

# Index

## A

Affordable Care Act (ACA), 15  
Affordable housing, 45  
Aggregation layer, 147  
Alternating current (AC), 109  
Ambient sensors, 8  
Ambulance bus (AMBUS), 53–56, 58–64  
American Association of State Highway and Transportation Officials (AASHTO), 80  
Anti-skid system, 87  
Application player, 148  
Application programming interface (API), 145, 148, 149  
Applications for the environment: real-time information synthesis (AERIS) program, 75  
Appointment scheduling, 6  
Artificial intelligence (AI), 126, 133, 137  
Augmented and virtual reality (AR/VR) training  
    AMBUS system, 64  
    city of Austin AmBus, 53, 54  
    classroom instruction, 64  
    commercial market, 63  
    design thinking, 57, 58, 60  
    desire and budget allocation, 50  
    EDGE tool, 52  
    and education, 49  
    EMT training, 50  
    field of, 53  
    IoT, 52  
    lack of consistency, 50  
    LMS, 51  
    mass shootings, 49  
    national public health, 49

    NTED, 51  
    physical environment, 52  
    pilot training (*see* Pilot training)  
    system model of Austin AmBus, 54–57  
    3D scenarios, 52  
Augmented reality (AR), 122, 126, 133, 137  
Authorization, 150  
Automated vehicles, 70  
Automation  
    smart city, 98  
    PKI, 97, 98  
Autonomous technology, 20  
Autonomous vehicles, 86–88, 92, 106–108  
AWS IoT, 147  
Azure IoT, 147

## B

Bitcoin (BTC), 102–104  
Bitcoin's Meteoric Rise, 102  
Blockchain  
    Bitcoin's Meteoric Rise, 102  
    central repository/management authority, 101  
    distributed base, 103, 104  
    fossil fuels and location of plants, 109, 110  
    implementation, 102, 103  
    incorruptible, 101  
    microgrid resurgence  
        batteries, energy storage, 112  
        concept, 113, 114  
        costs and challenges, 114, 115  
        customers, 112  
        electric vehicles, 112  
        EnviroCoin network, 113  
        EVs, 112

Blockchain (*cont.*)  
 mobility service network (*see* Distributed mobility service network)  
 renewable sources, 110, 111  
 security and transparency, 115  
 smart city, 115  
 smart contracts (*see* Smart contracts)  
 British Standards Institution (BSI), 20  
 Broadband infrastructure, 20, 22, 31, 45

## C

C3 IoT, 147  
 California Independent System Operator (CAISO), 111  
 Cellular V2X (C-V2X), 71, 77, 79, 82  
 Center-to-field (C2F) communication, 77  
 Certificate authority, 95–97  
 City architecture, 143  
 City components, 98  
 Civil Rights Act, 21, 34  
 Code division multiple access (CDMA), 129  
 Competitive intelligence, 155, 164  
 Compound annual growth rate (CAGR), 132  
 Connected vehicles, 70  
 Connectivity layer, 146  
 Cooperative Patent Classification (CPC), 160  
 Cooperative situational awareness, 72, 74  
 Cryptocurrency, 102, 104  
 Cryptography, 91, 94, 95, 98  
 Customer Relationship Management (CRM), 149

## D

Data analytics, 53, 142, 148  
 Data mining, 157–159  
 Data privacy, 21  
 Data visualization, 143  
 Decision support system (DSS), 70, 75  
 Dedicated short-range communication (DSRC), 71, 77, 79, 82  
 Department of Homeland Security Science and Technology Directorate (DHS S&T), 52  
 Design thinking (DT), 57–61  
 Digital certificates, 95, 97  
 Digital divide, 22–24, 44, 45  
 Digital inclusion, 21, 28, 31, 39, 41–43, 45  
 Digital redlining, 29  
 Direct current (DC), 109, 110  
 Disaster medical response (DMR), 54  
 Disaster recovery (DR), 150

Distributed ledger, 102  
 Distributed mobility service network  
 autonomous vehicles, 106  
 legacy mobility services, 105  
 Lyft, Uber and Didi, 105  
 Ridecoin network (*see* Ridecoin network)  
 Diversity and inclusion, 21, 30, 33–35  
 Docker, 145

## E

Economic mobility, 26, 43  
 Edge layer, 147  
 Electric vehicles, 112, 113  
 Electronic health record systems, 5  
 Electronic payment systems, 90  
 Emergency electronic brake lights (EEBL), 70, 71  
 Emergency Management Institute (EMI), 51  
 Emergency response training, 50  
 Encryption  
 asymmetric, 95  
 IoT and smart vehicle deployments, 94  
 PKI, 95  
 security element, 94  
 smart city IT security, 94  
 working knowledge, 94  
 Enhanced Mobile Broadband (eMBB), 121, 122, 133  
 Enterprise integration, 143, 148, 149  
 Enterprise Resource Planning (ERP), 149  
 EnviroCoin (EVC) network, 113  
 Equitable governance, 24

## F

Federal Communications Commission (FCC), 22  
 First responders, 50, 52–54, 56, 63  
 5G landscape  
 AI/ML and big data analytics, 137, 138  
 air interfaces, 125, 126  
 attributes, use cases and market drivers, 129–132  
 catalyst, 126, 127  
 current iteration, 121  
 design of client devices, 123  
 eMBB, uRLLC and mMTC, 122  
 end-to-end cellular networking architecture, 138  
 flexibility, 123  
 hyperconnected environment, 122  
 IoT market, 135, 136

- licensed and unlicensed networks, 127, 128
  - M2M communications, 122
  - mission-critical services, 124, 136, 137
  - mobile broadband network, 121
  - mobile connectivity, 132–135
  - QoS problem, 123
  - reference points, networking technologies, 131
  - software-defined infrastructure, 124, 125
  - spectrum reuse, 128, 129
  - usage models, 122
  - V2X communications, 123
  - 5G Low Power Wide Area (LPWAN) networks, 146
  - 4G-LTE communications, 77
  - 4<sup>th</sup> generation wireless telephony (4G LTE), 71
  - Functional layers, 144, 145
- G**
- General Motor's On-Star service, 92
  - Google Cloud IoT, 147
  - Grants for Technology Opportunities Program (GTOPS), 41
  - Gross Domestic Product (GDP), 86
- H**
- Harvard Medical School (HMS), 10
  - Healthcare associated infections (HAIs)
    - advanced analytics and simulation, 7, 8
    - patient types, 7
    - touchless disinfecting technologies, 7
    - in the USA, 7
  - Healthcare personalization, 4, 16
  - Healthcare regulation, 14
  - High availability (HA), 150
  - High reliability communications, 137
  - Hospital-based systems, 5
  - Housing Authority of the City of Austin (HACA), 39
  - Human services, 21, 24
- I**
- Immersive training, 51–53
  - Industrial controls, 137
  - Information and communication technologies (ICT), 21, 70
  - Integrated corridor management systems (ICMS), 75, 76
  - Intellectual Property (IP), 154, 164
  - Intelligent transportation systems (ITS), 70, 72, 75, 77–80, 82, 135
  - Internet of Things (IoT), 20, 24, 37–39, 52, 64, 78, 94, 95, 122, 126, 128, 131, 133, 135, 137, 138, 142, 143, 145, 146, 149, 150
  - Internet protocol version 6 (IPv6), 78
  - Internet Service Providers (ISPs), 28
  - Interoperability, 150
- J**
- JPMorgan Chase Institute Online Platform Economy, 25
- K**
- Kubernetes, 145
- L**
- Learning management system (LMS), 51
  - Legacy mobility services, 105
  - License-assisted access (LAA), 128
  - Listen before talk (LBT), 128
- M**
- Machine learning (ML), 8, 9, 13, 15, 126, 133, 137
  - Machine-to-machine (M2M), 131
  - Macrogrid, 109
  - Market research, 164
  - Massive Machine Type Communications (mMTC), 121, 122, 135
  - Microgrids, 109
  - Mission-critical services, 124
  - Motorola microprocessor, 87
  - Multi-access edge computing (MEC), 134
  - Mutual authentication, 91, 95–97
- N**
- National Institute of Standards and Technology (NIST), 52, 149
  - National Training and Education Division (NTED), 51
  - Network function virtualization (NFV), 122, 124
  - Non-emergency medical transportation (NEMT), 15
  - Non-practicing entities (NPEs), 158
  - Nonprofit Technology Empowerment Network (NTEN), 41
  - Nonrenewable energy, 109
  - North York General Hospital (NYGH), 10

**O**

- Operating architecture, 145
- Organisation for Economic Co-operation and Development (OECD), 24, 30

**P**

- Patent analytics, 157–159
- Patent landscapes, 157
- Patient portals, 5
- Personally identifiable information (PII), 80
- Photovoltaics carbon emissions, 110
- Physical layer, 124
- Pilot training
  - AR and VR training, 63
  - methods, 62
  - participants, 63
- Platform as a Service (PaaS), 145
- Platform layer, 147
- Powertrain optimization, 75, 77
- Predix, 147
- Proof-of-work (PoW) system, 103
- Public key infrastructure (PKI), 89
  - applications, 97, 98
  - asymmetric encryption, 95
  - certificate authorities, 95
  - encryption, 96
  - exchanging, 96
  - key distribution process, 95
  - parties, 96
  - sensitive data, 95

**Q**

- Quality of Service (QoS), 138
- Queue Warning (Q-WARN), 71, 72

**R**

- Reduced speed zone warning (RSWZ), 72, 73
- Reference architecture, 142, 148, 149
- RelayHealth, 5
- Remote healthcare, 8
- Remote technologies
  - ambient sensors, 8
  - machine learning, 9
  - remote healthcare, 8
  - traditional care, 8
  - wearable devices, 8
- Renewable energy, 110, 113
- Ridecoin network
  - community-based transaction ledgers, 106
  - concept, 106–108
  - costs and challenges, 108
  - lower-cost service, 106

- Ridesharing, 105–107
- Roadside unit (RSU), 71, 72

**S**

- Sales Force IoT, 147
- SAP Leonardo, 147
- Scheduling systems, 5
- Security
  - big data, 90
  - communication systems, 86
  - definition, 93, 94
  - Futurex's Excrypt Plus hardware, 91
  - intelligent system for authentication, 90
  - in-vehicle, 93
  - personal information, 92
  - PKI, 95–97
    - public key infrastructure, 89
    - trust with encryption, 94, 95
- Security credential management system (SCMS), 80
- Sensing layer, 146
- Sensor networks, 135, 136
- Service-level-agreements (SLAs), 125
- Simple network management protocol (SNMP), 77
- Simple object access protocol (SOAP), 78
- Situational awareness, 50, 64
- Smart cities
  - culture of health, 15
  - digital healthcare systems, 5
  - ecosystem, 142, 143
  - finances, 14
  - funding, 27
  - HAIs (*see* Healthcare associated infections (HAIs))
  - healthcare personalization, 3, 4, 16
  - HMS, 10
  - HPH, 10
  - low-income residents, 26
  - Mayo Clinic, 10
  - medication, 9
  - NYGH, 10
  - patient portals and smart rooms, 5, 6
  - personalizing healthcare, 10–13
  - regulation, 14
  - remote technologies (*see* Remote technologies)
  - research, 4
  - responsibilities, 26
  - scheduling algorithms, 6
  - treatment, 10
  - variability sources, 4
- Smart contracts
  - application, 105

- cryptocurrencies, 104
- Smart diagnosis, 10
- Smart health, 4
- Smart medication, 9
- Smart room technology, 5
- Smart society, 136
- Smart transport
  - applications
    - cooperative situational awareness, 72, 74
    - EEBL, 70, 71
    - environmental and mobility, 70
    - ICMS, 75, 76
    - powertrain optimization, 75, 77
    - Q-WARN system, 71, 72
    - RSWZ, 72, 73
  - challenges, 69
  - Internet of Things, 77–79
  - ITS, 70
  - security, 80
  - smart city, 69
  - standards, 80–82
  - technical and funding challenges, 82
  - V2X communication, 79
- Smart via digital equity and inclusion, 45
- Smart wearable devices, 8
- Software-defined capabilities, 125
- Software-defined infrastructure, 124, 125
- Software-defined networking (SDN), 122, 124, 134
- Solar energy, 114
- Solution architecture, 143
- Spatial mapping, 52, 54, 55
- Standards development organizations (SDOs), 80

## T

- Technology research, 157
- Techopedia, 86
- Tele-health, 137

- Telemedicine, 123, 124, 136
- ThingWorx, 147
- Time division multiple access (TDMA), 129
- Touchless disinfection, 7
- Traffic management center (TMC), 73
- Traffic management data dictionary (TMDD), 78
- Traffic queue, 71, 72
- Training management system (TMS), 51
- TV White Space (TVWS), 128

## U

- Ultra-High Speed, Low Latency Communications (uHSLC), 121, 122
- Ultra-Reliable Low Latency Communications (uRLCC), 121, 123
- Underserved populations, 22, 27, 28, 45
- University of Pittsburgh Medical Center (UPMC), 6
- User experience (UX), 55, 58

## V

- Vehicle to city (V2C), 88, 92, 93
- Vehicle to everything (V2X), 70, 79, 82, 87
- Vehicle to infrastructure, 79, 80, 88, 91, 92
- Vehicle to pedestrian (V2P), 79
- Vehicle to services (V2S), 88, 92
- Vehicle to vehicle (V2V), 70, 79, 87, 91
- Virtual reality (VR), 122, 126, 133, 134, 137
- Virtualization, 122–125, 131, 133, 134, 137, 138
- Visible light communication (VLC), 79
- Visualization layer, 149

## W

- Wearable sensors, 52, 59
