 40, 48, 132–133, 135–137,
168, 199, 219–221, 225–226, 230–236, 324
- Microsomes 341, 344, 348–352, 356, 358–359,
366–375, 394
- Misfolded proteins 341

- Mitochondrial intermembrane space (IMS) 411–412,
414, 425, 428, 434
Mitochondrial protein translocase 3
Mitosome 273, 282
- N**
- Nanodiscs 145–155
Native gel 148, 150, 154–155, 314, 429–430, 432
Needle complex 242
N-glycosylation 390, 394, 398
Nickel affinity chromatography 27
Nitroxide side chain 176–177, 180
Non-ionic detergent 90–91, 96, 257, 267, 426
Nuclear localization signals (NLS) 288, 291–292,
294–295
- O**
- Oligosaccharyltransferase (OST) 389–390, 398
- P**
- PBAD vector 253
Periplasm 2–12, 103–115, 118, 126, 192–193, 196,
198, 206, 242, 289–290, 411–412
Permeabilization 95, 395, 399
Phosphatidylcholine 155
Phosphatidylglycerol 155
Phosphopeptide 309
Photocross-linking 217–219
Plastid 311–316, 324
PORTRA domain 4
Post-translational translocation 158, 341
PredictNLS 291–292, 294
Preprotein 6, 21–22, 26, 31, 36, 69, 103, 145,
157–171, 217–238, 308–316, 426–427, 429,
431–433
Protein import 273, 276, 282, 307–317, 412–417,
425–435
Proteoliposomes 126
Proteome Analyst 296–297
Proton motive force (PMF) 5–7, 324–325
PSORT 292, 297–300
- R**
- Real time secretion tracking 241–255
Refolding 28, 35
Reticulocyte Lysate 328, 342, 346, 359, 392, 397–398,
412, 414, 427, 430–431, 434
Retrotranslocation 340–341, 350, 366
- S**
- SecA ATPase 2, 180
Secretin 4, 7, 9, 15, 242, 251–252
Secretion signals 2, 12, 14, 243
Secretion systems 2, 10, 13, 15, 290
Secretory protein 131, 218, 291, 341, 389, 401
Sec-translocase/translocon 2, 4–12, 16, 145–155,
173–174, 179–180, 218, 307–313, 315–316,
341
SecYEG channel 16
SignalP 292–293, 300
Signal peptidase (SPase) 21–28, 30–32, 34–36, 73, 205,
287, 349
Signal recognition particle (SRP) 2, 6, 8, 11, 218,
289–290, 317, 324, 340–341
Signal sequence 2, 5–7, 16, 22, 103–106, 112,
158, 168, 243, 292, 328, 341, 349
SiRNA-mediated knockdown 390, 393, 396
Sorting and Assembly Machinery (SAM) 428
Sorting signals 287–294, 298–299
Spheroplast 65, 68–69, 73, 76, 118–122, 124–125,
127–128, 369, 375
Spin labeling 173–189
Stromal processing peptidase (SPP) 316–317
Substituted-cysteine accessibility method as applied to
transmembrane domains (SCAMTM) 87
Sucrose density gradient 120–121
Sucrose gradient centrifugation 118, 221, 225, 426, 429,
432–433
Sulfhydryl oxidase Erv1 412
Support vector machine (SVM) 292, 298–299
Suppressor mutation 105, 115
- T**
- TargetP 291–293, 300
TatP 291–294
Tetracysteine-FIAsH 241
Tetratricopeptide repeats (TPR) 309, 312, 314
Thiol-disulfide exchange 411, 415
Thylakoid Membrane 317, 323–337
Tim proteins 412, 428
TolC 4, 7, 14
Transit sequence 307, 309, 317
Translocase of the Outer mitochondrial Membrane
(TOM complex) 428
Transmembrane spanning regions 2, 6, 11
Transport vesicles 377
Twin-arginine translocation (Tat) 2–3, 6, 8–9, 15,
191–214, 218–219, 226, 230–235, 237–238,
290, 293–294, 317, 324, 392
Two-dimensional blue native (2D BN)/
SDS-PAGE 257–258, 265, 267
Two partner system 4, 8
Type I (ABC) 2–5, 7–8, 13–14, 21–22, 290
Type III Secretion 9, 241–242
Type IV 2–4, 7–9, 15, 290
- U**
- Ubiquitination 340–341, 365–375
Unilamellar 40, 45, 56, 58, 137, 362
Usher 4, 9–10
- V**
- Valinomycin 45–48, 57, 59, 327, 332–333, 427
Vesicle SNAREs (v-SNAREs) 378
- Y**
- YacT 3–4, 13
YidC 2, 5–6, 11, 15, 40–41, 45–47, 49, 54, 56–58,
63–73, 75, 218
