

Index

- active return/active risk frontiers, 286–7
- Advance Corporation Tax (ACT), 11, 12, 15
- alpha measurement, of hedge funds, 105, 107–16, 117–21
 - non-normality and, 109–11
 - option selling strategies, 115–16
 - for passive investors, 107–9
- Association of Unit Trusts and Investment Funds (AUTIF), 10, 18
- attrition rates, 99
- Bayes' theorem, 39
- Bayesian statistics, 272
- benchmark inefficiency, 70
- best-practice pension fund
 - governance, 295–320
 - board/investment committees, 317
 - challenge of, 300–4
 - alignment with clear mission, 303–4
 - external agents, effective management of, 304
 - innovative capability, 303
 - risk management, 302–3
 - time horizon, 303
 - constrained, 310–14
 - factors associated with, 311, 313
 - institutional coherence, 305–6
 - investment strategy, 314–16
 - people, 306–7
 - process, 307–10
 - scoping, 298–300
 - types of, 312
- bid/offer spreads, 12
- Black–Litterman (BL) model, 36–50, 272
 - alternative formulations, 45–9
 - examples, 41–5
 - workings of, 37–41
- bond markets
 - correlation with hedge funds, 102, 104
- Book Value portfolio, 326
- Capital Asset Pricing Model (CAPM), 14, 15, 38, 40, 50, 131, 323
- Cash Flow portfolio, 326
- classical mean-variance optimisation, 274–9
- cointegration
 - multivariate, 225
 - portfolio diversification, 227–8, 232–4, 240
- cointegration portfolios of European equities, 191–212, 214–23
 - data, 199
 - for index tracking
 - methodology and investment strategies, 196–7
 - portfolio construction, 200
 - results and performance analysis, 202–3
 - literature review, 193–4
 - for market neutral strategies
 - methodology and investment strategies, 197–9
 - portfolio construction, 201–2
 - results and performance analysis, 204–11
 - rebalancing frequencies
 - portfolio construction, 201
 - results and performance analysis, 203–4, 207, 210
 - transaction costs, 211
- collegiality, 307
- compensation, 307
- Composite portfolio, 326
- correlation, 192, 193
 - market, 226–7
- CPLEX, 341

- databank, 230–1
- Deutsche Asset Management, 90
- DFA International Value Series, 35
- disappearing funds, 105, 106
- dividend(s)
 - portfolio, 326
 - reinvestment, 12–13
 - taxation of, 11–12
- DJ Euro Stoxx 50 index portfolio, 196, 198–204, 207, 210–12, 214–15, 324, 325, 326–7
- dynamisation, 78
- earnings momentum investing, 131–2
 - across all markets, 154–8
 - across European market, 158
 - performance of, 167
- effectively adjusted expected return (effective alpha), 293
- efficient frontiers, 277–8
- Eg Barclays Global Investors, 90
- equally weighted returns, 135, 145–6, 149, 170, 175
- Equity Market Sentiment Index (EMSI), 259, 261–5, 267
- equity performance against single-index benchmarks, 72–6
- equity unit trusts, performance of, 9–33
 - data, 10–11
 - Micropal's time series of returns, 11–13
 - bid/offer spreads, 12
 - dividend reinvestment, 12–13
 - expenses, 13
 - taxation of dividends, 11–12
 - persistence of performance, 22–31
 - time series tests, 13–22
 - economic environment, 14–18
 - performance measurement, 14
 - ranked by SMB and HML exposure, 18–22
 - by sector, 18
- error maximisation, 271, 272, 274, 276, 281, 283
- estimation errors into portfolio selection, incorporating, 270–93
 - classical mean-variance optimisation, 274–9
 - robust portfolio optimisation, 273, 280–92
- active return/active risk frontiers, 286–7
 - general framework, 287
 - numerical experiments, 287–92
 - zero net alpha-adjustment frontiers, 284–6
- Event-driven fund, 97, 98
- ex ante* measures, of tracking error, 54–61
- exchange-traded funds (ETF), 324
- expenses, 13
- ex post* measures, of tracking error, 54–61
- Extended Hoare Govett Smaller Companies Index (Extended HGSC), 10
- external agents, effective management of, 304
- Fama–French three-factor model, 14, 131, 333, 334
- fee structures, in pension fund industry, 66–9
- Financial Times Actuaries (FTA) All Share Index, 14, 35, 70
- Fitzrovia International Limited, 13
- Frontline System, 341
- fundamental indexation
 - as active value strategy, 331–8
 - resembling, 334–5
 - sub-optimal quantitative strategy, 335–6
 - value premium, capturing, 332–4
 - in Europe, 323–30
 - fundamental portfolios, relative performance of, 327–9
 - portfolio construction, 324–5
 - reference portfolio versus DJ Euro Stoxx 50 index, 326–7
- fundamental portfolios, relative performance of, 327–9
- Gartmore Pension Fund Managers, 90
