Symbols

L^p - L^q decay estimates, 396

p -Evolution equation, 126

A

Absorbing semilinear term, 246

Anisotropic thermo-elasticity, 367

Asymptotic behavior of solutions, 77

B

Bessel-Clifford function, 324, 331

Boundary control problem, 223

C

Canonical transform, 289, 290

Cauchy problem, 153, 239, 322–324, 336, 339

Causal, 266

Causality, 266

Compact uniqueness, 46

Comparison principle, 289, 290

Condition Γ , 186, 188, 192, 195, 199

Conic singularities, 382

Conservative linear control system, 269

Continuous dependence, 49

Control of oscillations, 128

Control-state mapping, 306

Convection term, 76

Convex Sugimoto, 398

Counterexamples

 Pliš-type, 33

Critical exponent, 240

Cubic media, 368, 377, 382, 401, 404

Curved mass matrix, 412

D

Darboux equation, 326

Decay estimates, 95

Decay properties, 2

Decay rate of irregular initial function, 54

Decay-error estimates, 96

Degenerate operators, 47

 local conditions, 47

Delta function, 183, 187

Diagonalization, 165

Differential inclusion, 186, 189, 196

Diffusion phenomenon, 240

Dimensional mass matrix, 412

Dirichlet problem, 307

Discontinuous right-hand side, 183, 184, 186

Dispersive behavior, 292

Dispersive equations, 289, 292

Dissipative hyperbolic equations, 93

Distributions, 184

Dominance condition, 132

E

Effective mass matrix, 412

Egorov's theorem, 290

Energy

 approximated, 362

 estimate, 347

 hyperbolic, 347, 348

 kovalevskian, 348

 pseudodifferential, 348

Erdelyi-Kober operator, 324

Error estimates, 95

Euler-Poisson-Darboux, 322

Euler-Poisson-Darboux equations, 322

Evolution zone, 131

Extended operator derivative, 315

Extended principal part, 127

F

Filippov set-valued map, 184, 186, 188, 194, 195

- Filippov solution, 183, 186–190, 193, 198
 Fourier-Laplace transformation, 263
 Fresnel surface, 381, 398, 403
 Fujita exponent, 240
 Fundamental solution, 56
- G**
 Gamma function, 324, 333
 Generalized Erdelyi-Kober operator, 323, 325
 Gevrey class, 158
 Gevrey function, 340
 Gevrey spaces, 45
 Global solutions, 153
 Globally regularizing linear control system, 268
 Gradient-like nonlinear term, 3
- H**
 Hexagonal media, 368, 380, 395, 405
 Higuchi bound, 413
 Hyperbolic
 properly, 361
 regularly, 340
 strictly, 340, 353
 weakly, 340, 353
- I**
 Initial value problem, 53
 Internal regularity, 53
 Invariant estimate, 296
 Inverse function theorem, 303
 Inverse scattering problem, 201
 Inversion of the linear part, 56
 Isotropic media, 368, 378
- K**
 Kirchhoff equations, 93
 Kirchhoff formula, 244
 Korteweg–de Vries equation, 54
 Kummer hypergeometric function, 226
- L**
 Lagrange method, 233
 Lamé constants, 368
 Large mass matrix, 412
 Linear control problems, 261
 Linear control system, 261
 conservative, 269
 globally regularizing, 268
 locally regularizing, 268
 observation equation, 261
 state differential equation, 261
 well-posed, 263
 Linear growth, 184, 193, 196
- Locally regularizing linear control system, 268
 Log-effect, 30, 35
 Logarithmic derivative, 333
- M**
 Magnetic Schrödinger operators, 201
 Mass matrix, 411
 Micro-energy, 132, 139
 Mixed problem for the wave equation, 224
 Modified Bessel function, 243
 Møller wave operators, 201
- N**
 Nirenberg's transformation, 154
 Non-convex Sugimoto, 400
 Non-dispersive equations, 289, 296
 Non-uniqueness, 33
 global conditions, 33
 local conditions, 34
 mixed condition, 35
 Nonlinear wave equation, 2
- O**
 One-dimensional thermo-elasticity, 379
 Operator of Bessel, 324
 Optimization control problem, 304
 Osgood condition, 32
 Osgood distance function, 32
- P**
 Principal part in the sense of Petrowsky, 127
 Principle of limiting absorption, 201
 Pseudo-differential zone, 131
- Q**
 Quasi-symmetrizer, 339, 356, 359
- R**
 Regularity
 global, 29
 local, 29
 Relatively simple hypersurface, 185
 Resolvent estimate, 201, 289
 Restriction estimate, 289
 Rhombic media, 368
- S**
 Schrödinger equation, 288
 Secondary comparison, 296, 297
 Semi-critical mass matrix, 414
 Semilinear wave equation, 153, 239
 Separation condition, 128
 Set-valued function of linear growth, 185
 Shape function, 127
 Single-valued function of linear growth, 185

Singular boundary value problems, 76
Singular perturbation, 94
Singular weight, 76
Small mass matrix, 412
Smoothing estimate, 288, 289, 292
Sobolev lattice, 264
Source semilinear term, 246
Spectral representations, 201
Spherical mean, 326
Sub and super-solution method, 77
Sublinear function, 184, 188
Sublinear set-valued function, 185
Sublinear single-valued function, 185
Symmetrizer, 339
 check function of the, 351
 Jannelli's, 343
 Leray's, 344

T
Terms of Levi condition, 127
Terms of lower order, 127
Test function method, 240
Thermo-elastic coupling, 367

Time-dependent damping, 239
Time-varying delay, 2
Transfer relation, 263
Tricomi equation, 322

U
Uniplanar singularities, 382, 391
Uniqueness, 40
 global conditions, 40
 local conditions, 41
Upper semicontinuous function, 185
Upper semicontinuous mapping, 195, 196

V
Variable propagation speed, 153
Variational inequality, 304

W
Weak dissipation, 94
Weighted energy method, 240

Z
Zakharov–Kuznetsov equation, 53
