

Index

Symbols

n th stability zone, 4, 58, 60

A

Antiperiodic boundary conditions, 3, 5, 6, 9, 33, 47, 55, 58, 95, 104, 106

Arzela-Ascoli theorem, 27, 110

C

Critical case for PDEs, 74, 89

D

Dirichlet boundary conditions, 3, 5, 6, 9, 10, 23, 29, 33, 35, 47, 48, 55, 97, 104

Disfocality, 5, 6, 34

Disfocality at higher eigenvalues, 62, 64

E

Eigenvalues for the antiperiodic problem, 3, 57, 58

Eigenvalues for the Neumann problem, 9, 30, 47, 48, 97

Eigenvalues for the periodic problem, 3, 56, 58, 59, 107

Euler equation, 19, 23, 32

F

Floquet theory, 1, 2, 60

foreword, vii

Fredholm alternative theorem, 24

H

Hill's equation, 1, 58, 60, 112

L

Lagrange multiplier Theorem, 17, 18, 51, 52, 78

Lyapunov constant at higher eigenvalues, 5, 48

Lyapunov constant for antiperiodic conditions, 33, 57, 104, 106

Lyapunov constant for Dirichlet conditions, 29, 33, 55

Lyapunov constant for Neumann conditions, 10, 48, 100

Lyapunov constant for Partial Differential Equations, 71

Lyapunov constant for periodic conditions, 30, 56, 104, 105

Lyapunov inequalities for Partial Differential Equations, 6, 69, 71

Lyapunov inequalities for systems of equations, 5, 6, 9, 11, 18, 35, 43, 48, 61, 95, 97

M

Mixed boundary conditions, 5, 34

N

Neumann boundary conditions, 6, 9–11, 17, 23, 28, 29, 33, 35, 39, 47, 48, 56, 60, 95, 97, 100, 104

Neumann boundary conditions for PDEs, 6, 70, 71

Neumann boundary conditions for systems, 96, 101

Newtonian equation of motion of a mechanical system, 107
 Non resonant problems, 30
 Non uniform nonresonance conditions, 25, 47, 63
 Nonlinear Neumann problems, 4–6, 23, 43, 60, 80
 Nonlinear resonant systems, 106

O

Optimal control problem, 11, 15, 25, 55–57
 Optimality for system of equations, 102
 Optimality of the Lyapunov constant, 42, 63, 96, 102, 107, 111, 116

P

Parametric Hill's equation, 3, 58
 Periodic boundary conditions, 3, 23, 30, 31, 33, 55, 56, 58, 61, 96, 104–107, 111, 112
 Pontryagin's maximum principle, 15, 55, 57
 preface, xi

R

Radial higher eigenvalues for PDEs, 6, 82

S

Schauder fixed point theorem, 4, 27, 81, 110
 Spectral radius, 103
 Stability for linear periodic systems, 112
 Stably bounded systems, 113, 115
 Subcritical case for PDEs, 72, 85
 Supercritical case for PDEs, 75, 91

T

Trace of a matrix, 103

V

Variational characterization for antiperiodic conditions, 34, 106
 Variational characterization for Dirichlet conditions, 29
 Variational characterization for Neumann conditions, 11, 12, 17
 Variational characterization for other boundary conditions, 28
 Variational characterization for periodic conditions, 31, 105
