

# INDEX

## A

- Adenovirus vector.....104, 109, 116, 118–119  
 Adipose tissue-derived mesenchymal stem  
   cells (AT-MSC)..... 61–65  
 Alanine amino-transferase (ALT) ..... 182–186  
 ALT. *See* Alanine amino-transferase (ALT)  
 Antibody..... 5, 27, 28, 30, 31, 40, 46, 55,  
   56, 76, 83, 84, 91, 92, 94, 95, 100, 101, 107, 112,  
   143–145, 165, 167, 195  
 Aspartate amino-transferase (AST) ..... 182–186  
 AST. *See* Aspartate amino-transferase (AST)

## B

- Bile duct cells.....153–160, 184, 186, 212  
 Bioartificial liver assisted device .....19–20  
 Bipotent stem cells .....33

## C

- CD44.....50, 52–57  
 Cell immortalization  
   cell interaction .....4  
   sorting.....31, 34, 35, 37, 38, 40, 41, 43–46, 167, 172  
 Cellular sheet.....211  
 Chronic liver diseases .....89, 90, 154, 217, 218, 222  
 c-Myc.....103, 105, 106, 109, 110, 112  
 CYP450.....73, 74, 76, 81, 82, 84

## D

- Differentiation.....3, 16, 34, 61–71, 75, 90,  
   103–123, 138, 154, 163, 183, 206  
 Drug development  
   metabolism .....73

## E

- E-cadherin.....4, 5, 7, 8, 34, 35, 37, 38, 40–46  
 Embryonic stem (ES) cells .....15, 62, 90, 103, 140, 206, 212  
 Epithelial cell adhesion molecule (EPCAM).....26–28,  
   30, 31, 163–165, 171, 172  
 Extracellular matrices .....3, 154

## F

- Flow channel .....190  
   -cytometry .....26, 30, 31, 83, 85, 96, 101  
 Fluorescence-activated cell sorting .....91, 164

## G

- Galactosamine .....49–57

## H

- Hepatic cancer stem cells  
   differentiation .....61–71  
   progenitor cells .....49–57  
 Hepatoblasts .....3–9, 33–46, 115, 116,  
   119–120, 154  
 Hepatocellular carcinoma .....127, 135, 163–174  
 Hepatocyte  
   differentiation .....12, 16, 19, 89, 90, 108,  
   115, 116, 138–141, 145  
   like cell.....15, 73–82  
   proliferation .....135–137, 153, 187  
   transplantation .....11, 13–15, 17, 18  
 HNF3b.....129  
 Human  
   iPS cells .....103–123  
   MSC.....73–86, 125–131, 179–187  
 HuR.....133–146

## I

- Inflammatory cytokines .....153  
 iPS cells. *See* Pluripotent stem cells (iPS)  
 Irradiation exposure.....186

## K

- KLF4.....103, 105, 106, 109, 110, 112

## L

- Liver  
   biliary acids .....182  
   damages .....25, 26, 89–101, 186

disease.....11, 12, 18, 19, 33, 89, 90, 153, 154,  
211, 217, 218, 222  
fibrosis... ..153, 218, 222  
progenitor cells .....3, 140  
regeneration..... 25, 135, 136, 140  
stem cells,

**M**

Macroporous scaffold ..... 193, 205–207, 209–211  
MACS. *See* Magnetic cell sorter (MACS)  
Magnetic cell sorter (MACS) .....5, 51, 52, 55, 62,  
63, 65, 69, 70  
Mesenchymal stem cell (MSC) ..... 14, 61–71,  
73–86, 125–131, 140, 179–187, 217–222  
Methionine adenosyltransferase (MAT) ..... 134–138, 142  
MicroRNA microarray ..... 165–166, 168–169  
MicroRNAs.....163–174  
Mouse fetal hepatoblasts (MFH) .....33–46  
Muse cells..... 90–96, 98–100

**N**

NOD/SCID mice ..... 164, 171, 179–187  
Non-alcoholic steatohepatitis ..... 135, 217–222  
Nonparenchymal cells.....3–7, 9, 19, 26, 45, 49,  
156, 195, 196

**O**

Oct3/4.....90, 98, 103, 105–110, 112  
Oval cells.....25, 26, 28, 31, 33, 42, 49, 53, 55–57, 89, 90  
Oxygen.....190–192, 197–209, 211–214

**P**

Plasticity... ..154  
Pluripotent stem cells (iPS) .....15, 18–21, 89–101, 103–123  
Polymerase chain reaction (PCR)..... 99, 106,  
108, 110–113, 129, 145, 166, 170, 173, 182

**Q**

Quantitative reverse transcription-polymerase  
chain reaction (qRT-PCR) ..... 143, 164

**R**

Regenerative medicine.....180  
Respiration ..... 202, 204, 211  
Retrovirus..... 103, 104, 109, 127

**S**

S-Adenosylmethionine (SAMe)..... 133–146  
Small hepatocytes .....49  
Sox2.....90, 98, 103, 105, 106,  
109, 110, 112  
Spheroid assay ..... 164, 165, 171  
SSEA-3. *See* Stage-specific embryonic antigen-3  
(SSEA-3)  
Stage-specific embryonic antigen-3 (SSEA-3).....90–92,  
94–96, 98, 100, 101, 105, 111  
Stem cells  
Stem/progenitor cells.....15, 25–31, 49, 56,  
89, 141, 146

**T**

Tetracycline operator 2 .....127  
inducible system .....125  
Tet repressor ..... 125, 127, 130, 131  
Therapeutic transplantation .....179  
Three-dimensional cultures (3D culture) ..... 18, 154,  
159, 190, 196, 205, 206  
Thy1..... 53–57, 105, 111  
Toxicology.....12, 73  
Transdifferentiation ..... 14, 15, 153–160  
Transfection.....78–80, 91, 94, 104, 109,  
128–129, 143, 144, 164, 166, 170–171, 173  
Tumorigenicity assay ..... 164, 165, 171
