Index

A

- AAAS, 43, 113, 181
- Acceptance (of scientific statements)
 - and common sense, 9, 16, 141, 284
 - criteria for, 109, 110, 129, 267
 - falsification and, 11, 34, 91, 104–108, 187
 - justification and, 97, 111, 152, 186, 282
 - of hypotheses, 2, 77, 81, 83, 87, 98, 109, 143, 181, 208, 267
 - of theories, 15, 28, 85, 93, 95, 111, 119
 - verification and, 11, 18, 109
- Accuracy
 - and precision, 116, 122
 - of measuring instruments, 123, 149
- Action research, 10, 42, 61, 65, 232
 - action researchers, 258
- Aims of Science
 - about “what we can say about nature”, 39
 - description, explanation and prediction of physical phenomena and processes, 258
 - of individual scientist, 112, 248
 - of science as an institution, 38, 41
 - to disclose general principles that govern the universe, 39
 - to improve our ability to improve our knowledge, 40
- Alexander, E., 46
- Anti-realism
 - and theories as instruments for reasoning
 - about reality, 69. *See also* “instrumentalism” and “realism”
 - and true knowledge of the physical world, 69, 306
- Applied inductive logic, 227
- Applied research, 259
- Aristotle
 - Academy in Athens, 9

B

- Bayes/Bayesian
 - analysis, 208, 231, 234, 248, 250, 253
 - and frequentist approach to inference and learning, 255
 - concepts
 - likelihood, 223, 254
 - prior, 223, 254
 - posterior, 223, 254
 - decision, 232, 255
 - learning and, 249
 - likelihood, 251
 - paradigm, 228, 237, 246, 249, 251, 253
 - paradigm based on influence of data on hypotheses, 250
 - permits learning via sequential progression of analyses, 251
 - statistics, 221, 228, 253
 - subjectivity debate and, 247
 - theorem, 210, 221–226, 228, 230, 234, 239, 254. *See also* “frequentist”
- Bayes, T., 221
- Belief
 - and correspondence theory of truth, 41
 - and creation “science”, 15, 35
 - and justification and acceptance of scientific statements, 282
 - and rationality, 69, 77
 - a researcher’s personal – and biases, 144
 - Aristotle on, 10
 - as link between internal mental and external physical worlds, 41, 49, 93, 97
 - in uniformity of nature, 94
 - prior – in Bayesian analysis, 208, 231, 234, 248, 250, 253
 - rational –, 49, 109, 152, 159, 161
 - science and, 1, 8, 9, 12, 13, 25, 41, 76, 105, 111

- Belief (*cont.*)
 scientific – about nature changes, 31
 scientific knowledge is distinguished from
 –, 97
