

## Appendix A: Lesch Alcoholism Typology—Questionnaire

<b>Personal Data</b>	
<b>Patient's number:</b>	
Patient ID:	
<b>Surname:</b>	
<b>First Name:</b>	
Date of examination:	
Sex:	<input type="radio"/> Male
	<input type="radio"/> Female
Date of birth:	
Age (in years):	
Maiden name:	
Street:	
ZIP-code:	
City:	
Phone nr. (patient):	
E-mail:	
Phone nr. (relatives)	
Outpatient:	<input type="radio"/> No
	<input type="radio"/> Yes
Place of admission:	
Height (cm):	
Weight (kg):	
Time of observation (how many months is the patient known to the examiner):	

<b>DSM-5</b>	
<b>Diagnosis DSM-5:</b>	
	<input type="checkbox"/> Alcohol is often taken in larger amounts or over a longer period than was intended.
	<input type="checkbox"/> There is a persistent desire or unsuccessful efforts to cut down or control alcohol use.
	<input type="checkbox"/> A great deal of time is spent in activities necessary to obtain alcohol, use alcohol or recover from its effects.
	<input type="checkbox"/> Craving, or a strong desire or urge to use alcohol.
	<input type="checkbox"/> Recurrent alcohol use resulting in a failure to fulfil major role obligations at work, school or home.
	<input type="checkbox"/> Continued alcohol use despite having persistent or recurrent social or interpersonal problems caused or exacerbated by the effects of alcohol.
	<input type="checkbox"/> Important social, occupational or recreational activities are given up or reduced because of alcohol use.
	<input type="checkbox"/> Recurrent alcohol use in situations in which it is physically hazardous.
	<input type="checkbox"/> Alcohol use is continued despite knowledge of having a persistent or recurrent physical or psychological problem that is likely to have been caused or exacerbated by alcohol.
	<input type="checkbox"/> Tolerance, as defined by either of the following: -- a) A need for markedly increased amounts of alcohol to achieve intoxication or desired effect. -- b) A markedly diminished effect with continued use of the same amount of alcohol.
	<input type="checkbox"/> Withdrawal, as manifested by either of the following: (a) The characteristic withdrawal syndrome for alcohol (refer to Criteria A and B of the criteria set for alcohol withdrawal according to DSM 5); (b) Alcohol (or a closely related substance, such as benzodiazepine) is taken to relieve or avoid withdrawal symptoms
<b>Diagnosis DSM-5:</b>	<input type="radio"/> No (0–1 items)
	<input type="radio"/> Mild (2–3 items)
	<input type="radio"/> Moderate (4–5 items)
	<input type="radio"/> Severe (6–11 items)
4–11 items checked: Alcohol dependency according to ICD10 and ICD11.	

<b>Social and family history</b>	
<b>Patient's data up to the age of 14:</b>	
Date of examination:	
Mother's age at patient's birth:	
Alcohol addictions among 1st degree relatives?	<input type="radio"/> No
	<input type="radio"/> Yes
Nicotine addictions among 1st degree relatives?	<input type="radio"/> No
	<input type="radio"/> Yes
Severe chronic diseases in the family (or household):	<input type="radio"/> No
	<input type="radio"/> Yes
Parent's attitude towards the patient when s/ he was a child (patient's view):	<input type="radio"/> Loved
	<input type="radio"/> Not loved
	<input type="radio"/> Judgement not possible
Who raised the patient:	<input type="radio"/> Parents
	<input type="radio"/> Grandparents
	<input type="radio"/> Other family members
	<input type="radio"/> Frequently changing people
Psychiatric diseases in the patient's family (other than alcohol):	<input type="radio"/> No
	<input type="radio"/> Yes
If applicable, which:	
Did the patient suffer from severe developmental disorders according to DSM 5:	<input type="radio"/> No
	<input type="radio"/> Yes
<b>Patient's data after the age of 14:</b>	
Marital status:	<input type="radio"/> Single
	<input type="radio"/> Living with a partner
	<input type="radio"/> Divorced
	<input type="radio"/> Widowed
Partner's attitude towards the patient:	<input type="radio"/> Inconspicuous
	<input type="radio"/> Dominant
	<input type="radio"/> Insecure/Resigning
	<input type="radio"/> Dismissive

<b>Examination's report</b>	
Date of examination:	
Admission/Examination:	<input type="radio"/> Voluntary <input type="radio"/> Involuntary
Pretreatment:	<input type="radio"/> None <input type="radio"/> Outpatient <input type="radio"/> Once inpatient <input type="radio"/> Repeatedly inpatient
Inpatient treatment, how often?	
Onset of alcohol dependence (age):	
Onset of somatic withdrawal symptoms (age):	
Onset of tolerance decrease (age):	
Drinking pattern:	<input type="radio"/> Constant <input type="radio"/> Periodically changing <input type="radio"/> Changing in irregular intervals
Criminal acts before admission:	<input type="radio"/> None <input type="radio"/> Alcohol-related crime <input type="radio"/> Other crimes
Type of crime (1):	<input type="radio"/> Disturbance of the peace <input type="radio"/> Bodily harm <input type="radio"/> Damage of property <input type="radio"/> Sex offence <input type="radio"/> Traffic offences <input type="radio"/> Others
If applicable, which (1):	
Type of crime (2):	<input type="radio"/> Disturbance of the peace <input type="radio"/> Bodily harm <input type="radio"/> Damage of property <input type="radio"/> Sex offence <input type="radio"/> Traffic offences <input type="radio"/> Others
If applicable, which (2):	
Type of crime (3):	<input type="radio"/> Disturbance of the peace <input type="radio"/> Bodily harm <input type="radio"/> Damage of property <input type="radio"/> Sex offence <input type="radio"/> Traffic offences <input type="radio"/> Others
If applicable, which (3):	
Injuries under the influence of alcohol:	<input type="radio"/> None <input type="radio"/> Once <input type="radio"/> Repeated
Self-assessment (last 3 months):	<input type="radio"/> Abstinent <input type="radio"/> Moderate drinking <input type="radio"/> Heavy drinking <input type="radio"/> Judgement not possible

<b>Examination's report (2)</b>	
Loss of control (last 3 months):	<input type="radio"/> Never
	<input type="radio"/> Occasionally
	<input type="radio"/> Frequently
	<input type="radio"/> Permanently
	<input type="radio"/> Judgement not possible
Periods of abstinence:	<input type="radio"/> Less than 1 month
	<input type="radio"/> 1 month to 6 months
	<input type="radio"/> 6 months to 1 year
	<input type="radio"/> More than 1 year
	<input type="radio"/> Judgement not possible
Assessment of patient's drinking behaviour by others (relatives, doctor):	<input type="radio"/> Abstinent
	<input type="radio"/> Adapted drinking
	<input type="radio"/> Not tolerated drinking
	<input type="radio"/> Judgement not possible
Self-treatment with hypnotics and benzodiazepines:	<input type="radio"/> None
	<input type="radio"/> Regular
	<input type="radio"/> Irregular
<b>Alcohol is currently used against (multiple answers possible):</b>	
	<input type="checkbox"/> Anxiety
	<input type="checkbox"/> Depressed mood
	<input type="checkbox"/> Agitation
	<input type="checkbox"/> Withdrawal symptoms (tremor, sweats, anxious and depressed states)
	<input type="checkbox"/> Sleep disturbance
	<input type="checkbox"/> To improve well-being
	<input type="checkbox"/> Other
Relationship between drinking and smoking:	<input type="radio"/> No
	<input type="radio"/> Yes
If applicable, which:	
Relationship between drinking and drug abuse:	<input type="radio"/> No
	<input type="radio"/> Yes
If applicable, which:	
Drug abuse during last 3 months:	<input type="radio"/> No
	<input type="radio"/> Yes
If applicable, which:	

<b>Typology</b>	
<b>This page defines the Lesch's typology.</b>	
Date of examination:	
<b>Symptoms before the age of 14 having a severe negative impact on childhood development:</b>	
Perinatal traumata:	<input type="radio"/> No
	<input type="radio"/> Yes
Cerebral traumata:	<input type="radio"/> No cerebral trauma
	<input type="radio"/> Contusio (unconscious for longer than 6 hours and/or neurological focal signs)
Other cerebral diseases:	<input type="radio"/> No
	<input type="radio"/> Yes
Bedwetting after the age of 3:	<input type="radio"/> No
	<input type="radio"/> Yes
Nail biting (>6 months):	<input type="radio"/> No
	<input type="radio"/> Yes
Stuttering (>6 months):	<input type="radio"/> No
	<input type="radio"/> Yes
<b>Symptoms before and after the age of 14:</b>	
Seizures (grand mal):	<input type="radio"/> None
	<input type="radio"/> Only during withdrawal
	<input type="radio"/> Also outside withdrawal
<b>Symptoms after the age of 14:</b>	
Polyneuropathy:	<input type="radio"/> None
	<input type="radio"/> Mild (pain and disturbed sensitivity)
	<input type="radio"/> Severe (missing Achilles reflex, calf-muscle atrophy, stocking-like numbness)
Somatic withdrawal syndrome:	<input type="radio"/> Not existing
	<input type="radio"/> Mild withdrawal syndrome
	<input type="radio"/> Severe withdrawal syndrome and/or up to delirium tremens
<b>Assessment of comorbidity:</b>	
Periodicity of drinking behaviour:	<input type="radio"/> No periodicity detectable
	<input type="radio"/> Periodicity detectable
Depressed mood:	<input type="radio"/> None
	<input type="radio"/> Reactive depression
	<input type="radio"/> Affective mood disorders (ICD10—F3, DSM IV—296.xx)
Sleep disturbances without alcohol intake:	<input type="radio"/> No sleep disturbance
	<input type="radio"/> Interrupted sleep and/or very early awakening >4 weeks (independent of alcohol or withdrawal)
	<input type="radio"/> Major difficulties to fall asleep
Suicidal or parasuicidal tendencies:	<input type="radio"/> Never
	<input type="radio"/> Only under influence of alcohol or during withdrawal
	<input type="radio"/> Independent of alcohol and withdrawal

<b>Laboratory</b>	
Under the influence of alcohol at the time of examination:	<input type="radio"/> No
	<input type="radio"/> Yes
If applicable, breathalyser test:	
Average daily alcohol intake of the last week in units (1 unit = 0.3 l beer, 1/8 l wine, 20 cl spirit)	
% CDT (cut-off $\leq 2.5\%$ )	

**Laboratory:**

	Current status		After 3 months sobriety		Change
(*) ASAT (GOT)		U/l		U/l	
(*) ALAT (GPT)		U/l		U/l	
(*) gamma-GT		U/l		U/l	
(*) Bilirubin		mg/dl		mg/dl	
(*) Platelets		G/l		G/l	
(*) MCV		fl		fl	
Glucose		mg/dl		mg/dl	
Cholesterol		mg/dl		mg/dl	
Triglycerides		mg/dl		mg/dl	
Red blood cells		T/l		T/l	
Creatinine		mg/dl		mg/dl	
Uric acid		mg/dl		mg/dl

<b>Osteoporose</b>	<input type="checkbox"/> no <input type="checkbox"/> light <input type="checkbox"/> strong
--------------------	--

<b>If one of the above mentioned diseases is declared with light or strong, please enter here the kind of the disease:</b>	
--	--

**If any other somatic diseases, which:**

	<input type="checkbox"/> no <input type="checkbox"/> light <input type="checkbox"/> strong
--	--

	<input type="checkbox"/> no <input type="checkbox"/> light <input type="checkbox"/> strong
--	--

**How strong was the desire for smoking in the last 30 days before your present examination**

I had a great aversion against smoking

Please mark the degree of the desire intensity of craving.  
(It is possible to mark intervals, e.g. 29).

I don't care about smoking

I had great desire to smoke

**Have there ever been moods/situations or periods within the last 12 months before the present examination, in which you never had a desire for nicotine?**

no

yes

please declare which situations or moods:

<b>Do you wake up at night and have to smoke, to continue sleep?</b>	<input type="checkbox"/> Never <input type="checkbox"/> rarely <input type="checkbox"/> frequently per week
<b>Are there any situations or periods with strong desire for food, especially for sweets?</b>	<input type="checkbox"/> Never <input type="checkbox"/> rarely <input type="checkbox"/> frequently per week
<b>To which stress or load are you exposed?</b>	<input type="checkbox"/> Physical hard work <input type="checkbox"/> time-pressure <input type="checkbox"/> conflicts <input type="checkbox"/> multiple stress <input type="checkbox"/> other which: <div data-bbox="676 855 1011 952" style="border: 1px solid black; height: 55px; width: 285px; margin-top: 5px;"></div>

**Comments:**

This questionnaire was created with the scientific support of:

- K. Aigner, Krankenhaus d.Elisabethinen, Linz**
- H.Barath, Krankenhaus Lainz, Wien**
- E.Groman, Nikotininstitut Wien**
- E.Hammer, Betriebsärztin Firma Swarovski, Wattens**
- R.Hainz, praktischer Arzt, Wien**
- Heschl, Rehabilitationzentrum Bad Ischl, Bad Ischl**
- I.Homeier, Pulmologisches Zentrum, Wien**
