

# Index

## A

*Annales des Ponts et Chaussées*, 62  
Approach  
    empirical, 27  
    practical, 4  
Arch, 15, 18, 19  
    polygonal, 19  
Arch bridges, 28

## B

Beam resistance, 76  
Beam strength, 13  
Bending, 49  
Bending capacity, 43  
Bending resistance, 43, 76  
Bending stiffness, 57  
Bending strength, 40  
Bending stress, 78  
Bending test, 82  
Bottom chords, 78  
Bridge  
    temporary, 74  
    wood, 1

## C

Campaign  
    experimental, 34, 53  
Cantilever beam, 48  
Cohesion of the fibres, 37  
Computation, 74  
Connections, 8, 67, 77  
Connectors, 26  
Constraints, 7, 47  
Cost effectiveness, 70

## Cost

total, 78  
Criteria  
    scientific, 12  
    traditional, 62  
Cross members, 64

## D

Data  
    experimental, 39  
Decay, 28  
Deck, 15  
Deck bracings, 73  
Deflection, 35, 49, 54, 77, 80  
Deflection test, 82  
Deformation, 5, 34, 56  
Depth, 6  
Depth dimension, 54  
Design rules, 1  
Dimension, 3  
    geometric, 14  
Dimitrii Ivanovich Jourawski, 24  
Displacement, 49  
Durability, 8, 68, 70

## E

École des Ponts et Chaussées Concours des  
    Ponts, 14  
*École des Ponts et Chaussées*, 14  
Elastic line, 35  
Elasticity modulus, 36  
Elasticity  
    absolute, 36  
Element sizing, 4

*Encyclopédie*, 1, 7, 8, 11–13  
 Engineering French  
   Treatises, 0  
 Environmental conditions, 37  
 Experimentation, 1

**G**

Galileo, 48  
*Grand Tour*, 21  
 Grubenmann, 19

**I**

Improvements, 68  
 Innovation  
   technical, 27  
 Iron elements, 63  
 Iron shear connectors, 24  
 Ithiel town, 62

**J**

Jacks, 29  
 John Soane, 21  
 Joints, 67

**L**

*Laminae*, 24  
 Lattice beams, 66, 75  
 Lattice bridge, 67  
 Lattice truss, 63, 80  
 Layers  
   curved, 25  
 Length, 14  
 Levers, 29  
 Load  
   maximum, 13  
 Load bearing  
   capacity, 71, 72, 74, 77, 79  
 Load capacity, 43  
 Load test, 77, 79  
 Load type, 46

**M**

Maximum load, 79  
 Maximum moment, 58  
 Maximum stress, 58  
 Mechanics, 3  
 Modulus of elasticity, 57  
 Moment of elasticity, 50  
 Moment of inertia, 56

**N**

Navier's Bending Theory, 61, 73, 74, 83  
 Nineteenth century, 33, 55  
 Normal stress, 46

**P**

Palladio, 11  
 Patent, 66  
 Practice, 3  
 Principles  
   geometric, 2  
 Proportion, 2, 12

**R**

R.I.B.A. Library, 21  
 Railway bridge, 72  
 Research  
   experimental, 38  
 Resistance, 5, 9, 53  
   elastic, 55  
 Resistance modulus, 33  
 Resisting moment, 57, 82  
 Roof structure, 73

**S**

Safety coefficient, 39  
 Safety factor, 34, 82  
 Scale model, 72  
 Schaffhausen, 20  
 Section moment of inertia, 36  
 Shear connection, 18  
 Sizing, 2  
 Specimen, 5, 53  
 Springback, 35  
 Stiffness, 25, 70  
 Strength, 6, 7, 70  
   absolute, 39  
   ultimate, 55  
 Strength of wood, 4  
 Strength tests, 41  
 Stress  
   normal, 56  
 Stress computation, 54, 81  
 Struts, 15, 18  
 Studies  
   theoretical, 33

**T**

Temporary Bridge, 74, 75, 77, 79  
 Test control, 74

**T**

- Tests, [13](#)
  - experimental, [7](#), [9](#), [37](#)
- Tests on Wood Elements, [0](#)
- Total cost, [76](#)
- Transversal stiffness, [77](#)

**U**

- United States, [64](#)

**V**

- Values
  - computed, [40](#)

**W**

- Wedges, [28](#)
- Weight, [52](#)
- Wettingen bridge, [22](#)
- Wettingen, [20](#)
- Width, [6](#)
- Winches, [29](#)
- Wood, [52](#)
- Wooden bridge, [1](#), [7](#), [8](#), [10](#), [11](#), [19](#), [27](#), [28](#), [58](#),  
[62](#), [65](#), [73](#)
- Wooden bridge arch, [27](#)
- Wood strength, [41](#)
