

INDEX

A

- Ab-initio.....226, 232–234, 286, 287, 292, 293, 295–299
- Antibodies 7, 69, 143, 144, 146, 158, 159, 207–210, 212, 215, 247, 249, 252, 254, 255, 257, 269, 270, 279, 959
- Atomic force microscopy (AFM) 7–10, 47, 59, 81, 83–86, 97, 98, 144, 179–190, 269, 270

B

- Bio-fabrication238
- Bioglasses 286, 298, 299
- Biomaterials..... 2, 6, 10, 11, 17–19, 39–47, 51–53, 55, 68, 89, 132–134, 142, 143, 145, 165–167, 179, 180, 223, 224, 226, 285–299
- Biomolecules3, 4, 7, 9–11, 39–47, 52, 53, 62, 64, 65, 69, 89, 90, 93, 102, 114, 148, 166, 180, 182, 184, 194, 207–220, 233, 246, 250, 254, 255, 257, 259, 269, 270, 286, 292, 294, 296
- Bio/non-bio interactions 179–190
- Bioreactor224–226, 230, 236–238
- Biosensors.....68, 167, 179, 193, 208, 210, 216, 218
- Biosurface 163–177
- Boron nitride nanotubes 193–205
- Bottom-up..... 5, 6, 10, 18, 166, 236–241

C

- Car–Parrinello 287, 296–298
- C2C12 cell line..... 195–196, 202
- Cell adhesion 18, 53, 55, 57–59, 61, 62, 66, 68, 69, 129, 229
- Cell material interaction..... 31, 227, 229
- Cell membrane 9, 66, 200, 247, 252, 255, 259, 269, 277–279
- Cell membrane organization268
- Cell metabolism..... 223
- Cellular uptake 194, 255, 256
- Ceramic 132–134, 285
- Chemical force microscopy (CFM)..... 179
- Chitosan 115, 116, 129, 133, 194
- Collagen 58, 103–105, 106, 108, 110, 115, 129, 132, 225, 227–229, 237, 239, 286, 307
- Composites.....9, 61, 128, 132–136

- Computer simulations286
- Contact angle 163–169, 172–174, 176, 189
- Core-shell nanofibers 131, 139
- Cytocompatibility..... 193–205
- Cytotoxicity 61, 252–254

D

- Dextran sulfate (DS) 116–118, 120–122, 124, 196
- DNA.....7, 10, 19, 21–26, 28–30, 34–36, 61, 69, 90, 93, 98, 166, 193, 196–197, 200, 202–205, 209, 269, 305, 309, 313
- Drug delivery..... 9, 13, 18, 53, 54, 61, 68, 114, 115, 123, 145, 194, 259

E

- Elastin-like polypeptides (ELPs)..... 59, 67–69
- Elastin like recombinamers (ELRs)..... 18–20, 22–36
- Electrospinning 127–139
- ELISA. *See* Enzyme linked immunosorbent assay (ELISA)
- Ellipsometry 142, 143, 145–147, 150–151, 154–156
- ELSI. *See* Ethical; Legal; Social issues
- Endocytosis201, 252, 255, 256
- Enzyme linked immunosorbent assay (ELISA) 116, 119, 121, 123, 141, 143, 210, 219
- Ethical 12, 303–314

F

- Fmoc-*O*-succinimide..... 42, 45
- Force fields 286, 294–296
- Fourier transform infrared (FTIR) spectroscopy..... 121–122, 143
- Freeze-drying 119, 123

G

- Gelation..... 18, 45–47, 110, 229
- Genetically Engineered Protein Polymers 17–37
- Gold nanoparticles9, 91, 95, 214, 216, 217, 220, 279
- Grafting-from 64, 65

H

- Health care disparities 312–313
- Hepatocyte growth factor (HGF) 113–124

High-throughput cell culture 101–111
 Hybrid fibres 134
 Hydrogel..... 31, 32, 55, 58, 60,
 101–111, 225, 229, 233–235, 237
 Hydroxyapatite 133, 134

I

Insulin..... 60, 116, 120, 121, 124, 196
 In-vivo imaging 251, 257–259, 280
 Iodogen method 145
 Ionic strength 52, 59, 60, 68–69, 219
¹²⁵I radiolabelling 142–145, 149–154

L

Legal..... 12, 303–314
 Living cells 62, 194, 249,
 268–270, 273, 277, 307
 Localized surface plasmon resonance
 (LSPR) 209, 210, 212, 213, 216–219
 Luminescence..... 247, 251, 258

M

Matrix-assisted laser desorption/ionization
 (MALDI) 41, 43, 47
 Microarrays..... 10, 166
 Micro-contact printing..... 65, 79–87, 102, 105, 106
 Microfabrication..... 58, 101, 103, 105–107, 109, 237
 Micro-molding..... 102, 103, 105, 106, 110
 Microscopic contact angles..... 164–168, 172–174
 Microwell arrays 101–111
 Modelling..... 233, 236
 Molecular dynamics..... 285–299

N

Nanocrystals 134, 245, 246, 249, 250, 252, 259
 Nanofibers 45–47, 127–129, 131–137, 139, 307
 Nanoimprint lithography..... 80, 82
 Nanomedicine 12, 13, 53,
 245, 281, 303–314
 Nanoparticles..... 8, 9, 11, 13, 18, 33, 68, 89,
 91, 95, 114, 115, 118–124, 133, 134, 136, 142,
 208–210, 214, 216, 217, 219, 220, 245, 246, 248,
 251, 252, 257, 279, 281, 304–307, 309
 Nanophotonics 267–281
 Nanostructured fibers 40
 Nanotechnology 1–14, 22, 31, 114, 115,
 128, 165, 245, 268, 281, 304–307, 309, 310
 Near-field optical microscopy..... 269–271, 273–279, 281
 Nucleic acids..... 9, 19, 21

O

Oligonucleotides 19, 21, 23, 24, 34, 35, 89–99
 Oral administration 115, 120

P

PCL. *See* Polycaprolactone (PCL)
 PDMS. *See* Poly(dimethylsiloxane) (PDMS)
 PEG. *See* Poly(ethylene glycol) (PEG)
 Peptide amphiphiles (PAs) 40–47
 Peptide synthesis 40–43
 Photoiniferter 71, 72, 105, 106
 pH responsive films 60
 Piranha solution 71, 73, 81, 92, 95, 154
 PLA. *See* Polylactic acid (PLA)
 Plasmon..... 208, 209, 212, 213
 PMMA. *See* Poly(methyl methacrylate) (PMMA)
 PNIPAM. *See* Poly(N-isopropylacrylamide) (PNIPAM)
 Polycaprolactone (PCL), 129, 132, 133, 135
 Poly(dimethylsiloxane) (PDMS) 79, 80, 85,
 102, 103, 105–110
 Poly(ethylene glycol) (PEG)..... 62, 101–111, 181, 237,
 250–252, 254, 255, 257
 Polylactic acid (PLA), 132–136
 Polymer 6, 9, 10, 17–37,
 51–73, 115, 128, 129, 132–134, 136, 138, 145, 149,
 166, 167, 194, 250, 251
 Polymer brush..... 63–69, 71
 Polymer film 53–65, 69, 151, 190
 Poly(methyl methacrylate) (PMMA) 69, 80–86
 Poly(N-isopropylacrylamide) (PNIPAM) 52, 55–60,
 62, 66, 67, 71, 73, 166
 Protein..... 6–10, 17–37, 39, 51, 53, 56, 58, 59,
 61, 65–69, 79–87, 102, 105, 106, 110, 113,
 115, 116, 119–122, 124, 132, 141–147, 149–156,
 159, 166, 180–182, 184, 185, 187, 189, 193,
 196–197, 200, 202–205, 208, 209, 216, 225,
 247, 249, 252, 254–256, 258, 268, 269, 272,
 273, 277, 279, 306
 Protein adsorption 68, 129, 141–160, 179

Q

Quantum dots 9, 194, 195, 197, 201, 245–259, 277
 Quartz crystal microbalance (QCM)..... 147

R

Recombinamers 17–37
 Regenerative medicine..... 1–7, 10, 13, 39–47, 53,
 89, 114, 165–167, 267–281, 303–306, 310–313

S

Scaffolds 3, 18, 31–32, 54, 68, 128, 132,
 224–227, 229, 230, 232, 233, 235–237, 307
 Scanning electron microscopy (SEM) 31, 82, 117, 120
 Self-assembled monolayers (SAMs)..... 63–66, 69,
 71–73, 95–97, 187
 Self-assembly..... 5, 7, 8, 10, 18, 32–33, 40,
 45–47, 54, 60, 224, 238, 241

SH-SY5Y cell line..... 195–196, 202
 Single cell analysis 101, 102, 106
 Social issues 303–314
 Soft lithography..... 10, 101, 102, 105
 Sol-gel method 134, 135
 Stanazolol..... 210, 216–219
 Stem cells 1–3, 7, 11, 62, 101–111, 225,
 246, 268, 280, 281, 306, 310–311
 Stimuli responsive polymers 51–73
 Super-resolution optical microscopy..... 273–274
 Surface analysis..... 150
 Surface functionalization 10, 89–99, 246, 250, 254
 Surface modification..... 52, 60, 181, 183–185,
 189, 209, 249–252, 254
 Synthesis..... 4–6, 17–37, 40,
 42–44, 59–61, 65, 68, 71, 72, 90–91, 93–95, 98, 103,
 204, 225, 226, 229, 232–236, 239, 248, 250, 252,
 254, 308

T

TE. *See* Tissue engineering (TE)
 Therapy 2, 10, 114, 116, 194, 253, 304, 309, 311–312
 Thiols..... 71, 79, 90–91, 93, 94, 98, 209, 216, 218, 250
 Time-lapse microscopy..... 103, 106
 Tip modification 185
 Tip-sample forces..... 179
 Tissue engineering (TE) 1, 2, 6, 7, 11, 18, 31,
 36, 57, 60, 68, 70, 128, 165, 166, 194, 223–226, 229,
 230, 232, 237, 238, 246, 304, 306
 Tissue regeneration 1, 6, 10, 61, 113, 127–139, 237

W

Wettability..... 51, 66, 163–177

Z

Zetasizer..... 117, 119
