

Index

A

Allowances, 3
Atmosphere, 1
Autocorrelation function, 84, 85

B

Basis functions, 67
Bender & Zhang test model, 69
Bid, 45
Bid rate, 48
Bid stack, 45
BSDEs, 12
Business-as-usual, 48

C

Carbon markets, 3
Coal price, 79
Comparison theorem, 15
Conference of Parties (COP), 2
Convergence result, 63, 66
Cumulative emissions, 52

D

Dark spread, 76
Decoupling field, 35
Demand for electricity, 77
Deseasonalized, 82
Differenced series, 84

E

Emissions rate, 50
Emissions stack, 45
EU ETS, 43
EUAs, 5
Euler scheme, 60

F

Forward-Backward SDEs, 28

G

Gas prices, 80
Greenhouse gases (GHGs), 1

H

Histogram, 86
Historical, 51

L

Least-squares regression, 67
Linear BSDEs, 14

M

Marginal abatement cost, 5
Marginal emissions stack, 48
Market administrator, 46

Market price of risk, 76
Markovian BSDEs, 24
Markovian iteration scheme, 64
Maximum likelihood estimation, 85
Multi-period emissions trading, 53

N
Non linear Feynman-Kac formula, 25
Non-linear market, 21
Non-linear regression, 78
Normal distribution, 85
Normal-Inverse Gaussian (NIG) distribution, 87

O
Ornstein-Uhlenbeck process, 85

P
Price of electricity, 45
Pricing measure, 51
Probability measure, 51

R
Relaxed terminal condition, 53
Risk-free asset, 51
Risk neutral measure, 76
Risk-neutral measure or equivalent martingale measure, 51

S
Seasonal component, 77
Series, 82
Singular FBSDE, 71
Spark spread, 76
Stochastic control problem, 19
Stochastic maximum principle, 29
Super-replication problem, 18

T
Tax, 3
Thermal efficiency, 89

V
Viscosity solution, 26
