

Index

A

- Active power, 5, 6, 32–37, 39
- Adequacy, 19, 22–25, 39, 53
- Advanced metering infrastructure (AMI), 35, 93
- Adversary, 8, 10, 74, 90, 94, 95, 97, 108, 109
- Adversary model, 95
- Aikaike/Bayesian information criteria (AIC/BIC), 55, 64, 66, 68
- Anonymity zone, 88, 91, 104, 107
- ARMA. *See* Auto-regressive moving average (ARMA)
- Auto-correlation function (ACF), 54, 55, 57–64
- Auto-regressive moving average (ARMA), 61, 63–64, 66

B

- Bad data detection, 53–68
- Bayesian-based estimator, 39–42
- Blocking data flow, 74
- Box–Jenkins, 54, 57, 65

C

- Cloud computing, 6, 31, 71, 72, 77, 80
- Cloud network, 71–81
- Communication network, 1, 36, 74
- Communication protocol security, 4
- Complex dynamical network, 4, 31
- Congestion prevention, 19, 24–25
- Contingency analysis, 5, 32, 33, 35
- Covariance matrix, 38, 39, 41, 42

D

- Data privacy, 10, 11, 85–91, 93–109
- Data security, 71–81
- Data traffic, 6, 7, 72
- DC power flow, 5–6, 31–48
- Demand, 1–4, 8, 19–25, 35, 56, 86, 94, 95
- Demand response, 2, 3, 31, 35
- Detection mechanism, 7
- Distributed denial of service (DDoS), 6, 7, 71–74, 79, 80
- Distributed random variable, 91, 105
- Driver, 94, 95

E

- Economic dispatch, 2, 20–21, 24–27
- Electric vehicles, 2–4, 19, 21, 31, 93, 95
- End-user, 11, 35, 85–91
- Energy consumption, 3, 31, 87
- Energy systems, 85–87
- Error detection, 31–48
- Euclidean distance, 88, 97, 107
- Experimental work, 80

F

- Flexibility, 4, 77
- Forecaster, 2, 59, 63–65, 68

G

- Geometric deduction, 91

H

- Hierarchical decomposition sequence (HDS), 76, 77

I

Information network security, 6–8, 10
 In home displays (IHDs), 86
 Instantaneous privacy level, 89, 99, 101, 104–107

L

Linearly-constrained optimization, 76
 Linear model, 37–41, 46
 Location, 8–11, 65, 79, 85, 87–91, 93–97, 99, 100, 102–109
 Location based services, 8–10, 85, 87–90, 93, 95–97, 108
 Location obfuscation, 9–10, 88–91, 95, 96, 100, 102–108
 Location privacy, 8–10, 85, 87–91, 93–96, 107, 108
 preservation mechanism, 8, 10, 85, 89–90, 93, 95–97, 99
 Loss minimization, 2

M

Minimum-variance unbiased estimator (MVUE), 36–39
 Missouri network, 79, 81
 Mobile nodes, 88–91, 95–97, 100, 103–104, 107, 109
 Mobile user, 11, 93–109
 Mobility model, 88, 95
 Movement path, 88, 91, 94, 97, 99, 107–108
 Multi-tenancy, 7, 73
 MVUE. *See* Minimum-variance unbiased estimator (MVUE)

N

Neural network, 5, 7, 32, 73
 Node movement, 102–103
 Noise vector, 37–39, 44–46, 48
 Non-homogenous Poisson pattern, 75
 Non-iterative solution, 5, 33

O

Oblivious network design, 6, 21, 72
 Oblivious routing-based security (ORSS), 7, 8, 71, 73, 76, 80
 Optimization, 2, 5, 20–22, 33, 43, 45, 76
 Oxford network, 79, 81

P

Physical network security, 3–6, 10
 PJM, 36, 55, 59, 65–68
 Platform as a service (PaaS), 6, 71, 74, 77, 78
 Power distribution, 1–4, 19, 20, 24, 25, 31
 Power flow problem, 5, 31–33, 36, 39, 42, 46
 Power supply, 2, 19, 21–23
 Power systems, 1–6, 20, 31, 32, 35–37, 53, 68, 93–95
 Privacy, 1–11, 71, 80, 85–91, 93–109
 Privacy issues, 1–11, 71, 80, 87
 Privacy preservation, 10, 87–91
 quantification, 97–102
 Private architecture, 6, 71
 Probabilistic model, 4, 31, 97–102
 Probability, 7, 20, 23, 37, 39, 44–46, 48, 57, 72, 77, 79, 81, 88, 103

R

Reliability, 3, 5, 10, 19–27, 32, 93
 Reliable system, 1–4
 Response time, 71, 75, 76, 79, 80

S

Safest path algorithm, 79
 Seasonal non-stationary, 54, 55, 61
 Security, 1–11, 53, 71–81
 Security features, 7
 Sensor networks, 2, 10, 20
 Shortest path algorithm, 79
 Short-term, 59, 68
 Signal, 35, 36, 38, 43, 60, 61, 63–64, 66, 86
 Smart grids, 1–11, 19–27, 31, 32, 35–36, 39, 53, 73–81, 85–87, 93, 108
 Smart meters, 4, 35, 85, 86
 Sparse vector recovery, 42–48
 State estimation, 3, 4, 31–48, 53
 Steady state operation, 5, 32
 Stochastic model, 88, 102–103, 105
 Sustainable power systems, 93

T

Theoretical bound, 8, 71, 73
 Time series, 53–64, 68
 Traffic pattern, 6–8, 72, 73
 Trajectory privacy, 11, 95–97

V

Voltage angle, 5, 32, 34, 35, 41

Voltage magnitude, 5, 33–35
Voronoi diagram, 88

W

Weighted graph, 74–77
White Gaussian noise, 38–40, 42

Wide stationary signal, 60
Wireless sensor network, 8

Z

Zombie attack, 6, 7, 71, 72, 74, 75,
79, 80
