

Index

A

Active localization, 211
Active mapping, 211
Active SLAM, 212, 213
Autonomous robot, 6

B

Belief space, 221
Bilateral teleoperation, 293, 302

C

Classification, 75, 76, 94–97
Clustering, 245, 254
Communication jitter, 295, 305
Conditional clustering, 254

D

3D feature, 245
Demonstration, 75–84, 86, 88, 89, 92, 93,
95, 96
Descriptor model, 105, 110
Domain of attraction, 60

E

Ensemble, 183
Estimation error, 113, 116, 119
Euclidean clustering, 254
Euler-Lagrange equations, 105
Exploration-exploitation dilemma, 29, 30

F

Failure recovery, 17
Feature classification, 191
Feature tracking, 194, 244
Fog-of-War, 29, 31
Force/motion control, 12
Functional, 29
Fuzzy system, 14

G

Gaussian process, 34
Generalization, 75, 93
Goal-based learning, 75–77, 79, 80
Grasping, 182, 258

H

Hierarchical learning, 8
Homography, 131, 133
Homography estimation, 133

I

Imitation learning, 10, 78
Interaction, 75, 76, 94, 97
Interactive segmentation, 238
Iterative learning control, 16

K

Kalman filter, 266
Kernel function, 34

L

Learning, 4, 75–79, 81, 86, 90, 93
 Lidar, 153
 Linear matrix inequality, 111, 321

M

Manhattan world, 146
 Markov decision process (MDP), 32
 Markov logic network, 194, 195, 197, 198, 203, 205
 Meta-model, 30
 Mobile robotic navigation, 266
 Mobile robotics, 269
 Model-based predictive control, 373
 Multi agent system, 362

N

Network performance measurement, 296
 Non-holonomic dynamics, 315, 316
 Nonstationary, 29, 30, 32

O

Object reconfiguration, 75, 76
 Observer design, 113
 Omnidirectional camera models, 136
 Optimization algorithms, 21

P

Particle filter, 273
 Passivity, 303
 Passivity-based control, 57–59
 Path following, 373
 Pedestrian tracking, 153
 Perception, 75–77, 97
 Persistent autonomy, 3
 Perspective vision, 266
 PID cascade control, 369
 Point cloud, 153
 Policy, 30
 Policy representation, 21
 Principal component analysis, 258

Q

Quadcopter, *see* unmanned aerial vehicle

R

Reactive behavior, 5
 Registration, 153
 Reinforcement learning, 29, 33
 Relative pose, 143
 Reset dynamics, 319, 322
 RGB feature, 244
 Robot learning, 4, 75, 76, 80, 97

S

Sector nonlinearity, 108
 Segmentation, 189, 238
 Segmentation strategy, 199
 Sensor fusion, 266
 Sequential composition, 56
 Simultaneous localization and mapping, 211
 Skill learning, 75–77
 Sum relaxation, 113

T

Takagi–Sugeno descriptor observer, 116, 118
 Takagi–Sugeno models, 107, 110
 Trajectory clustering, 245
 Trajectory tracking, 316
 Trajectory-based learning, 75, 79
 Turn-taking, 75, 76, 96, 97

U

Uncertainty criteria, 214
 Unmanned aerial vehicle, 266, 364
 Unmanned ground vehicle, 363

V

Valve turning, 6
 Vanishing point, 266
 Visual learning, 76, 78
 Visuospatial skill learning, 75–77, 81, 97
