

Index

A

Amory's game object model, 6
Anti-earthquake building, 60
Architectural artifact, 66
Architectural Terms and Principles document, 53, 55
Architecture-themed scenarios, 104

B

Bayesian network model, 116
Bicentric mode, 148
Brick-by-brick approach, 93
Building modes of play, 81
Building-themed gameplay, 78

C

Chromebooks, 95
Chunked vs. holistic task, 107
Coding game mechanics, 18
Coding game objects, 64
Cognitive engagement, 85
Cognitive interactivity, 5
Collaborative design, 17
 interdisciplinary, 17
 students, authentic and constructive learning, 17
Comma-separated values, 115
Commercial off-the-shelf (COTS) games, 2
Common Core State Standards for Mathematics (CCSS-M), 45
Common symbol system, 144
Competency models, 54, 110
Consequential design, 88

Construct-centered assessment, 101
Content problematizing, 122, 124
Core game action, 18, 62
Cross-cultural communication, 9

D

Desert and historical rural pueblo, 95
Design aids, 71–73
Design-based investigation, 103
Design-based research, 7
 approach, 102
 findings, 100
Design chronicle, 20, 143
Design execution, 61, 62, 67
Design goal and space, 71–72
Designing gameplay, 18
Designing games, 9
Design parameter and game reward mechanism, 61
Design principles/strategies, 146
Desirable situation, 2
3D game world, 92, 129
Digital games, 120
Downscaled map and game space, 96
3D rotation task, 93
3D sandbox games, 92–93
3D virtual world, 92, 125
Dynamic learning support, 148

E

Educational game, 19
Educational game design, 4, 9
 approaches and features, 6

- Educational researcher perspective, 6
- E-Rebuild creation, 20
- E-Rebuild design, 42, 96
 - architectural design and building, 43
 - data mining approach, 44
 - designing an educational game, 43
 - elevation view, 48
 - interdisciplinary design, 48
 - interdisciplinary process, 42
 - interdisciplinary projects, 46
 - learner, 42
 - principal designer, 42
 - role and responsibility, 43, 47
 - teamwork, 49
- E-Rebuild game, 46
- E-Rebuild game actions, 86
- E-Rebuild game levels, 78
- E-Rebuild gameplay, 47, 60
- E-Rebuild gaming sessions, 125
- E-Rebuild learning program, 102
- E-Rebuild participants, 93
- E-Rebuild project, 42, 78, 147
- E-Rebuild prototype, 114
- E-Rebuild team, 45, 67
- Evidence-centered assessment design
 - approach, 110
- Evidence-centered design approach, 19
- Evidence-centered task development, 150
- Exemplary design cases, 72
- Exemplary design document, 111
- Experiential gaming model, 6
- External scaffolding, 123, 137

- F**
- Failure-driven learning, 90
- First E-Rebuild level, 69
- Florida Mathematics Standards (FMS), 45
- Florida State University, 42, 45
