

# Index

## A

$\alpha$ -acyclic hypergraph, 72  
Adjacency matrix, 8  
Adjacent hyperedges, 2  
Adjacent vertices, 2  
Algebraic representation of a dirhypergraph, 108  
Arboreal hypergraph, 75  
Articulation set, 71  
Automorphism group of the hypergraph, 120  
Automorphism of hypergraph, 20

## B

Balanced hypergraph, 64  
Bipartite graph, 23  
Brooks's theorem, 45

## C

Category, 18  
CHERNOFF'S Inequality, 62  
Chordal graph, 24  
Chordal hypergraph, 71  
Chromatic index, 49  
Chromatic number, 44  
Clique in a graph, 24  
Closed interval, 57  
Co-arboreal hypergraph, 75  
 $k$ -coloring, 43  
Co-rank of a hypergraph, 3  
Complete  $k$ -uniform hypergraph, 6  
Complete graph, 24  
Complete hypergraph, 6  
Conformal hypergraph, 35  
Connected hypergraph, 5, 98

Contraction of 2 hyperarcs, 102  
Convex set, 59  
Critical hypergraph, 53  
Cycle, 5  
 $\beta$ -cycle, 73  
 $\gamma$ -cycle, 75  
 $\beta$ -cyclic hypergraph, 73  
 $\gamma$ -cyclic hypergraph, 75

## D

Decision problem, 54  
Degree of a hyperedge, 27  
Degree of a vertex, 2  
Diameter of a hypergraph, 5  
Directed cycle, 97  
Directed hypergraph, 95  
Directed path, 97  
Dirhypergraphs isomorphism, 107  
Disconnected hypergraph, 5  
Discrepancy of  $H$ , 61  
Discrepancy of hypergraphs of  $H$  with respect to  $\chi$ , 61  
Distance, 5  
Dual hypergraph, 6  
Dual König property, 39  
Dual subtree hypergraph, 72

## E

Elementary directed path, 97  
Embedding of hypergraph, 78  
Empty hypergraph, 1  
Entropy (hypergraph), 9  
Equitable  $k$ -coloring, 47  
Euler hypercycle, 101  
Eulerian dirhypergraph, 101

**F**

Faces of a planar embedding hypergraph, 79  
 Fano plane, 3

**G**

Generalized 2-section, 23  
 Good  $k$ -coloring, 47  
 Graham reduction, 73  
 Gram matrix, 13  
 Graph, 21  
 Graph planar embedding of hypergraph, 79  
 Greedy algorithm, 54

**H**

Hadamard product of matrices, 14  
 Hamiltonian digraph, 102  
 Head, 96  
 Head star, 97  
 Helly hypergraph, 30  
 Helly property, 30  
 HELLY'S Theorem, 59  
 Hereditary closure, 6  
 Hereditary discrepancy of hypergraphs, 61  
 Hereditary hypergraph, 6  
 Hyperarcs, 95  
 Hypercircuit, 97  
 Hypercycle, 97  
 Hypercycle free, 97  
 Hyperedge, 1  
 Hyperedge  $k$ -coloring, 48  
 Hyperedge covering, 37  
 Hyperedge covering number, 37  
 Hyperedge transitive hypergraph, 20  
 Hypergraph, 1  
 Hypergraph reduction, 71  
 Hypergraph similarity metric, 18  
 Hyperpath, 97  
 Hypersink, 105  
 Hypersource, 105  
 Hypertree decomposition of a hypergraph, 75

**I**

Incidence digraph, 98  
 Incidence graph, 27  
 Incidence matrix, 7  
 Induced subdirhypergraph, 96  
 Induced subhypergraph, 2  
 Inner product, 12  
 Inner product space, 12  
 Intersecting, 29  
 Isolated vertex, 2

Isomorphism of algebraic representations of  
 dirhypergraphs, 108  
 Isomorphism of dirhypergraphs, 107  
 Isomorphism of hypergraphs, 19

**K**

Kernel Gram matrix, 13  
 König property, 39, 69  
 Kronecker product, 16

**L**

Labeled-edge multigraph, 25  
 Laplacian(hypergraph), 8  
 Limb, 96  
 Linear dirhypergraph, 98  
 Linear hypergraph, 3  
 Linear spaces, 3  
 Line digraph, 98  
 Loop, 2

**M**

Matching, 37  
 Matching number, 37  
 Metric, 16  
 Metric space, 16  
 Morphism of hypergraph, 18  
 Multigraph, 23

**N**

Negative degree, 97  
 Neighborhood, 23  
 Normal hypergraph, 68  
 $NP$  class, 55  
 $NP$ -complete (NPC for short), 55

**O**

Open neighborhood, 23  
 Ordered hypergraph, 1  
 Order of a hypergraph, 57

**P**

Partial dirhypergraph, 96  
 Partial hypergraph, 2  
 Path, 4  
 $P$  class, 54  
 Pending vertex, 100  
 Perfect graph, 68  
 Planar embedding of hypergraph, 79

Polynomially reducible problems, 103  
 Positive definite, 13  
 Positive-definite kernel, 13  
 Positive degree, 97  
 Positive-semidefinite (or sometimes nonnegative-definite), 12  
 Pseudo-metric, 18

**R**

Rank of a hypergraph, 3  
 Reduced hypergraph, 71  
 Regular, 2  
 Representative (or representative) graph, 24  
 Rooted tree, 75

**S**

2-section, 25  
 Semi elementary hyperpath, 97  
 Similarity function of hypergraphs, 10  
 Simple dirhypergraph, 96  
 Simple hypergraph, 4  
 Simple reduction hypergraph, 4  
 Size of a hypergraph, 1  
 Stability number, 37  
 Stable set or independent set, 37  
 Star, (dirhypergraph), 97  
 Steiner system, 3  
 Steiner triple systems, 3  
 Sterboul cycle, 50  
 Strong chromatic number, 46  
 Strong  $k$ -coloring, 45  
 Strongly connected hypergraph, 98  
 Strong stability number, 37  
 Strong stable set, 37  
 Subdirhypergraph, 96

Subhypergraph, 2  
 Subtree hypergraph, 33  
 Symmetric dirhypergraph, 98  
 Symmetric hypergraph, 20

**T**

Tail, 96  
 Tail star, 97  
 Tensor product, 16  
 Totally balanced hypergraph, 64  
 Totally unimodular matrix, 60  
 Transversal, 60  
 Transversal number, 37  
 Tree-decomposition of a hypergraph, 75  
 Tree-width, 76, 77  
 Triangle, 30  
 Trivial hypergraph, 1

**U**

Underlying hypergraph, 96  
 Uniform dirhypergraph, 97  
 Uniform hypergraph, 3  
 Uniform  $k$ -coloring, 48  
 Unimodular hypergraph, 60

**V**

Vertex incident to a hyperedge, 78  
 Vertex transitive hypergraph, 20

**W**

Width of a hypertree-decomposition, 77  
 Width of a tree-decomposition, 76
