Table A.2 Questions guiding our semi-structured interviews

1. What is the role of [ORGANISATION/UNIT] in adaptation and in adaptation aid? How would you describe your personal role?
 2. How do you see the role of climate change generally and climate change adaptation in particular in [COUNTRY'S] development cooperation?
 - (a) How has climate change affected the way [ORGANISATION/UNIT] works (if at all)?
 - (b) How does [COUNTRY] compare to other European and global donors with regard to climate change and aid?
 - (c) How does adaptation compare to mitigation?
 3. Can you help us understand the decision-making process on how much climate change and adaptation aid [COUNTRY] provides and to whom?
 - (a) Countries receive different levels of support for adaptation from [COUNTRY]. Can you highlight some of the specific reasons why recipient countries receive more or less adaptation aid?
 - (b) How do you evaluate current reporting on adaptation, especially in the OECD CRS using the Rio marker for adaptation?
 4. How satisfied are you with the outcomes—that is the volume and allocation of adaptation aid by [COUNTRY]?
 5. How do you see the future? Where is [COUNTRY'S] and global adaptation aid heading to after Paris?
 6. Is there anything else we should know about climate change, adaptation, and aid?
-
