 - Dynamic safety, 1

E

Each matrix element, 169
 Economist magazine, 80
 Element models, 167–168
 Element-modelling techniques, 163
 Eurocopter Consortium, 23
 European aircraft market forecast, 17
 European airlines, 16
 European and US aviation, 102
 European Automobile Manufacturers Association, 53
 European industries, 125
 European Rail Transport Management System, 57
 Evaluators, 163

F

Fault localisation, 254–256
 Fault mode effects and criticality analysis (FMECA), 283
 Fault tree analysis, 34, 281
 Faulty sensors, 282
 Flight control signals, 87
 Flight data
 memory, 227
 software architecture, 227–229
 Flight data array, 156
 Flight data matrix (FDM), 223
 Flight data memory (FDM), 225
 flight data simulation (FDS) module, 111
 Flight Global Safety 2016 conference, 271
 Flight mode
 aircraft conditions, 209
 algorithms, 212
 analysis and detection, 211
 ASC, 210
 assumptions, 210
 boundary conditions, 212
 configurability, 224
 definitions, 213–217
 dependencies, 209
 detection algorithms, 217–220
 determination, 223–224
 flight crew, 220–221
 flight performance, 229–231
 goals, 210
 information processing, 221–224
 information vector, 209
 intended flight, 210
 objectives, 212
 PASC, 211
 prognosis, 223

 real-time diagnosis, 223
 safety, 229–231
 XML specification, 232–239
 Flight mode detector, 223
 Flight phase accident statistics, 36
 Flight risk analysis
 causes/factors, 36–37
 NTSB, 34
 occurrence codes, 35
 Flight safety, 40–41
 Flight safety systems (FSS), 60, 76
 Flight simulator package, 157
 Flight trajectory, 60
 Flightglobal safety Symposium, 189
 Flights safening, 60
 FTA and FMECA analyses, 133
 Functional faults, 243
 Functional models, 165–166
 Functional safety, 62

G

GA accident statistics, 81
 GA safety monitoring, 113
 General aviation, 99, 101, 121
 accident statistics, 30–33
 risk and safety, 30
 UK GA accidents, 32–33
 US GA accidents, 30–31
 distribution, 20
 features, 20–21
 The General Aviation Manufacturers Association (GAMA), 7
 Generalised algorithm of fault tolerance (GAFT), 133, 243
 General-purpose aviation (GA), 7
 Global positioning system (GPS), 80
 Government accident investigators, 40
 Graceful degradation systems, 134
 Graph logic model (GLM), 169, 244
 Group method of data handling (GMDH), 280

H

Hardware-based redundancy types, 135
 Hazard analysis, 63
 Health monitoring systems, 1
 Helicopters, 21–23
 High-profile accidents, 46
 Hindenburg disaster, 271
 Home's classification, 105
 Human machine interface (HMI), 220, 225

I

Industrial systems, 46, 62
 Integrated vehicle health management (IVHM) systems, 60
 International Civil Aviation Organization (ICAO), 82
 International System Safety Conference (ISSC), 34
 Inverse analysis, 246
 Inverse tracing analysis, 246

J

Joint availability (JA), 79

K

Kinetic energy, 60

L

Landing phase, 162
 Latency period, 84, 136
 Liability coverage, 40
 Life-cycle activities, 65
 Localisation of faults, 249, 252

M

Markovian properties, 76
 M_{as} models, 132
 Mean time between failures (MTBF), 107
 Measure of mean time to failure (MTTF), 78
 Method of linear recovery (MLR), 280
 Military aircraft, 6, 113
 Military aviation data, 107
 Military flight data, 109
 Minimum operational performance specifications (MOPS), 105
 Mission availability (MA), 78
 Model of active system control for aircraft (MASCA), 152
 Movement authorities (MAs), 56
 Multifunctional indicator (MFI), 262

N

Numeric matrix calculations, 248

O

Object of danger (OD), 4
 Objects of safety (OSs), 4

On-board active system control, 279
 On-board mechanical systems, 270
 On-board safety systems, 53
 Operational aircraft, 129
 Operational use, 52–53
 Ordinary differential equations (ODE), 165

P

Partial differential equations (PDE), 166
 Physical safety systems, 49, 55
 PLR Information Systems Ltd, 107
 Point availability (PA), 78
 Post-accident situations, 100
 Preventive maintenance, 191, 194, 197, 199, 205, 206
 Principle of active system control (PASC), 191, 209, 229
 algorithm, 134, 173–176, 182
 backward tracing implementation, 187
 benefit, 125
 CA aircraft, 155
 cruise phase, 161
 cycle of operation, 152
 defining and implementing, 126–129
 element-modelling techniques, 163
 equipment, 126
 factors, 152
 flight data, 157
 flight modes, 155, 159
 functionality, 123, 176
 GA, 150
 GAFT, 133
 global supportive, 122
 implementation, 149–184
 landing phase, 162
 MASCA, 153
 node, 180, 182
 object's sensors, 155
 parameters, 130, 158
 phases of flight, 151
 purposes, 151
 service packs, 130
 software, 158
 structure, 127, 150
 take-off flight phase, 161
 threshold-based models, 166
 tracing node, 179
 vehicle's main flight, 125
 Probability matrix, 171
 Prognostic methods, 192
 Programmable logic controllers (PLCs), 57

Q

Quantitative analysis, 205

R

Rail accidents, 54
 Rail safety systems, 54
 Railway systems, 64
 Real-time reliability, 192, 202
 Recovery matrix (RM), 154, 172
 Recovery matrix tool, 285
 Redundancy theory, 122, 128, 134–137
 Reliability engineering, 194
 Reliability models, 75, 77
 Route safety systems, 49
 Route topology, 55
 Russian space program, 85

S

Safety Board meetings, 109
 Safety control problem, 95
 Safety improvement, 57
 Safety integrity levels (SILs), 65–66
 Safety integrity requirements, 63
 Safety maintenance, 80–86
 Safety management scheme
 aircraft operations, 39
 failures, 42
 NTSB, 38
 replacement value, 39
 Safety-related checks, 52
 Semaphores, 54
 Sensors, 99
 Service packs, 130
 Shuttle accident sequence, 85
 Sikorsky boasts, 23
 Small industrial systems, 47
 Software-based redundancy types, 136
 Solid state universal flight data recorder (SSUFDR), 105

Space domain, 60

Space Shuttle Challenger disaster, 84
 Statistical data processing, 170
 Statistical learning model, 164
 Statistical models, 165
 System software architecture, 285
 Systems of objective Checking (SOC), 6

T

Take-off flight phase, 161
 Thrust termination, 61

U

UK Civil Aviation Authority (CAA), 32
 UK GA accident types, 33
 UK Safety-Critical System Task Force, 192
 Unmanned autonomous change vehicles (UAV), 215
 US GA accidents, 31
 User-based redundancy types, 136

V

Vehicle destruct, 60
 Vehicle parameters, 51
 Vehicle recovery system (VRS), 61
 Visual graphing, 247

W

What we know (WWK), 146
 World accident fatalities, 27

Y

York Safety Critical Steering Committee, 281
