# OPERATOR THEORY: ADVANCES AND APPLICATIONS

BIRKHÄUSER VERLAG

Edited by

**I. Gohberg,**

School of Mathematical Sciences, Tel-Aviv University, Ramat Aviv, Israel

*This series is devoted to the publication of current research in operator theory, with particular emphasis on applications to classical analysis and the theory of integral equations, as well as to numerical analysis, mathematical physics and mathematical methods in electrical engineering.*

#### Aims and Scope

*IEOT* is devoted to the publication of current research in integral equations, operator theory and related topics with emphasis on the linear aspects of the theory.

*Integral Equations and Operator Theory* (IEOT) appears monthly and is devoted to the publication of current research in integral equations, operator theory and related topics with emphasis on the linear aspects of the theory. The journal reports on the full scope of current developments from abstract theory to numerical methods and applications to analysis, physics, mechanics, engineering and others. The journal consists of two sections: a main section consisting of refereed papers and a second consisting of short announcements of important results, open problems, information, etc.

#### Abstracted/Indexed in:

CompuMath Citation Index, Current Contents,  
Mathematical Reviews, Zentralblatt für Mathematik,  
Mathematics Abstracts, DB MATH

#### Subscription Information for 1998

IEOT is published in 3 volumes per year,  
and 4 issues per volume  
Volumes 30 – 32  
approx. 500 pages per volume  
Format: 17 x 24 cm  
Back volumes are available
