

Index

Symbols

$MS(M^n)$, 27

$SL(n, \mathbb{Z})$, 156

$beh(\Lambda_j | \Lambda_i)$, 18

A

Abelian group, 220

Absolute, 279

Absorbing neighborhood, 13

Accessible from inside boundary of a set,
239

Action of the integer lattice on \mathbb{R}^n , 244

Addition modulo p , 221

Adjacent intervals, 229

Admissible collection, 60

Alexander's theorem, 270

Algebraic automorphism of the torus, 156

Algebraic representation of an attractor, 187

Ambient manifold, 2

Ambient space, 260

Analytic map, 253

Angle between vectors, 222

Annulus, xv

Annulus hypothesis, 270

Anosov diffeomorphism, 8

Anosov flow, 10

Antisymmetry, 219

Arc, xv

C^r -arc, 265

Associativity, 220

Asymptotic direction, 169

Atlas, 247

Attracting domain of an attractor, 13

Attracting point, 9

Attracting (repelling) point, 8, 196

Attractor, 13

DA-attractor, 157

Automorphism, 221

Axis of a handle, 273

Axis of a hyperbolic isometry, 280

B

Baire space, 229

Ball, xv, 226

Banach space, 225

Base of a topology, 227

Basic set, 15

Basin of an attractor, 13

Basis of a vector space, 223

Belitsky theorem, 12

q -th Betti number, 249

Bijjective map, 218

Binary operation, 219

Boundary geodesic, 283

Boundary of a manifold, 246

Boundary of a set, 228

Boundary point, 228

s, u -boundary point, 213

s -boundary point of the basic set, 153

u -boundary point of the basic set, 153

Bounded subset of a metric space, 226

Bouquet of spheres, 248

Branch point, 59

Branched manifold, 24

Bunch, 186

k -bundle, 269

C

Canonical contraction, 13
 Canonical coordinates, 11
 Canonical diffeomorphism, 13
 Canonical expansion, 13
 Canonical form of an attractor, 187
 Canonical generators of the orbits space of the canonical expansion, 37
 Canonical neighborhood of a point of a basic set, 11
 Canonical projections, 218
 Canonical Riemannian metric, 260
 Cardinality of the continuum, 229
 Cartesian product, 218
 Cascade, 2
 Cauchy sequence, 225
 q -cell, 247
 Cellular chain, 248
 Cellular partition, 247
 ε -chain, 5
 Chain component, 5
 Chain connecting basic sets, 18
 Chain equivalence, 5
 Chain homologous to zero, 248
 Chain recurrent point, 5
 Chain recurrent set, 5
 Characteristic manifold, 47
 Characteristic map, 247
 Characteristic of the periodic homeomorphism, 59
 Characteristic space, 47
 Chart, 247
 Christoffel symbols, 261
 Circle inversion, 280
 classification of nontrivial basic sets, 167
 Classification theorem of surfaces, 251
 Closed manifold, 246
 Closed map, 230
 Closed neighborhood, 227
 Closed orbit, 3
 Closed set, 227
 ε - C^r -closeness of maps, 263
 ε - C^r -closeness of smooth submanifolds, 263
 C^1 -closeness of stable manifolds, 10
 Closure of a set, 228
 Coarsest topology, 230
 Cobordism, 274
 Codimension of a lamination (foliation), 277
 Codimension of a submanifold, 256

Commensurable pairs, 215
 Commutant, 220
 Commutated group, 220
 Commutative group, 220
 Commutator, 220
 Compact space, 236
 Compact subset, 236
 Compactum, 236
 C^r -compatible charts, 254
 Compatible pair of supports, 215
 Compatible system of neighborhoods, 111
 Complete metric space, 225
 Complete Riemannian space, 261
 Composition of maps, 218
 Compressible surface, 271
 Congruent points, 170
 Ω -conjugacy, 8
 Conjugate algebraic representations, 187
 Conjugating homeomorphism, 6
 Connected component, 238
 Connected set, 237
 Connected space, 237
 Connected sum of manifolds, 251
 Connecting curve of the string, 214
 Constant map, 218
 Continuous dynamical system, 2, 260
 Continuous map, 225, 230
 Contractible loop, 238
 Contractible space, 231
 Contracting repeller, 15, 150
 Contraction, 225
 Contraction mapping principle, 225
 Converging sequence, 225, 227
 Coordinate map, 247
 Coset, 220
 Cover, 236, 240
 m -fold cover, 240
 Covering map, 240
 Criterion for base, 227
 Critical level set, 272
 Critical point of a smooth function, 272
 Critical value, 272
 k -cycle, 18
 q -cycle, 248
 Cyclic group, 221
 Cylindrical sphere, 270
 Cylindrically embedded sphere, 270

D

Deck transformation group of a cover, 241
 Dedekind cut, 176
 Degenerate critical point, 272

Degree of a bunch, 186
 Degree of degeneracy of a critical point, 272
 s -dense point of the basic set, 153
 u -dense point of the basic set, 153
 Dense subset, 228
 Densely situated connected component, 153
 Derived set, 228
 C^r -diffeomorphic manifolds, 255
 Diffeomorphic smooth structures, 256
 C^r -diffeomorphism, 255
 DA -diffeomorphism, 156
 “north pole-south pole” diffeomorphism, 45
 “source-sink” diffeomorphism, 45
 A -diffeomorphism, 14
 U -diffeomorphism, 8
 Difference of sets, 217
 Differential of a map, 254
 Dimension of a linear space, 223
 Dimension of a linear subspace, 223
 Dimension of a manifold, 245
 Direct product, 218
 Direct sum of groups, 221
 Direct sum of linear subspaces, 224
 Directive sequence, 171
 Discontinuous group action, 242
 Discrete dynamical system, 2
 Discrete metric, 224
 Discrete topology, 227
 Disjoint union, 218
 Disk, xv
 Distance function, 224
 Dividing set, 238
 Dynamical numbering of the periodic orbits, 46

E

Element of length, 261
 Elementary cobordism, 274
 Elements of a set, 217
 Elliptic isometry, 280
 C^r -embedding, 257
 Empty set, 217
 Energy function, 132
 Epimorphism, 220
 Equilibrium point of a vector field, 259
 Equipped graph, 66
 Equivalence class, 219
 Equivalence relation, 219
 Equivalence relation induced by a map, 234
 Equivalent curves, 258
 Equivalent manifolds, 78
 Equivalent paths, 239

Equivalent schemes of Morse–Smale diffeomorphisms, 69, 115
 Equivalent submanifolds, 78
 Essential closed curve, 238
 Essential knot, 238
 η -essential submanifold, 78
 Euclidean metric, 225
 Euler characteristic of a the polyhedron, 250
 Expanding attractor, 15, 150
 Expanding map, 24
 Ω -explosion, 18
 Exponential map, 262
 Exterior point of a set, 228
 External binary operation, 219
 External topology, 257

F

Factor group, 220
 Factor space, 232
 Factor topology, 231
 Filtration, 19
 Filtration theorem, 20
 Finite cover, 236
 Finite CW complex, 247
 Finite-dimensional linear space, 223
 Finite subshift, 22
 Finitely generated group, 221
 First recurrence map, 9
 Fixed point, 2
 Flow, 2, 260
 U -flow, 10
 Foliation, 277
 Foliation with saddle singularities, 278
 Foliation with the standard saddle singularity, 277
 Fragmentation lemma, 266
 Frame, 264
 Frame of separatrices, 127
 Free group, 221
 Free group action, 242
 Function, 218
 Fundamental domain of a group action on a space, 241
 Fundamental group, 239

G

Gauss–Bonnet’s formula, 279
 Generalized Klein bottle, 233
 Generalized Schoenflies theorem, 270
 Generalized theorem on stable manifold of a hyperbolic point, 10
 General position, 264

Generating set, 221
 Generators of a group, 221
 Genus of a 3-manifold, 221
 Genus of a surface, 252
 Genus of a surface with boundary, 253
 Geodesic, 261
 Geodesic flow, 262
 Geodesic lamination defined by the automorphism τ , 283
 Geodesic triangle (polygon), 279
 Geodesically complete Riemannian space, 261
 Global flow, 260
 Gluing (attaching) a handle, 252
 Gluing (attaching) a Moebius strip, 252
 Gluing lemma, 230
 Gluing of spaces by a map, 235
 Gradient-like diffeomorphism, 30, 44
 Graph of the diffeomorphism, 65
 Group, 219
 Group action by homeomorphisms on a set, 242
 Group action on a topological space, 241
 Group homomorphism, 220
 Group properties, 260

H

Hadamard-Perron theorem, 10
 Handle neighborhood of an attractor, 137
 Handle of index q and of dimension n , 273
 Handlebody of genus g , 137, 274
 Hartman–Grobman theorem, 12
 Hausdorff space, 237
 Heegaard splitting, 276
 Heegaard surface, 276
 Hessian matrix, 272
 Heteroclinic curve, 29
 Heteroclinic intersection, 29
 Heteroclinic manifold, 29
 Heteroclinic orbit, 29
 Homeomorphic spaces, 231
 Homeomorphism, 231
 Homeomorphism of algebraically finite type, 284
 Homoclinic orbit, 16
 Homoclinic point, 16
 Homoclinically connected points, 16
 Homogeneity lemma, 266
 Homologous cycles, 249
 q -th homology group, 249
 Homomorphism induced by a cover, 243
 Homotopic maps, 231

Homotopic paths, 239
 Homotopy, 231
 Homotopy equivalence, 231
 Homotopy relative to a subset, 231
 Homotopy rotation class, 215
 Homotopy type, 231
 Hurewicz theorem, 236
 Hyperbolic area, 279
 Hyperbolic attractors, 156
 Hyperbolic automorphism, 180, 282
 Hyperbolic homeomorphism, 188, 207
 Hyperbolic isometry, 280
 Hyperbolic matrix, 156
 Hyperbolic metric, 279
 Hyperbolic periodic point, 8
 Hyperbolic plane, 279
 Hyperbolic point, 9
 Hyperbolic set, 8, 9
 Hyperbolic singular point of a vector field, 259
 Hyperbolic surface, 281

I

Identity map, 218
 Image of a mapping, 218
 Image of a set under mapping, 218
 Image of a subgroup, 220
 Image of an element under mapping, 218
 C^r -immersion, 257
 Impassible grain, 277
 Incidence coefficient of cells, 248
 Incidency, 65
 Inclusion map, 218
 Incomparable elements, 219
 Incompressible surface, 271
 Index of a critical point, 272
 Index of a curve with respect to a foliation, 278
 Index of a saddle singularity, 278
 Index of an isolated fixed point of a continuous map, 259
 Index of an isolated singular point of a vector field, 259
 Index of an isolated singularity, 278
 Index of intersection of stable and unstable manifolds, 15
 Index of intersection of submanifolds, 264
 Induced automorphism, 243, 282
 Induced homomorphism, 239, 250
 Induced topology, 230
 Infinite-dimensional linear space, 223
 Injective map, 218

Inner metric on stable (unstable) manifold, 10
 Innermost curve, 85
 Interior geodesic, 283
 Interior of a set, 227
 Interior point of a set, 227
 Internal diffeomorphism of a group, 282
 Internal topology, 257
 Intersection of sets, 217
 Invariant coefficients of torsion of finitely generated abelian group, 222
 Invariant manifold of periodic point, 12
 Invariant set, 2
 Inverse element in a group, 220
 Inverse map, 219
 Involution, 157, 219
 Irrational points of the absolute, 281
 Irreducible homeomorphism, 284
 Irreducible manifold, 271
 Isolated point, 228
 Isolated singular point of a vector field, 259
 Isolating neighborhood, 13
 Isometry, 225
 Isomorphic groups, 221
 Isomorphic vector spaces, 223
 Isomorphism, 221
 Isomorphism of equipped graphs, 67
 Isomorphism of graphs, 65
 Isomorphism of vector spaces, 223
 C^r -isotopic embeddings, 265
 C^r -isotopy, 265
 Isotopy support, 265

J

Jacobian determinant, 254
 Jacobian matrix, 254

K

Kernel of a homomorphism, 220
 Klein bottle, 233
 Knot, 238

L

Leaf of a lamination (foliation), 276
 Lefschetz–Hopf theorem, 260
 Lefschetz number, 250
 Left coset, 220
 λ -lemma, 16
 Level set, 272
 Lift, 241
 Lifting theorem, 241

Limit of a sequence, 225, 227
 Limit point, 228
 α -limit point, 3
 ω -limit point, 3
 Limit set, 3
 α -limit set, 3
 ω -limit set, 3
 Linear combination, 223
 Linear map, 223
 Linear space, 222
 Linear subspace, 223
 Linearizing neighborhood, 29
 Linearly dependent set of elements of a vector space, 223
 Linearly independent set of elements of a vector space, 222
 Local coordinates, 247
 Local flow, 260
 Local representation of a map, 253
 Locally finite cover, 236
 Locally flat embedding, 267
 Locally maximal set, 2
 Loop, 238
 Lower topological limit, 229
 Lyapunov function, 132
 Lyapunov metric, 8

M

C^r -manifold, 255
 n -manifold, 245
 Manifold with boundary, 246
 Map, 218
 Map C^∞ -smooth at a point, 253
 Map regular at a point, 254
 map C^r -smooth at a point, 253
 Map transversal to a submanifold, 264
 Markov partition, 23
 Meridian, 274
 Meridian disk in a solid torus, 274
 Metric, 224
 Metric topology, 227
 Metrizable space, 227
 Mildly wild frame, 269
 Minimal equivalence relation, 219
 Modification of index q , 274
 Modular surface of the periodic transformation, 59
 Moebius strip (band), 233
 Moise's theorem, 270
 Monodromy theorem, 241
 Monomorphism, 220
 Morse–Bott function, 272

Morse–Lyapunov function, 50, 133
 Morse–Smale diffeomorphism, 27
 Morse coordinates, 273
 Morse function, 272
 Morse index of fixed point, 12
 Morse index of periodic point, 12
 Morse inequalities, 275
 Morse–Smale diffeomorphism, 20
 Morse–Smale flow, xix
 Multidimensional torus, 233

N

Natural projection, 232
 Neighborhood of a point, 227
 Neutral (identity) element of a group, 219
 Nielsen classes, 284
 Nielsen type of a homeomorphism, 283
 Node point, 8, 9
 Nondegenerate critical point, 272
 Nondegenerate singular point of a vector field, 259
 Nonorientable manifold, 247, 255
 Nonorientable surface with boundary, 253
 Nonsmoothable manifolds, 256
 Nontrivial basic set, 15
 Nontrivial relation, 221
 Non-wandering point, 4
 Non-wandering set, 4
 Norm, 222
 Normal space, 237
 Normal subgroup, 220
 Normed space, 222
 North pole, 245
 Nowhere dense set, 228
 Null homotopic loop, 238
 Numeration compatible with the embedding of separatrices, 66

O

One-to-one map, 218
 Open cover, 236
 Open map, 230
 Open set, 227
 Open subset of a metric space, 226
 Open neighborhood, 227
 G -orbit, 241
 Orbit of a point, 2
 Orbits space, 38
 Orbits space of action of a homeomorphism on a topological space, 242
 Orbits space of the canonical expansion, 35
 Order of a cyclic group, 221

Order relation, 219
 Ordered set, 219
 Orientable (nonorientable) basic set, 15
 Orientable manifold, 247, 255
 Orientable surface with boundary, 253
 Orientation of a vector space, 223
 Orientation preserving diffeomorphism, 255
 Orientation reversing diffeomorphism, 255
 Orientation type of a periodic point, 28
 Oriented graph, 65

P

Pair of conjugated points, 213
 Parabolic isometry, 280
 Partial order relation, 219
 Path, 238
 Path-connected space, 238
 Path joining points in a space, 238
 Paths composition, 238
 Perfect set, 228
 Periodic components of a basic set, 16
 Periodic data of a diffeomorphism, 58
 Periodic data of an orbit, 28
 Periodic homeomorphism of a surface, 58, 284
 Periodic point, 2
 Periodic point of a dynamical system, 2
 Periodic point on the boundary of a manifold, 187
 Periodic trajectory, 3
 Period of a periodic point, 2
 Period of a separatrix, 60
 Phase portrait, 3
 Phase space, 2, 260
 Pixton class of diffeomorphisms, 87
 Plaque, 276
 Poincaré–Hopf theorem, 259
 Poincaré map, 9
 Point of closure, 228
 Point of wildness, 267
 Points separated on the absolute, 279
 Preimage under mapping, 218
 Pretzel, 251
 Prime manifold, 271
 Product of C^r -arcs, 265
 Proper map, 236
 Properly embedded surface, 271
 Pseudo-Anosov homeomorphism, 285

Q

Quadratic form, 260
 Quasitransversal of a basic set, 169

Quotient of a map, 23

R

Rank of a finitely generated abelian group, 222

Rank of a map, 254

Rational point of the absolute, 281

Real projective space, 232

Realization of dynamical systems, 7

Rectangle, 23

Recurrence, 4

Recurrent point, 4

α -recurrent point, 4

ω -recurrent point, 4

Reducible homeomorphism, 284

Reflection, 280

Reflexivity, 219

Regular level set, 272

Regular map, 255

Regular Morse function, 273

Regular point, 272

Regular value, 272

Relation, 221

$<$ -relation, 18

Relation over a set, 219

Repeller, 13

Repelling point, 8, 9

Residual set, 228

Restriction of a map, 218

Reverse limit, 23

Riemannian metric, 260

Right coset, 220

Roughness, 7

S

Saddle point, 8, 9

Scalar product, 222

Scheme of a Morse–Smale diffeomorphism, 68

Schoenflies theorem, 270

Self-indexing function, 272

Semiconjugating map, 23

Separable 1-dimensional attractor (repeller), 189

Separable space, 228

Separatrix of a hyperbolic fixed point, 12

Separatrix of a hyperbolic periodic point, 12

Separatrix period, 28

Set, 217

Set of integers, xv

Set of complex numbers, xv

Set of natural numbers, xv

Set of real numbers, xv

Set of the first category, 228

Shift, 24

Simply connected space, 240

Singular point, 2, 259

Sink, 8, 9

Sink point, 8, 9

Skeleton of a CW complex, 247

Smale's Axiom A, 14

Smale-Williams solenoid, 159

C^r -smooth atlas, 254

Smooth curve, 258

Smooth dynamical system, 7

Smoothing of angles, 264

Smooth manifold, 255

C^r -smooth map, 255

Smooth object, 257

Smooth structure, 255

Solenoid, 24

Solid torus, 274

Source, 8, 9

Source point, 8, 9

South pole, 246

G -space, 242

Space obtained by attaching a cell, 247

Spectral decomposition theorem, 15

Sphere, xv

Sphere with handles, 252

Sphere with Moebius strips, 252

Ω -stability, 8

Ω -stability theorem, 20

E -stability of dynamical system, 7

Stable manifold of a basic set, 15

Stable manifold of hyperbolic point, 10

Standard k -bundle, 269

Standard pair, 256

Standard smooth structure, 255

Stereographic projection, 245

Strictly tight neighborhood of an attractor, 138

String, 213

Strong topology in the space of maps, 263

Strong transversality condition, 20

Structural stability, 7

Structural stability theorem, 20

Structural theorem for cyclic groups, 221

Structural theorem for finite-dimensional vector spaces, 223

Structural theorem for finitely generated abelian groups, 221

C^r -structure on manifold, 255

Subcover, 236

Subgroup, 220

C^r -submanifold, 256
 C^r -submersion, 257
 Subset, 217
 Subspace of a topological space, 230
 Sum of linear subspaces, 223
 Support of a basic set, 214
 Support of a foliation, 276
 Surface, 247
 Surface with boundary, 253
 Surjective map, 218, 220
 Suspension over a diffeomorphism, 133
 Symbolic dynamical system, 22
 Symmetry, 219

T

Tame embedding, 267
 Tame frame, 269
 Tame separatrix, 31
 Tamey embedded manifold, 267
 Tangent bundle of a manifold, 259
 Tangent space, 258
 Tangent vector, 258
 The degree of the map, 248
 Theorem on canonical representation of 3-manifolds, 276
 Theorem on canonical support, 186
 Theorem on decomposition of a 3-manifold into connected sum of prime manifolds, 271
 Theorem on dividing sets, 246
 Theorem on local topological classification of hyperbolic fixed points of a diffeomorphism, 12
 Theorem on relative smoothing of homeomorphisms, 265
 Theorem on smoothing of diffeomorphisms, 265
 Theorem on smoothing of homeomorphisms, 265
 Theorem on smoothing of maps, 264
 Theorem on the uniqueness of the smooth structure, 256
 Thom's example, 155
 Thom's isotopy extension theorem, 266
 Thorn, 277
 Tight neighborhood of an attractor, 138
 Time-1 map, 2
 Topological Bernoulli shift, 22
 Topological classification of dynamical systems, 7
 Topological conjugacy, 6
 Topological dimension, 229

Topological disjoint union, 230
 Topological embedding, 257
 Topological equivalence, 6
 Topological invariant, 7
 Topological limit of a sequence of sets, 229
 Topologically transitive set, 2
 Topological manifold, 255
 Topological Markov chain, 22
 Topological object, 257
 Topological product, 230
 Topological submanifold, 256
 Topology, 226
 C^r -topology in the space of maps, 263
 Torus, xv
 n -torus, 244
 2-torus, 233
 Trajectory of a point, 2
 Transition map, 254
 Transitivity, 219
 Transversal intersection of smooth submanifolds, 264
 Transversality theorem, 264
 Transversal linear subspaces, 223
 Transversal measure for a foliation, 278
 Triangle inequality, 224
 Tripod, 277
 Trivial basic set, 15
 Trivial cobordism, 274
 Trivial group, 220
 Trivial knot, 79
 Trivial relation, 221
 Trivial torus, 79
 Tubular neighborhood, 262
 Type of a basic set, 15
 Type of orientation of a fixed point, 13
 Typical property, 229

U

Unimodular integer matrix, 156
 Union of sets, 217
 Universal cover, 240
 Universal covering space, 240
 Unstable manifold of a basic set, 15
 Unstable manifold of a hyperbolic point, 10
 Upper half-space, xv
 Upper topological limit of a sequence of sets, 229

V

Vector field, 259
 Vector space, 222
 Vertex incident to an edge, 65

WWandering point, [4](#)Widely situated basic set, [168](#)Wild embedding, [267](#)Wild frame, [269](#)Wild frame of separatrices, [127](#)Wild separatrix, [31](#)Wildly embedded manifold, [267](#)
