Index

- H_p -atom, 157
- ℓ_q - θ -kernel, 230
- ℓ_q - θ -mean, 230, 234
- ℓ_q -Dirichlet integral, 213, 217
- ℓ_q -Dirichlet kernel, 205, 213
- ℓ_q -partial sum, 205
- θ -kernel, 96
- θ -mean, 96, 97
- p -Lebesgue point, 113, 317
- p -atom, 157
- (p, q) -atom, 156
- (p, q) -atom, 46
- p -atom, 40, 156

- Abel summation, 132
- adjacent intervals, 122
- atomic decomposition, 30, 40, 156

- ball (p, q) -atom, 156
- ball p -atom, 156
- Bessel function, 223
- Bessel summation, 132, 257
- beta function, 222
- Bochner-Riesz summation, 258
- bounded overlapping property, 33
- bounded tempered distribution, 21

- Carleson's theorem, 89, 93, 210, 217
- centered maximal function, 9
- circular θ -means, 230
- circular Dirichlet integral, 213

- circular Fejér kernel, 230
- circular partial sum, 205
- circular summability, 230
- cone, 386
- conjugate function, 87
- conjugate index, 6
- convolution, 7, 20
- cube (p, q) -atom, 156
- cube p -atom, 157
- cubic θ -means, 230
- cubic Dirichlet integral, 213
- cubic Fejér kernel, 230
- cubic partial sum, 205
- cubic summability, 230

- de La Vallée-Poussin summation, 132
- dilation, 73, 83, 204
- Dirac measure, 18
- Dirichlet integral, 91, 92
- Dirichlet kernel, 86, 91
- distance, 32
- distribution function, 9
- divided difference, 218
- dyadic interval, 157
- dyadic rectangle, 157

- Fejér kernel, 97, 230, 385
- Fejér means, 385
- Fejér summation, 97, 132
- Fourier coefficient, 85, 204
- Fourier series, 85, 204
- Fourier transform, 72, 77, 80, 81, 83, 203

- Gabisoniya point, 121
 gamma function, 221
 grand maximal function, 23
- Hardy spaces, 22, 152
 Hardy's inequality, 50
 Hardy-Littlewood maximal function, 8, 138, 139, 317
 Hardy-Littlewood theorem, 10, 139
 Hardy-Lorentz spaces, 48
 Hausdorff-Young theorem, 81
 Herz space, 101, 318, 393
 homogeneous Banach space, 99, 234
 homogeneous Herz space, 102, 318, 404
 hybrid Hardy spaces, 152
 hybrid maximal functions, 152
- integer part, 17
 interpolating function, 48
 interpolation space, 49
 inverse Fourier transform, 75, 83, 203
 inversion formula, 75, 78, 83, 204
 involution function, 73
 iterated Wiener amalgam space, 142
- Jackson-de La Vallée-Poussin summation, 132
 Journé's covering lemma, 185
- Lebesgue measure, 4
 Lebesgue point, 113, 317, 408
 Lebesgue's differentiation theorem, 14, 139
 local Hardy-Littlewood maximal function, 105
 local strong maximal function, 147
 locally bounded, 120, 323
 Lorentz space, 47
 Lusin area integrals, 153
- Marcinkiewicz summability, 230
 Marcinkiewicz-Zygmund theorem, 13
 maximal operator, 13, 103, 210, 217, 264
 Minkowski's inequality, 5
 modified p -Lebesgue point, 321
 modified Lebesgue point, 321, 396
 modified maximal function, 141, 142
 modified strong p -Lebesgue point, 321
 modified strong Lebesgue point, 321
 modulation, 73, 83
- non-increasing rearrangement, 47
 non-tangential maximal function, 23
- partial sum, 86
 perfect set, 121
 Picard summation, 132, 257
 Plancherel theorem, 77
 Poisson kernel, 22, 152
 Pringsheim convergence, 208
- quasilinear, 49
- radial function, 226
 rectangle p -atom, 184
 rectangular θ -kernel, 384
 rectangular θ -mean, 384
 rectangular Dirichlet integral, 213, 217
 rectangular Dirichlet kernel, 207, 213
 rectangular Fejér kernel, 385
 rectangular partial sum, 207
 reflection, 20
 Reiteration theorem, 50
 restricted maximal operator, 386
 Riemann-Lebesgue lemma, 80
 Riesz projection, 87
 Riesz summation, 133, 258
 Rogosinski summation, 132
- Schwartz function, 16, 151
 simple p -atom, 184, 193
 strong p -Lebesgue point, 408
 strong Lebesgue point, 408
 strong maximal function, 143
 sublinear, 49
- tempered distribution, 18
 translation, 20, 73, 83
 triangular θ -means, 230
 triangular Dirichlet integral, 213
 triangular Fejér kernel, 230
 triangular partial sum, 205
 triangular summability, 230
 trigonometric polynomial, 87, 208
 trigonometric system, 204
- unrestricted maximal operator, 398

Vitali covering lemma, 9
Vitali-Wiener covering lemma, 31

weak $L_p(\mathbb{R})$ space, 5
weak Hardy spaces, 22, 152
weak type $(1, 1)$, 10
Weierstrass summation, 132, 257

weighted Lebesgue spaces, 393
Whitney covering lemma, 32
Wiener algebra, 98
Wiener amalgam space, 98, 138

Young's inequality, 7
