Bibliography

50. McCallum, A. Multi-label text classification with a mixture model trained by EM. In Proceedings of the workshop on text learning (AAAI'99), Orlando, Florida (pp. 1–7).
Index

A
applications, 151, 167
attributes
  continuous, 30, 38, 45–47, 83, 124, 145
  discrete, 8, 22, 44, 137
  irrelevant, 13, 49, 74, 75, 118, 144, 156
  redundant, 14, 60, 118, 144, 156
  selection, 204, 205, 270
  unknown, 202

B
backpropagation, 97, 99
bias, 67, 143, 191, 193

C
context, 191, 198, 201

D
decision trees, 113

I
imbalanced classes, 77, 194, 207, 217, 228
interpretability, 114, 126

L
linear classifiers, 65

N
neural networks, 91
noise
  in attributes, 14, 45, 57
  in class labels, 14

P
performance criteria
  \( F_\beta \), 221
  error rate, 15
  macro-averaging, 224
  micro-averaging, 224
  precision, 217
  recall, 217
  sensitivity, 222
  specificity, 222
  probability, 19
  pruning
    decision tree, 126, 127, 129, 184, 192
    rules, 131

R
reinforcement learning, 277

S
search
  genetic, 255
  hill-climbing, 1, 5, 7, 8, 98, 255
  similarity, 43
  statistical evaluation, 245
  support vector machines
    linear, 83
    RBF-based, 108

V
voting
  plain, 174, 176
  weighted majority, 179, 182
