

INDEX

A

- Achievement-based systems, 87
- Advanced training, learning and scenario simulator (ATLAS)
 - concept, 189
 - development, 190–193
 - humanitarian agencies, 189
 - platform, 193
 - training tool, 193
 - tunnelling, 191
 - VR headset, 191
- America's Army, 18
- Apple's approach, 70
- Applied engagement for community participation (AEsOP)
 - architecture, 216
 - awareness, 221
 - community stakeholders, 213
 - CP, 210
 - demographic information, 221
 - design and inception phases, 215
 - designed, 214
 - dialogue choices, 217
 - EU-funded project, 211
 - game's scenarios, 219
 - game's scripting, 216
 - ICT solutions, 211
 - ID and PIN number, 221
 - intention, 210
 - pillar points, 218
 - police officers, 211
 - scenarios, 214, 215
 - six pillars, 219
 - unity project, 212
- ARCore, 71, 72
- ARKit, 70–72
- Artificial intelligence (AI), 74
- Auditory fidelity, 135
- AUGGMED evaluation, 165
- AUGGMED platform, 184
- AUGGMED project, 141
- AR, 102
 - components
 - assessment and evaluation module, 111
 - configuration interface, 109
 - core systems, 108
 - environments, 112–113
 - exodus, 111–112
 - game scenario engine, 112

- AUGGMED project (*cont.*)
- intervention interface, 110
 - multimodal interaction
 - interfaces, 113–114
 - real-time observation, 110
 - trainer tools, 108
 - core systems, 102
 - development process
 - end users, 104
 - game platform, 104
 - LEA training methods, 104
 - scope, 104
 - EC's priorities, 103
 - impact, 114–115
 - iterative method, 115
 - LEAs, 102, 103
 - mouse and keyboard, 102
 - multi-agency training, 102
 - pedagogical principles, 103
 - piloting system
 - AR/VR, 107
 - pilots stress, 104
 - platform, 105
 - results, 106
 - training scenario, 106
 - validated and demonstrated, 107
 - VR training processes, 107
 - roles and functionalities, 108
 - touchscreen mobile devices, 102
 - VR, 102
- Augmented Immersive Team Trainer (AITT) system, 74, 75
- Augmented reality (AR)
- based game developments, 67
 - definition, 65
 - development process, 78
 - education
 - AITT system, 74, 75
 - AVATAR Partners, 73
 - Daimler Mercedes-Benz 'Ask Mercedes', 74
 - delivering instructional information, 72
 - Japan Airlines (JAL), 73, 74
 - hardware
 - holographic headsets, 69
 - overlay headsets, 68
 - wearable devices, 67
 - holoportation, 67
 - interactions, 79, 80
 - marketing strategy
 - Disney colouring book, 75
 - Pepsi Max, 75
 - Pizza Hut, 76
 - methodologies, 79
 - persuasive technology, 77
 - privacy, 77
 - safety risk, 78
 - SDK (*see* Software development kit (SDK))
 - serious game applications, 67
 - situational awareness
 - TAR, 76
 - vehicles, 76
 - VR, 80
- B**
- Battlefield, 18
 - BioSimMER*, 183
- C**
- Call of Duty, 18
 - Case study, 103
 - CENTRIC framework, 140
 - CENTRIC serious games
 - AUGGMED, 140
 - design principles, 138
 - game mechanics, 141
 - learning objectives, 141
 - pedagogical objectives, 141
 - principles, 138
 - rendered environments, 140
 - CENTRIC Serious Games Design Framework, 139
 - Chaturanga, 16
 - Chief Information Officer (CIO), 203

- Citizen participation, 212
- Citizen science, 32
- Co-development strategies, 143
- Collaborative development, 142
- Collaborative pedagogy, 184
- Command and control centres (CCC), 76
- Community-based approach, 212
- Community policing (CP) strategies, 209
- Crime prevention, 209
- Crime scene investigations, 3
- CyberCentric
 - adaptability, 201
 - attack vectors, 203
 - citizen version, 200
 - concept, 200–205
 - development, 197
 - Malware, 204
 - management decisions, 204
 - multidisciplinary team, 197
 - pilot studies, 198
 - preventative actions, 204
 - scenarios, 203
 - serious game, 198, 199
 - SMEs, 199, 206
- Cybersecurity survey, 206

- D**
- Degrees of freedom (DOF), 137
- Design, play and experience (DPE)
 - framework, 25
- Desktop applications, 152
- Distance learning facilitates, 174
- DREAD-ED project, 6

- E**
- Education, 84, 92
- Edutainment, 18
- Elicitation techniques, 119–126
- Ethical considerations, 61
- EU's General Data Protection Regulation (GDPR), 77

- European-wide community policing approaches, 215
- Evaluation designs, 158, 159
- Experiential learning theory (ELM), 21

- F**
- Ferrocarrils de la Generalitat (FGC), 106
- Fidelity and game mechanics, 142
- Field of view (FOV), 134
- Field personnel, 189, 193
- Fire-based smoke distribution system, 112
- Fire Company Officer (FCO), 181
- First responders
 - collaborative serious games exercises, 180
 - communication skills, 175
 - environments, 176
 - FCOs, 181
 - firefighters, 173, 176
 - high-stake situations, 182
 - learning, 174
 - learning tool, 180
 - medical school, 179
 - RAILS* software, 175
 - rescue and triage, 182
 - serious games, 174
 - sieve process, 178
 - simulations, 174
 - trainees, 175
 - training, 173
 - virtual and mock scenarios, 181
 - virtual environment, 177
 - VR-ALM, 184
- Foldit Contenders Group, 32
- Full body illusion (FBI), 51
- Full cycle learning, 22
- Functional magnetic resonance imaging (fMRI), 50
- Functional requirements, 124
- Functionality testing, 151

G

Game-based learning, 18
 Game mechanics, 141
 Gamification, 16, 180
 achievement systems, 85–87
 concept, 83
 conceptual models, 84, 89
 design principles, 84, 88–89
 education, 84
 game design methods, 84, 90–91
 game mechanics, 84, 87, 88
 implementation, 91
 interface design, 84–85
 leader board systems, 87
 learning, 84
 types, 84
 Google Cardboard, 47–49
 Google Glass, 68, 69

H

Head-mounted displays (HMDs),
 44, 133
 Head-up display (HUD), 70
 Holoportation, 67
 HPE Visual Remote Guidance, 69

I

Immersion, 131, 142
 Impact assessments, 154
 Improvised explosive device (IED), 51
 Input method, 102
 Interaction fidelity, 136–138
 Interaction methods, 79, 102
 International non-governmental
 organisation, 190
 Investigative interviews, 5
 iOS operating system, 71
 Iterative method, 115

J

JUST VR project, 183

K

Knowledge management (KM)
 processes, 2
 Knowledge management strategy
 (KMS), 10

L

Large-scale evacuation models, 108
 Law enforcement, 92
 Law enforcement agencies (LEAs), 1,
 2, 102–104
 Learning, 83, 84, 86, 88, 89, 91,
 92, 96
 Learning theories, 19–22, 36
 Lower-fidelity models, 58

M

Malware at scale, 205
 Massively multiplayer online (MMO)
 games, 184
MediSim, 182
MeRiTS, 175
 Mixed reality (MR), *see* Augmented
 reality (AR)
 Module challenge matrix, 109
 Motion capture, 27
 Motion sickness, 55, 57, 58
 Multi-agency training, 102
 Multiple data collection methods, 123
 Myo Armband, 137

N

Natural interaction methods, 56
 Natural? interaction, 137
 Non-functional requirements, 124
 Non-game systems, 87

O

Optimal design, 162
 Organisational-dynamic games, 18

P

Pharmacological pain management methods, 50
 Piaget, 27
 Post-test design, 159
 Post-traumatic stress disorder (PTSD), 51
 Pre-post-test design, 159
 Presence and immersion, 132
 Problem-based learning theory, 22
 Professional training, 1

Q

Questions/collection methods, 126

R

Realistic and adaptive interactive learning system (RAILS), 175
 Realistic training simulations, 190
 Repeated measurements design, 160
 Requirements elicitation, *see* User requirements
 RoboRaid, 66
 Room-scale systems, 45

S

Serious games, 7, 8
 application, 16
 AUGGMED (*see* AUGGMED project)
 benefits, 27–28, 36
 BiLat, 34–35
 case studies, 28
 cognitive theories, 22
 concept, 16
 criticism, 26–27
 development
 challenging, 23
 design framework, 25–26
 game attributes, 24–25
 pedagogical principles, 23

designing and building, 96
 education, 18
 entertainment and education, 36
 Foldit, 32–33
 gamification, 16
 health, 19
 knowledge acquisition, 16
 learning outcomes, 20
 learning theories, 19–22, 36
 Matarì 69200, 28–30
 persuasion, 18–19
 psychological theories, 21
 purposes and designs, 16
 Sea Hero Quest, 35
 spent, game for change, 31
 Start Thinking Soldier, 33–34
 technological advances, 15
 user requirements (*see* User requirements)
 VR (*see* Virtual reality (VR))
 Serious games design framework, 138
Sidh game, 176
 Simulation
 deterministic, 92, 93
 education, 92
 law enforcement, 92
 learning, 92
 mathematical theories/engineering principles, 92
 physics, 95
 serious games, 91, 94–96
 stochastic, 94
 Simulation-based serious games, 174
 Sistema d'Emergències Mèdiques (SEM), 106
 Situated learning theory, 22
 Smoke rendering system, 112
 Sociocultural theory, 21
 Software development kit (SDK)
 Apple ARKit, 70, 71
 software selection, 72
 Vuforia, 71

T

Tactical Augmented Reality (TAR), 76

Terrorist incident, 7

Traditional CP approaches, 209

Traditional training methods, 75

Traffic investigation study, 5

Training evaluations

- AUGGMED project, 149
- evaluation exercises, 150
- participants, 151
- physical and mental stress reactions, 152
- technology, 151
- tool, 150
- training success, 153
- usability evaluations, 152
- VR-based trainings, 151

Training exercises, 164

Training satisfaction, 153

Training simulation, 189

Training transfer, 155, 156

Triage system, 178

Triage Trainer, 178

Tunnelling, 191

U

Usability testing, 152

US-based Office of Naval Research (ONR), 74

User requirements

- AUGGMED project, 118
- data collection techniques, 129
- developmental costs, 118
- elicitation techniques
 - analysis, 125–126
 - conscious management, 126
 - iterative process, 119
 - methodologies, 120
 - negotiation, 127

- participant recruitment, 119, 120
 - planning, 123–125
 - verification, 126
- importance, 118, 119
- lack of common understanding, 127
- language barriers, 127
- losing focus, 129
- participants feel uneasy, 128
- scope of information, 128
- serious games, 117
- volatility, 128

V

Virtual environments (VEs), 132

Virtual reality (VR), 150

- applications, 61
- based serious games, 48, 50
- benefits, 44
- challenges
 - cybersickness, 57–58
 - ethics, 59–61
- concept, 43
- definition, 43
- development
 - general principles, 54–55
 - processes and methodologies, 55–56
 - virtual environments, 56–57
- innovations
 - artistic experiences, 53–54
 - pain therapy, 50
 - skill learning, 52–53
 - traumatic experiences and illnesses, 51
- systems, 49
- technologies
 - accessories, 48
 - considerations, 49
 - mobile, 47

- room-scale headsets, 45
- seated/standing headsets, 44
- Virtual reality tools, 180
- Virtual-suspect simulation, 6
- Visual fidelity, 133
- VoIP system, 138
- VR-Active Learning Module
(VR-ALM), 184

- VR-based serious game
trainings, 165
- VROnSite*, 185

W

- World Health Organization
(WHO), 60
