

# SUBJECT INDEX

## A

Ablation . . . . . 145, 246–247, 260, 263, 266, 268, 271, 274  
 Abstinence . . . . . 163, 166, 171, 173, 175–176  
 Acanthocephalans . . . . . 19  
*Acanthostomum* . . . . . 19  
 Acclimatisation . . . . . 35  
 Acetylcholine . . . . . 90, 167, 174, 176, 184, 191, 193  
 receptors . . . . . 90, 174, 176  
 Acetylcholinesterase . . . . . 167, 184, 191, 193–194  
 AChE inhibition . . . . . 184, 198  
 Achiasmatic . . . . . 85  
 -induced oculomotor . . . . . 85  
 Achromatic patterns . . . . . 231  
 Agitated swimming . . . . . 18  
 Airstones . . . . . 189  
 Alarm cue released . . . . . 214, 217  
 epidermal alarm cue . . . . . 214  
 Alarm pheromone . . . . . 52, 63, 74, 80–83, 85, 187  
 Alarm response . . . . . 18, 33, 49, 63–64, 67, 277  
*Alcedo atthis* L. . . . . 18  
 Alcohol preference . . . . . 119, 145–146  
 Alcohol sensitivity . . . . . 144–145  
 Allocentric navigation . . . . . 245  
 strategies . . . . . 245, 247  
 Alzheimer's disease . . . . . 66  
 Amphetamine . . . . . 166–168, 171, 198  
 Amygdala . . . . . 166–167, 198, 200, 224  
 pallium . . . . . 224  
 Anamniotes . . . . . 166  
 Andrenocorticotrophic hormone . . . . . 76  
 Anhedonia . . . . . 182  
 Animal tropisms . . . . . 257  
 Antagonistic behaviour . . . . . 37  
 Anthropogenic . . . . . 34, 62  
 Anthropomorphic . . . . . 61, 257  
 Anthropomorphism . . . . . 257  
 Antipredator advantages . . . . . 105  
 Anxiety response . . . . . 74, 95, 198, 200  
 Anxiolytic . . . . . 82–83, 95–97, 120, 187, 199–200  
*Aplocheilus panchax* . . . . . 17  
 Aquatic ecosystems . . . . . 147, 189  
 Arachnids . . . . . 16  
*Ardeola grayii* (Sykes) . . . . . 18  
 Artificial duplications . . . . . 103  
*Astronotus ocellatus* . . . . . 81  
*Astyanax fasciatus* . . . . . 238  
 Atlantic salmon . . . . . 64, 236  
 Atorvastatin . . . . . 146  
 Autism . . . . . 34  
 Autochthonous . . . . . 249  
 Automated video tracking . . . . . 83  
 software . . . . . 83

Autoradiograms . . . . . 189, 190, 194  
 Aversive stimulus . . . . . 214, 226, 229, 276

## B

Backcross . . . . . 110–111, 116, 121–122  
 Back-tracing . . . . . 244  
*Bathygobius soperator* . . . . . 238  
 Behavioral endpoints . . . . . 75–77, 84, 186, 201–202  
 Bel . . . . . 85  
 Bend movement . . . . . 256, 272  
*Betta splendans* . . . . . 146–147  
 Biogenic amine systems . . . . . 184, 186, 188, 196, 200  
 Blinded pike-naïve . . . . . 214  
 Blue long-fin . . . . . 147  
*Brachydanio* . . . . . 3, 5  
*Brachydanio frankei* . . . . . 5  
 Breeding . . . . . 6, 37–38, 105, 107,  
 110–111, 245  
 Brook stickleback . . . . . 218–219  
 Bulbectomy . . . . . 52  
 Burst swims . . . . . 254  
 Buspirone . . . . . 95  
 Butterflyfish . . . . . 237  
 BXD RI . . . . . 111

## C

*Caenorhabditis elegans* . . . . . 145, 186  
 Capture swim . . . . . 254, 274  
 Cardinalfish . . . . . 54, 62  
 Carp . . . . . 146  
*Centrocestus* . . . . . 19  
 Cestodes . . . . . 19  
 Chaetodontidae . . . . . 237  
 Chlordiazepoxide . . . . . 95, 120  
 Chlorpyrifos . . . . . 182–184, 186–187, 189,  
 192–193, 196–199, 201  
 Clownfish . . . . . 54, 62  
 Clozapine . . . . . 146  
 Clutch size . . . . . 20  
 Cocaine . . . . . 33, 82–83, 95, 146, 166–168, 171, 186  
 Cochlea . . . . . 238  
 Cognitive maps . . . . . 236, 238–239, 245–247  
 Color discrimination learning . . . . . 90, 223–232  
 procedure . . . . . 225  
 Conditioned place preference . 33, 163–177, 184, 186, 198,  
 252, 282  
 paradigm . . . . . 33, 164, 169, 186  
 Conditioning apparatus . . . . . 164, 169–170  
 Confusion effect . . . . . 105  
 Context-appropriate behavior . . . . . 212  
 Convict cichlids . . . . . 146

Corticotropin . . . . . 76  
 releasing hormone . . . . . 76  
 Cortisol assay . . . . . 76  
 Courtship . . . . . 22–23, 34, 126, 252  
 C-shaped movement . . . . . 256  
 C-start . . . . . 256  
 Cyclic swimming . . . . . 254  
 Cyprinid . . . . . 17, 23  
 Cyprinidae . . . . . 3

**D**

*Danio*  
*D. aequipinnatus* . . . . . 17  
*Danio dangila* . . . . . 4, 17  
*Danio kyathit* . . . . . 15  
*D. meghalayensis* . . . . . 17  
 Decapitated . . . . . 189  
 Dependence . . . . . 163–177  
 Desensitization . . . . . 92, 94, 176  
 Desipramine . . . . . 185–186, 199  
 Detritus . . . . . 16  
*Devario*  
*Devario assamensis* . . . . . 17  
*Devario devario* . . . . . 17  
*Dhani* . . . . . 3  
 Diazepam . . . . . 79, 82, 95  
 Dieldrin . . . . . 187, 189–190, 193–197, 199  
 Diencephalon . . . . . 185, 201  
 Digeneans . . . . . 19  
 Dihydro- $\beta$ -erythroidine . . . . . 97  
 Dimorphism . . . . . 24, 38  
 Diplostomoid . . . . . 19  
 Directly cued . . . . . 245–246  
 Dissecting . . . . . 2, 66, 103, 110, 275  
 microscope . . . . . 2  
 Dominance hierarchies . . . . . 26–27, 37  
 Dopamine . . . . . 52, 93–94, 166–167,  
 175–176, 183–186, 190, 201–202, 262–263  
 transporter . . . . . 183, 190, 202  
 Dragonfly . . . . . 259  
*Drosophila* . . . . . 2, 32, 60, 118, 121,  
 125–127, 135, 145, 151, 252  
*melanogaster* . . . . . 145

**E**

Ecological space . . . . . 212  
 Eggbound . . . . . 20  
 Egocentric . . . . . 237, 239, 241, 245–247  
 Electric shock . . . . . 31, 187, 230, 232  
 Electro-olfactograms . . . . . 52  
 Elevated plus maze . . . . . 96, 120, 128,  
 186–187, 192, 198–199  
 Epidermal cells . . . . . 18, 81  
 Erratic movement . . . . . 75, 81, 85  
 Esomus danricus . . . . . 17  
 Ethologists . . . . . 252  
 Extinction training . . . . . 166, 170

**F**

Face-relevant model . . . . . 164  
 Fathead minnows . . . . . 184, 187, 214–217, 219  
 Fertilization . . . . . 50, 55, 60, 145, 250–251  
 Fetal Alcohol Spectrum Disorders . . . . . 144

Foraging . . . . . 23, 26–29, 32, 105,  
 108–109, 118, 126, 185, 212–213, 228  
 Four-arm maze . . . . . 239, 246  
 Frequent situs inversus . . . . . 34  
 Freshwater garfish . . . . . 17

**G**

GABAergic neurons . . . . . 175–176  
 Gallus gallus . . . . . 107  
 Gamma-irradiated . . . . . 34  
 Gasterosteus aculeatus . . . . . 237  
 GBR 12909 . . . . . 187, 189–190, 193, 196  
 Genetic-based predator anxiety . . . . . 81  
 Genital papilla . . . . . 5  
 Glowlight tetras . . . . . 219  
 Gluconeogenesis . . . . . 76  
 Gobiid fish . . . . . 238–239  
 Goldfish . . . . . 48, 55–56, 146, 187, 216,  
 224, 230, 236, 239, 245–246, 268, 271  
 Graphpad . . . . . 171  
 Green light . . . . . 228–229, 231  
 Guppies . . . . . 25, 35, 38, 105–106, 131

**H**

Hallucinogens . . . . . 82  
 Hatching . . . . . 2, 16, 19, 21, 25, 220, 250, 259  
 Heterospecific . . . . . 26, 35, 217–219  
 High fecundity . . . . . 16, 84, 145  
*H. Medicinalis* . . . . . 28  
 Hydrodynamic swimming . . . . . 105  
 Hypothalamus-Pituitary Interrenal (HPI) . . . . . 76  
 hypothalamus-pituitary-adrenal (HPA) . . . . . 76  
 Hypoxanthine 3-N-oxide . . . . . 81

**I**

Immediate early genes . . . . . 54  
 Imprinting . . . . . 26, 50, 53–54, 277, 281–282  
 Indian Leaf Fish . . . . . 80–81  
 Inhibitory avoidance trial  
 experimental model . . . . . 230  
 paradigm . . . . . 230  
 task . . . . . 232  
 Internal representation of order . . . . . 238  
 Interplexiform . . . . . 51–52  
 Intraperitoneal saline injection . . . . . 226  
 Iridophores . . . . . 4

**J**

J-shaped dose-effect . . . . . 91  
 J-turn . . . . . 254, 256, 273  
 Juvenile char . . . . . 49

**K**

Kin preference . . . . . 50, 277

**L**

Lacepède . . . . . 18  
 Landmark navigation strategy . . . . . 237  
 Largemouth bass . . . . . 18  
 Larval maturation . . . . . 254  
 Learnt behaviors . . . . . 173

- Leopard ..... 5, 26, 83, 147, 150  
Lhx2 ..... 85  
Light penetration ..... 236  
Longfin ..... 5, 26, 147  
    striped strain ..... 83
- M**
- Magnetic fields ..... 236  
Mammalian models ..... 2, 171  
Many eyes ..... 105  
Mastacembelids ..... 18  
Mazindol ..... 190  
Meandering ..... 76, 78  
Mecamylamine ..... 92–94, 97, 169–170, 174–175  
Medaka ..... 106, 108  
Mesocosm ..... 24  
Mesolimbic dopaminergic system ..... 164, 166  
Methyllycaconitine ..... 97  
Mexican cave fish ..... 238  
Microarrays ..... 144  
Microrasbora ..... 4  
Microsatellite markers ..... 103  
Microvillous sensory neurons ..... 48  
Minnows ..... 105, 184, 187, 213–217, 219–220  
Mirror stimulus ..... 36  
Model ..... 1–3, 103–104, 166–168, 225–229  
    organism ..... 1–2, 103, 126, 185, 200, 244  
Monophyletic ..... 4  
Monopolise matings ..... 24  
Multiple Hit Hypothesis ..... 183  
Mutagenesis ..... 2, 5–6, 32, 84, 126, 158, 168, 177  
Mystus bleekeri ..... 18
- N**
- Nandus nandus* ..... 18  
National Institute on Alcohol Abuse and Alcoholism ..... 144  
National Longitudinal Epidemiologic Survey ..... 144  
Nematode ..... 19, 145, 186  
Neurodegeneration ..... 182, 201  
Neurotoxicological ..... 182, 200  
Neurotoxins ..... 186, 201  
*Nevermind* ..... 84  
Nicotinic  
    agonist ..... 89  
    antagonist ..... 93–94, 97, 174  
Nicotinic  
    nicotine hydrogen tartrate ..... 90, 96  
    nicotine-induced anxiolysis ..... 97  
    nicotine-induced learning improvement ..... 92, 94  
*Nimbochromis compressiceps* ..... 18  
Norepinephrine reuptake inhibitor ..... 186–187, 199  
Notopterus notopterus ..... 18  
Novel tank  
    diving ..... 74–77, 81–82, 84, 95–98  
    diving paradigm ..... 74–76, 81  
Nucleus accumbens ..... 166–167, 176
- O**
- O-bend responses ..... 256, 271–272, 279  
Oceanic reef fishes ..... 54  
Odonate larvae ..... 18  
Odor plumes ..... 50, 58  
Olfactory  
    epithelia ..... 48–49, 52, 276  
    sensory neurons ..... 48–49, 61, 63, 66  
    sensory system ..... 47–53, 55–56, 60, 63–64, 66  
Oligonucleotide ..... 101, 103, 201  
Ontogenetic ..... 186, 212, 277  
Oophagous ..... 18  
Open field ..... 74–76, 95, 120, 128, 252  
Operculum ..... 4  
Organ damage ..... 145  
Organochloride ..... 184, 188, 196–197, 200  
Organophosphate ..... 182–184, 188, 196–198, 200  
Orthologs ..... 84, 158  
Oryzias latipes ..... 106  
Oscar fish ..... 80–81  
*Otx2* ..... 53–54  
Oviposition ..... 22–25, 38
- P**
- Parkinson's disease ..... 66, 182–183, 200–202  
Pauperized ..... 47  
Pavlovian stimulus ..... 164  
Perinatal ..... 182  
Perivitelline ..... 21  
Permethrin ..... 189, 193, 197  
Perspex divider ..... 169–170  
Pharmacokinetic ..... 144, 149, 158, 197  
    pharmacological impairment ..... 186  
Phenotypic modifications ..... 106  
Phenylethyl alcohol ..... 53, 277  
Pheromones ..... 20–24, 38, 48, 55–56, 187, 212  
Phylogenetically ..... 90, 217, 283  
Pike odor ..... 214–216, 218–219  
    pike-naive fathead ..... 215  
Piloting ..... 237  
Plastic barrier ..... 228, 231  
Pleiotropic effects ..... 103  
Polymorphic molecular markers ..... 102  
    polymorphic markers ..... 6, 102  
Post-mitotic neurons ..... 251  
Potter Elrethjem homogenizer ..... 191  
Predation avoidance reaction ..... 95  
Predator identity ..... 215, 219  
Predator inspection ..... 28, 104–107, 109, 130, 219  
Pre-incubation ..... 169  
Prey guild ..... 217, 219  
Prey-seeking responses ..... 167  
Primitive pallium ..... 224  
Proliferative behavior ..... 145  
Prototypic ..... 89  
Pseudogenes ..... 48  
*Pseudoloma*  
    *Pseudocapillaria tomentosa* ..... 19  
    *Pseudoloma neurophilia* ..... 19  
Psychostimulant ..... 184  
Pyrethroid ..... 184, 188, 197
- Q**
- Quantitative Trait Nucleotide  
    QTL genotypes ..... 102, 115, 121, 134  
    loci ..... 34, 102  
Queen Mary wild-type zebrafish ..... 168–169
- R**
- Recombinant inbred lines ..... 110–111  
Red lamp ..... 228

Refugia . . . . . 28, 37  
 Reinforcer . . . . . 232  
 Reinstatement . . . . . 166, 168, 171, 176–177  
 Releaser-induced recognition . . . . . 213–215  
 Response-contingent . . . . . 164  
 Rival trigger . . . . . 212  
 R-turns . . . . . 255–256

**S**

*Salmo salar* . . . . . 64, 108, 236  
*Salmo trutta* . . . . . 64, 108  
 Schooling . . . . . 105, 215, 238, 267  
*Schreckstoff* . . . . . 214  
 Segregating . . . . . 106, 110, 119, 122, 128  
 Sequenced genome . . . . . 146–147, 150, 158, 168  
 Serotonin transporters . . . . . 183, 185, 189  
 Sham operation . . . . . 246  
 Shoaling  
   shoal cohesion . . . . . 18, 33  
   shoaling and predator inspection . . . . . 104–107  
   shoaling tendency . . . . . 28–29, 33, 105–106,  
     109, 129–130  
 Shotgun data . . . . . 104  
 Siamese fighting fish . . . . . 146  
 Spatial  
   cognition in zebrafish . . . . . 235–247  
   constancy . . . . . 245–246  
   navigation experiment . . . . . 235–236  
 Sphingosylphosphorylcholine . . . . . 85  
 Spinal cord pattern generators . . . . . 256  
 Startle reaction . . . . . 147–148, 153–154  
 Sticklebacks . . . . . 38, 49–50, 237, 240, 252  
 Struggle maneuver . . . . . 256  
 Subclades . . . . . 4  
 Swordtail . . . . . 18  
 Symmetrical sinusoids . . . . . 253  
 Sympatric predator . . . . . 18, 80–81, 83

**T**

Telecephalon . . . . . 90  
 Telencephalic ablation . . . . . 246  
 Thigmotaxis . . . . . 74–75, 95, 281  
 Tilapia . . . . . 214, 216  
 T-maze . . . . . 24, 32–33, 242–244  
 Toxicological screening . . . . . 187  
 Transgenesis . . . . . 84  
 Transition period . . . . . 250  
 Translational value . . . . . 82  
 Tritium . . . . . 190  
 Tuberculum . . . . . 166, 167, 201

**U**

Urogenital papillae . . . . . 34

**V**

Visual cues . 26, 29, 129, 169–170, 237, 240, 245–246, 265,  
 275, 281  
 Visual discrimination . . . . . 32, 90  
   learning . . . . . 32, 90  
 Visual spectral response . . . . . 50  
 Voltage-dependent anion channel . . . . . 147  
 Vomeronasal receptors . . . . . 48

**W**

Wall hugging . . . . . 95  
 Weaponry . . . . . 214  
 Wild 3-spined sticklebacks . . . . . 237  
 Withdrawal syndrome . . . . . 82–83, 165

**X**

Xanthophores . . . . . 4  
*Xenotodon cancila* . . . . . 17–18  
*Xiphophorus helleri* . . . . . 18
