

INDEX

A

- Actinomycin D 73, 76, 78, 87
 Affinity chromatography 5, 75–76, 85–86, 195–212
 Affymetrix 25–52, 151–154
 AGO protein 134, 135
 Antiviral activity 2–5, 209, 215
 Apoptosis 50–51, 159, 180, 189
 ARE. *See* AU-rich element
 AU-rich element (ARE) 72, 76, 91–95,
 97, 98, 100, 102
 Autoimmune disease 197

B

- Basic local alignment search tool
 (BLAST) 168, 183, 210
 Bioassay 1–6, 201, 209, 212, 231–237
 Biomarkers 212
 BLAST. *See* Basic local alignment search tool

C

- CD4 26–31, 38, 39, 46, 52, 77, 114
 Chicken β -actin promoter 125
 Chimeric receptors 232–235
 Chloramine-T 200, 206
 Concanavalin A 3, 4
 Ct-value 8, 15–20, 22, 66
 Cytoplasmic extracts 74, 81–84, 126, 127

D

- Database for annotation, visualization, and integrated
 discovery (DAVID) 25–52
 DAVID. *See* Database for annotation, visualization, and
 integrated discovery
 DEPC. *See* Diethylpyrocarbonate
 Diabetes 179
 Dicer 134–137, 180
 Diethylpyrocarbonate (DEPC) 76, 86, 125
 Doxycycline 73, 76, 79
 Droscha 135, 136
 dsRNA-dependent protein kinase 134, 136,
 137, 139, 152, 155, 164

E

- Electrophoretic mobility shift assay (EMSA) 74–75,
 81–83, 87
 EMSA. *See* Electrophoretic mobility shift assay
 End-labeling of synthetic RNA 75, 83–84
 Epithelial cells and tissues 55–69
 Epstein-Barr virus 25

G

- Geneticin 119, 120, 128
 GFP probes 74, 81
 β -Globin probes 74, 81

H

- HA. *See* Hyaluronan
 Hammerhead ribozyme 117–131
 HGPRT. *See* Hypoxanthine-guanine phosphoribosyl
 transferase
 Hierarchical clustering 38
 HIV. *See* Human immunodeficiency virus
 House keeping gene 128–130, 139, 190
 Human antigen R (HuR) 72, 94
 Human immunodeficiency virus (HIV) 26–28, 51,
 106, 218, 222, 223
 HuR. *See* Human antigen R
 Hyaluronan (HA) 107–109
 Hypoxanthine-guanine phosphoribosyl transferase
 (HGPRT) 232

I

- ICS. *See* Intracellular cytokine staining
 IFN- α 30–32, 44–45, 49, 51, 148–150,
 196, 199, 211, 215–229, 232, 233, 235
 IFNAR2 196, 199, 210, 211, 232, 234, 236, 237
 IL-32 binding protein 196–197, 199, 211
 Inducible nitric oxide synthase 181
 Inflammation 2–3, 5, 72, 106, 164, 165, 174
 Insulinoma 184
 Insulinitis 179
 Integrin 105–115
 Interferon- β 93

Interferon- γ 93
 Interferon-stimulated genes (ISGs)..... 136, 138,
 148, 150, 153, 155, 163–174
 Interleukin-1 2, 5–6
 Interleukin-27 25–52, 93
 Intracellular cytokine staining (ICS) 216, 221,
 224, 227, 229
 ISGs. *See* Interferon-stimulated genes

K

Key pathways..... 51
 Knockout model..... 189–190

L

Lentivirus 164, 169
 Leukocyte 3, 106, 108, 111, 223
 Ligand affinity chromatography..... 195–212
 Lipopolysaccharide (LPS) 102
 Liposome..... 106, 108–110, 113, 114, 224
 LNA. *See* Locked nucleic acids
 Locked nucleic acids (LNA) 14
 LPS. *See* Lipopolysaccharide

M

Macrophage..... 26–27, 29–32, 38, 39, 165, 169
 MACS. *See* Magnetic-activated cell sorting
 Magnetic-activated cell sorting (MACS) 27, 29,
 30, 217, 220
 MCF. *See* Monocytic cell factor
 Melting curve analysis 8, 14, 19, 172
 Messenger RNA (mRNA)
 decay..... 72–74, 76–81
 knockdown 119–120, 125–129
 stability 56, 91, 94, 95, 97, 103
 MGB probes..... 7–8
 Microarray 25–52, 59, 137–139,
 148–155, 159, 189–191
 MicroRNA (miRNA)..... 55–69, 91, 133–141, 167, 183
 miRBase 58, 69
 miRNA. *See* MicroRNA
 Mitogen..... 2, 3, 95
 Molecular beacons..... 7–8
 Monocytic cell factor (MCF) 5
 mRNA. *See* Messenger RNA

N

NanoDrop 10, 11, 13, 35, 97, 100
 Nanoparticle 105–115
 Northern blotting 74, 79–81

O

2',5'-Oligoadenylate 137, 164
 Oligofectamine..... 137, 141, 146–147

P

Pancreatic islets..... 181
 Pfaffl method..... 17–19
 PKR. *See* Protein kinase R
 Plasmacytoid dendritic cells 215–229
 Polyadenylation 102
 Polyinosinic:polycytidylic acid (PolyI:C) 156
 Poly-rI:rC 3
 Posttranscriptional regulation 71–88, 95
 Primer efficiency..... 17
 Protein kinase R (PKR)..... 134, 137, 139, 152, 164

R

Real-time-quantitative PCR (RT-qPCR)..... 7–23, 125, 189
 Relative expression software tool (REST) 18–19
 REST. *See* Relative expression software tool
 RISC complex 69, 135, 136, 142, 180, 183
 RNA-binding protein..... 72, 75–76, 82, 85–86, 94, 95, 164
 RNAi. *See* RNA interference
 RNA interference (RNAi) 56, 105, 106, 133–160,
 163–165, 168, 169, 179–193
 RNase L 137, 164
 RT-qPCR. *See* Real-time-quantitative PCR

S

Short hairpin 135, 137, 164
 Silicic acid..... 3, 4
 siRNA. *See* Small interfering RNA
 Small interfering RNA (siRNA) 105–115, 134–144,
 146–147, 156–159, 164–165, 167, 180–181,
 183–192
 Spectrometry 82, 86, 197, 209, 210, 212
 Supershift assay 83
 Surface plasmon resonance..... 197, 208
 Sybr-Green..... 8, 9, 14, 22, 57, 68, 166, 172

T

TaqMan..... 7–8, 56–65, 119, 125–127, 150
 TaqMan low-density array (TLDA)..... 56, 57,
 59, 60, 62–65
 T cell 25–26, 72, 73, 77, 78, 81, 82, 85, 86, 108
 TGF- β 56, 94, 120, 121, 128–131
 TLDA. *See* TaqMan low-density array
 TLR. *See* Toll-like receptor
 Toll-like receptor (TLR) 138, 164, 216–218,
 220, 223–226, 228–229
 Toxicity bioassay 234
 Transfection..... 76, 97, 106, 118, 135,
 168, 180, 218, 232
 Tristetraprolin (TTP)..... 72, 94–95
 TTP. *See* Tristetraprolin
 Turbofect 120, 129–131, 141, 147–148
 Type I interferon 196, 210, 211, 215, 231–237

U

Urinary proteins198, 199, 201, 202
 UV crosslinking 75, 80–82,
 84, 85, 87

W

Wegener's auto-antigen 197

X

Xanthine-guanine phosphoribosyl transferase
 (XGPRT)232
 XGPRT. *See* Xanthine-guanine phosphoribosyl transferase

Z

Zeta potential 106, 107, 110
